

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY MAY 21, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally, with 106 new fires reported yesterday. Two new large fires were reported in the Southwest Area. One large fire was contained in the Southern Area. Very high to extreme fire indices were reported in Arizona and New Mexico.

SOUTHWEST AREA LARGE FIRES:

ROUND, Coconino National Forest. A Type 2 Incident Management Team (Waldrip) is assigned. The fire is burning in mixed conifer and chaparral eight miles northwest of Sedona, AZ. Minimal fire activity was observed yesterday. Extreme terrain where the fire is located is hampering containment efforts, and presents safety concerns.

CHOLLA, Arizona State Land Department. This fire is burning in grass, mesquite and cottonwood near the town of Wikieup, AZ. Minimal fire behavior was observed yesterday. Continued mopup is planned for today.

LWR = Lake Woodruff National Wildlife Refuge

OUTLOOK:

Weather Discussion: Surface high pressure will be in control many central and western states today. However, some weak systems embedded in westerly flow will spark some showers in northern Idaho and over the Dakotas in the afternoon. A slow moving front will be draped across the east today, with a trailing front which is drifting very slowly southward through New Mexico. Instability around the trailing edge of the cold front will spark some thunderstorms today once again in New Mexico, eastern Arizona and central Colorado. In the southeast, a warm and humid air mass will be in place ahead of the front. This will cause showers and thunderstorms from the Gulf Coast north to the Virginia Piedmont. The majority of southern Alaska will remain dry today.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA Areas of morning low clouds and fog coastal areas, otherwise sunny	68-88 Mountains 88-98 Valleys 90-110 Deserts	10-20% Mountains 20-30% Valleys 5-15% Deserts	SW-NW 5 to 15 mph

EASTERN AREA Mostly sunny across the northwest half of MN where elevated fire potential is expected	62 to 72	27 to 37%	Southwest wind increasing to at 10 to 20 mph in the afternoon
SOUTHWEST AREA Partly to mostly sunny. Isolated dry thunderstorms across far eastern AZ and western NM, isolated thunderstorms with wetting rainfall eastern NM and west TX.	60s to 70s mountains and 70s and 80s lower elevations of NM and TX, 90s to 105 southwestern deserts.	5-15% AZ, 15-30% western NM and 30-60% remainder.	Terrain driven across AZ at 5-10 mph, South to Southeast at 5-20 mph remainder.

THUNDERSTORM SAFETY

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- Do not lie down.
 - The best position is sitting on the pack or crouching with feet close together.
 - Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
 - Avoid grouping together. Keep a minimum of 15 feet between people when possible.
 - Removing caulk boots will not provide safety if stocking covered or bare feet are then in contact with the ground--don't bother!

- "Stay out of dry creek beds" is correct for flash floods, but has nothing to do with lightning.

- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Do not use land line radios or radios with elevated antennas.

- Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.

- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.

- Put down all tools.

- Take shelter in vehicles if possible.
