

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, AUGUST 19, 1996 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL V

*** SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME ***

CURRENT SITUATION: Moderate initial attack activity was reported throughout the western United States. Type II Incident Management Teams were mobilized within the Northern Rockies, Rocky Mountain and Southern California Areas. An Area Command Team was ordered for the Northern California Area. Training for the 4th Engineer Battalion begins today at Fort Carson, CO. Deployment to the Fork fire in Northern California is scheduled for tomorrow.

Southern California Large Fires:

ROGGE, Stanislaus NF. A Type I Incident Management Team (Greenhoe) is assigned. The fire is being suppressed under Unified Command with California State. The fire is burning in the Tuolumne River drainage south of Highway 108. A 100-200 acre spot fire on the north flank jumped the Tuolumne River yesterday. A potential threat to structures in Tuolumne City, Apple Colony, Miwuk, and Groveland exists. Crews made excellent progress on line construction along the south perimeter.

HWY. FIFTY-EIGHT, San Luis Obispo Ranger Unit, California State. A State Type I Incident Management Team (Bates) and a Type II Incident Management Team (Smith) are assigned. The incident is being suppressed under Unified Command. This fire is 5 miles east of Santa Margarita, CA. Rapid rate of spread through 70 year old brush made suppression efforts difficult. Current size estimate is 50,000+ acres. Accurate mapping was difficult due to intense fire activity. The blaze has moved south of the Machesna Mountain Wilderness.

ACKERSON COMPLEX, Yosemite NP. A Type I (Dague) and Type II (Byrd) Incident Management Teams are assigned. The complex consists of the ACKERSON, POOP/NAUT, BIG CREEK, and MIGUEL fires. All fires burned actively yesterday. A closure of the Camp Mather recreational site is still in effect.

KAWEAH, Tulare Ranger Unit, California State and Sequoia Kings NP. A Type I Incident Management Team (Monahan) is assigned. Steep terrain and limited access are hindering control efforts.

TRIMMER, Fresno-Kings Ranger Unit, California State. The fire is east of Pine Flat Lake. Burnout operations were conducted yesterday. Two major powerlines are threatened.

CHALOLO, Sequoia NF. The fire is burning on the Tule Indian Reservation, east of Springville, CA. Five starts in this area were reported. Three fires are actively burning two were contained.

Northwest Large Fires:

BULL COMPLEX, Umatilla NF. A Type II Incident Management Team (Kearney) is assigned. The BULL, SUMMIT, ROCKY, and #104 fires comprise this complex. The Rocky and Summit fires have burned together. A recreation site at Ben Harrison Peak, Desolation Butte lookout and repeater, Donaldson mine structures and the Wooden pipeline remain threatened.

TOWER, Umatilla NF. A Type II Incident Management Team (Lukens) is assigned. The Tower fire is 17 miles south of Ukiah, OR. Burnout operations on the northeast portion of the fire were successful. Crews continue constructing control lines. Current threats are to the Tower Mtn. lookout and private land.

SOUTH ZONE COMPLEX, Willamette NF. A Type II Incident Management Team (Gardner) is assigned. The 40 fires in this complex are burning 11 miles southeast of Oakridge, OR. Steep terrain and inaccessibility have hindered containment objectives. Seven thousand acres of Seneca timber lands and endangered species are threatened.

SPRING, Umpqua NF. A Type II Incident Management Team (Murphy) is committed. The fire is burning in the Boulder Creek Wilderness, near Toketee Falls, OR. Fire activity moderated yesterday, allowing crews to make good progress on line construction. Steep terrain and heavy fuels are slowing control efforts. Powerlines, private property, and endangered species habitat are threatened.

NORTH UMPQUA COMPLEX, Umpqua NF. Firefighters made good progress toward containment objectives. Watershed and endangered species habitat are threatened.

WILDCAT COMPLEX, Malheur NF. A Type I Incident Management Team (Dubois) is assigned. The fire is 10 miles southeast of John Day, OR. The fire is being suppressed under Unified Command with Oregon State. The Wildcat and Graham fires are included in this complex.

SIMNASHO, Warms Springs Agency, BIA. A Type I Incident Management Team (Porter) is assigned. The fire is burning in grass, brush and timber 10 miles north of Warm Springs, OR. Burnout operations on the northeast flank were completed. Another burnout is planned for islands of unburned fuels within the control lines.

ALDER RIDGE, Fremont NF. A Type II Incident Management Team (Duke) is assigned. The fire is burning 15 miles south of Silver Lake, OR. Additional resources have aided in control efforts. Private land, recreational structures, a power relay station, wildlife habitat, and commercial forest remain threatened.

SALT COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) is assigned. The complex includes the SALT CREEK, DAM, SHEEP CREEK, and HEAVEN'S GATE fires. The fires are burning on the Oregon/Idaho border of the Hells Canyon Recreation Area. Favorable weather conditions moderated fire activity on all portions of the Sheep Creek fire, except the south flank. The Salt Creek and Heaven's Gate fires are contained.

OCHOCO COMPLEX, Ochoco NF. A Type II Incident Management Team (Lohrey) is assigned. The COYLE, GREEN MTN, HAMILTON, CHAPMAN SPRINGS, CORNER CREEK, and LOOKOUT fires are included in this complex. The fires will be turned over to the Districts today. INDIAN POINT, Wallowa-Whitman NF. A Type II Incident Management Team (McDonald) is assigned. Favorable weather conditions moderated fire activity. Firefighters continue to achieve containment goals.

HOG VALLEY, Oregon State. The fire is near the community of Union, OR. No new information available.

DONNEYBROOK, Oregon State. The fire is burning around the community of Ashwood, OR., 20 miles northeast of Madras, OR. No new information has been received for several days. This will be the last report unless new information becomes available.

One fire is in a confinement suppression strategy totalling 1,500 acres.

Northern California Large Fires:

FORK, Mendocino NF. An Area Command Team (Mann) has been ordered. Two Type I Incident Management Teams (Kohut & Loving) are assigned. The fire is located north of the town of Upper Lake, CA. Strong winds continued to cause control problems. Some progress was accomplished with dozer lines. The potential exists for the fire to reach 100,000 acres. A mandatory evacuation is still in effect for 40 homes near this fire.

BUTCHER, Shasta-Trinity NF. This fire is burning near McCloud, CA. Major powerlines less than 2 miles from the fire and private land within a

mile are currently threatened. Good efforts by suppression forces have been encouraging, allowing a containment date to be projected.

DIXIE, Lassen-Modoc Ranger Unit. The fire is about 36 miles northeast of Susanville, CA. It is burning on State, UFSF, BLM and private land. Dozers continue to make good progress on line construction.

ROCK, Shasta-Trinity NF. A Type II Incident Management Team (Madden) is assigned. The fire is located 40 miles southwest of Redding, CA. Fire activity moderated allowing suppression forces to make good progress towards containment objectives. Use of a heavy helicopter has significantly contributed to containment efforts. Spike camps have been established.

EAST FORK, Shasta-Trinity NF. The fire is near Weed, CA. Some progress was made but rolling material and winds continue to hamper containment efforts.

MORRIS, Shasta-Trinity NF. The fire is located in an inaccessible area. Rolling material is hindering containment efforts.

Rocky Mountain Large Fires:

CHAPIN #5, Mesa Verde NP. A Type II Incident Management Team (Hart) is assigned. This fire is burning 8 miles southeast of Cortez, CO. The park has been evacuated and there is an immediate threat to the Far View Visitors Center, powerlines and cultural and historic resources. The fire is burning through heavy fuels on steep, rugged terrain.

SINK CREEK, Grand Junction District, BLM. A Type II Incident Management Team (Summerfeldt) is assigned. The fire is located 15 miles east of Grand Junction, CO. The fire continues to threaten the watershed for Palisade and Grand Junction. Fuels are extremely explosive and have the potential for reburn. Higher relative humidities kept the fire from spreading, but containment will take some time due to heavy fuels and steep, rugged terrain. Better progress is expected now that crews have been spiked out.

Northern Rockies Large Fires:

POWDERVILLE COMPLEX, Eastern Montana State. A Type II Incident Management Team has been ordered. The fires in this complex are burning in grass and sage northeast of Broadus, Mt. The complex consists of the 3 large fires and several small fires. Approximately 8 farms and ranches have been evacuated in Custer and Powder River counties. Precipitation was received on some of the fires last night.

WILLOW CREEK COMPLEX, Bitterroot NF. A Type II Incident Management Team (Spradlin) is assigned. Cooler temperatures and some precipitation have aided suppression efforts. A few smokes are still being found on the Lower Willow fire. Rehabilitation is progressing with some demobilization of crews and engines planned for today. The east flank of the Upper Willow fire continues to be difficult due to spotting, unburned fuels, steep slopes, rocks and concern for firefighter safety. SWET/WARRIOR, Nez Perce NF & Bitterroot NF. A Type II Incident Management Team (Hodge) is assigned. Some suppression action is taking place on portions outside of the Wilderness. No additional fireline was constructed but crews continue to cold trail and mop-up the slopover on the Old Warrior fire. Due to precipitation, fire activity has been minimal.

DOVETAIL, Lewistown District, BLM. This fire is burning near Brusett, MT. No new information was reported.

One fire is in confinement suppression strategy totalling 220 acres.

Alaska Large Fires: Seventeen fires are in a non-suppression status totalling 419,659 acres.

OUTLOOK:

An upper level trough will drop southward along the British Columbia coast with an associated cold front developing from Washington to northern California. Dry weather will prevail over most of the West, except for widely scattered showers and thunderstorms in Arizona and New Mexico. California and Nevada will be locally breezy. High temperatures will range from the 70's and 80's for most of the west. Southern Nevada, southeastern California, and most of Arizona and New Mexico will have highs in the 90's to 112 in the hottest deserts.
