

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 31, 2001 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Two new large fires were reported, one each in Northern California and Rocky Mountain Areas which were contained. Four large fires reached containment, one each in Northern California, Eastern Great Basin, Northwest and Northern Rockies Areas. Initial attack activity was light nationwide. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

EASTERN GREAT BASIN AREA LARGE FIRES:

GREEN KNOLL, Bridger-Teton National Forest. A Type 1 Incident Management Team (Carvelho) is assigned. This fire is located along Mosquito Creek, southwest of Wilson and approximately six miles southwest of Jackson, WY. A Unified Command with Teton County Fire Department is in effect. Some residents are being allowed back into their homes. Mandatory evacuation of Indian Paintbrush subdivision is still in effect. Fall Creek Road continues to be closed to public access. Good progress in containment efforts were made in all divisions.

SNOWSHOE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is seven miles due east of Landmark, ID. Contingency plans for long term fire spread into private in-holdings along Pistol Ridge and the wilderness boundary west of the fire are continuing. Significant precipitation was received on the fire.

NORTHERN ROCKIES AREA LARGE FIRES:

ARTHUR, Yellowstone National Park. A National Type 1 Incident Management Team (Frye) has been ordered. This fire is 55 miles west of Cody, WY. Evacuation of a park service facility at the east entrance occurred during the afternoon, along with the closure of the East Entrance Road at Eagle Creek Campground. Active fire behavior with some torching was observed.

CASTLE, Lewistown Field Office, BLM. This fire, burning in ponderosa pine, grass and sagebrush is 40 miles southwest of Glasgow, MT. Moderate fire behavior with some torching was observed. Good progress was made on

fireline construction and mopup.

LMU = Lassen-Modoc Ranger Unit, California Department of Forestry

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BRICEBURG, Sierra National Forest. California Department of Forestry Type 2 Incident Management Team (Van Devort) transitioned full command of the incident to the California Geographic Area Type 2 Incident Management Team (Rios), and the Unified Command has been dissolved. This fire is 15 miles east of Mariposa, CA. Hot spots continue to be found in the Sweetwater Creek drainage. Radiometric airborne mapping is being utilized to find hot spots.

WESTERN GREAT BASIN AREA LARGE FIRES:

TABOR CREEK, Elko Field Office, BLM. A Type 2 Incident Management Team (Murphy) is assigned. This fire, burning in grass and sagebrush, is 13 miles north of Metropolis, NV. Minor activity, mostly smoldering and creeping was observed. Crews continue with mopup.

SMITH CREEK, Humboldt-Toiyabe National Forest. This lightning caused fire is 40 miles west to southwest of Ely, NV. Light to moderate fire activity was observed. Crews made significant progress towards containment.

ROCKY MOUNTAIN AREA LARGE FIRES:

WEST PLATEAU, San Juan National Forest. This lightning caused Wildland Fire Use fire is 20 miles northeast of Dolores, CO. The fire made a significant run due to hot, dry and windy conditions.

MAD CREEK, Routt National Forest. This fire is in the Mount Zirkel Wilderness Area, 11 miles north of Steamboat Springs, CO. The helitorch burnout operation was successful. Cloud cover, with a trace of precipitation slowed further growth of the fire. Contingency burnout plans are in place should the fire escape containment lines.

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cook) is assigned. This complex of lightning caused Wildland Fire Use fires is in the Diamond Breaks Wilderness Study Area, 50 miles east of Vernal, UT. Slow rates of spread were observed on the Ecklund fire, and there was no observed fire activity on the Davis Draw fire.

NORTHWEST AREA LARGE FIRES:

UNION VALLEY, Southeast Washington State. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned and has assumed a Unified Command with Chelan Fire Department #7, the City of Chelan and the Chelan County Sheriff. This fire is four miles north of Chelan, WA. Evacuations of residences continue in upper Union Valley and Washington Creek drainage as the fire continues to expand to the north. A structural protection plan is being developed for residences in these areas. Good progress is being made on fireline construction.

WFS = Washington State

OUTLOOK:

An upper level trough will continue to move east through the Eastern Great Basin, creating a dry westerly flow over the area. This will bring mostly sunny skies with isolated showers or thunderstorms over the mountains of Idaho and northern Utah. High temperatures will be 75 to 85, except 95 to 105 in southwest Utah. Minimum relative humidity will range from 20 to 30 percent in Idaho and 10 to 20 percent in Utah. Winds will be west to northwest at 5 to 15 in Idaho and northwest to southwest at 10 to 20 mph with gusts up to 30 mph in Utah.

Monsoonal moisture will increase into the front range of Colorado and cooler air will filter into Wyoming behind a cold front that passed through. Colorado will become partly cloudy with isolated thunderstorms over the mountains and eastern portions of the state. Wyoming will be partly cloudy and breezy, with widely scattered afternoon showers and thunderstorms. High temperatures will be 75 to 85 in Wyoming and the 60's in the mountains. Minimum relative humidity will be 15 to 25 percent. Winds will be west to southwest at 10 to 25 mph.

A weak high pressure will rebuild over the Pacific Northwest creating a warming and drying trend. West of the Cascades will have morning clouds, with clearing in the afternoon. East of the Cascades will have sunny conditions. High temperatures will be in the upper 60's to mid 70's west of the Cascades, except for the interior of southwestern Oregon which will be in the mid 80's. East of the Cascades, high temperatures will be in the mid 70's to mid 80's. Minimum relative humidity will range at or above 45 percent west of the Cascades and 20 to 30 percent east. Winds will be northwest to north at 6 to 10 mph west of the Cascades and northwest at 6 to 12 mph east of the Cascades. Southeastern Oregon will have gusts up to 25 mph in the afternoon.

An upper level trough will move out of Montana with diminishing clouds and showers. High temperatures will be in the lower to mid 60's in the mountains and in the mid 70's at lower elevations. Minimum relative humidity will range from 25 to 35 percent in the valleys. Winds will be northwest to southwest at 6 to 12 mph, with ridge top winds being westerly at 10 to 20 mph.

A Pacific trough will remain over Nevada bringing partly cloudy skies with a slight chance of showers in the northeast and east central portions of the state, and sunny conditions elsewhere. High temperatures will be in the 80's, except 95 to 105 south. Minimum relative humidity will range from 15 to 25 percent. Winds will be west to northwest at 10 to 15 mph, except for the southern portion of the state which will be southwest at 15 to 25 mph and gusty.
