

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY JULY 31, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5

CURRENT SITUATION:

Initial attack activity was moderate in the Eastern Great Basin, Rocky Mountain and Southern California Areas and light elsewhere. Nationally, 240 new fires were reported. Nine new large fires were reported, two each in the Northern Rockies, the Northwest and the Southern California Areas, three in the Northern California Area and one in the Eastern Great Basin. Nine large fires were contained, one each in the Northern Rockies, Northern California, Rocky Mountain, and Northwest Areas, two in the Eastern Great Basin, and three in the Southern Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Mann) is assigned to manage the Wedge Canyon, Robert, Trapper Creek Complex, Ross Creek and the Little Salmon Creek Complex on the Flathead National Forest and Glacier National Park.

ROBERT, Flathead National Forest. A unified command between a Type 1 Incident Management Team (Stam) and Flathead County is in place. This fire is in timber, 8 miles north of Columbia Falls, MT. The fire was under a heavy smoke inversion until 1500 hours today. Crews conducted successful burn out operation on the west side of the fire and the containment line on the east side was improved. The fire remains a major threat to communities along the North and Middle Fork drainages of the Flathead River and the communities within Glacier National Park. Evacuations have been implemented in West Glacier and Blankenship Road areas. Structure protection is in place for 200 residences and 24 commercial properties.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is in sub-alpine fir with down fuel, 20 miles east of Eureka, MT. Conditions for extreme fire behavior are in place with very dry fuels and hot, dry weather. Active ground fire with torching, short duration runs and spotting was observed. Crews are making good progress on the southwest side of the fire. Evacuations remain in effect from Moose Creek to the Canadian border. Evacuated residents are being informed daily on the fire's status through community meetings held each morning and evening. Structure protection is in place for 100 residences.

TRAPPER CREEK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Raley) is assigned. This complex, comprised of Trapper Creek, Wolf Gun and Paul Bunyan fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. The Paul Bunyan fire was contained. The major road through Glacier National Park (Going to the Sun Highway) has been closed and the Many Glacier developed area of the park has been evacuated and closed to public use. There is a potential for the fire to spread across the U.S./Canadian border and also into the Blackfoot Indian Reservation, if the fire continues north and east across the Continental Divide. The Trapper Creek fire is moving to the east and the Wolf Gun fire is moving to the north. Fire managers and the Canadian Park Service are developing cooperative suppression and contingency plans. Smoke continues to impact Glacier National Park, Waterton Lakes National Park, B.C. and Lethbridge, B.C., Canada. Ground fires with torching and spotting were observed. Helicopter drops slowed fire spread and prevented fire runs from developing. Structure protection is in place for three commercial properties.

ROSS CREEK, Kootenai National Forest. A Type 2 Incident Management Team (Sandman) is assigned. This fire is in sub-alpine fir with tall brush and heavy down fuel loads, 20 miles southwest of Troy, MT. Creeping fire behavior with intermittent single tree torching was observed. Crews continue to build containment lines and mop up on all divisions. The Ross Creek Trail remains closed.

BLACK FROG COMPLEX, Bitterroot National Forest. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Blackwall and Frog Pond fires, is 34 miles south of Hamilton, MT and 32 miles north of Salmon, ID. Higher temperatures lower relative humidity and increased winds have resulted in increased fire behavior on both fires. Individual and group torching was common with increased fire activity in ground fuels. Crews continue to make excellent progress on the south, west and north flanks of the Frog Pond fire and on the north, west and east flanks of the Blackwall fire. Structure protection is in place for 75 residences and one commercial property. Evacuations from Moose Meadows remain in place. Highway 93 is open to piloted public vehicles from 0600 to 2100. Highway 43 is open from Lost Trail Pass, east.

SLIMS, Nez Perce National Forest. A transfer of command from Benes' Type 2 Incident Management Team to Mortier's Type 1 Incident Management Team will take place today. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. The main influence on fire spread has been up slope/up canyon winds which continue to push the fire south and east. The fire continues to spread through heavy surface fuels with several major runs and group torching yesterday afternoon.

HUNT CREEK FIRE, Priest Lake Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in heavy, cured logging slash, eight miles northwest of Coolin, ID. Active ground fire with single and group torching was observed. Fire activity was fuel and terrain driven.

TOBOGGAN, Idaho Panhandle National Forest. A Type 2 Incident Management Team (Gray) has been ordered. This fire is 12 miles northeast of Wallace, ID. Extreme fire behavior with several major crown runs and spotting was observed.

HIDDEN LAKE, Beaverhead/Deerlodge National Forest. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is in sub-alpine fire, four miles northeast of Polaris, MT. The eastern front of the fire was active with increased torching which developed a column that rose to 10,000 feet Above Ground Level (AGL).

BIG CREEK, Bitterroot National Forest. This fire is in timber, four miles northwest of Victor, MT. Minimal fire behavior with a small amount of torching in the interior was observed.

SHASTA, Nez Perce National Forest. A Fire Use Management Team (Bonefeld) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is in Douglas fir, ponderosa pine, and brush, 50 miles northeast of Grangeville, ID. Active ground fire with isolated torching was observed by aerial reconnaissance.

PDS = Ponderosa Area Office Idaho Department of Lands

EASTERN GREAT BASIN AREA LARGE FIRES:

An Area Command Team (Ribar) is assigned to manage the Cramer and Crystal Creek fires on the Salmon-Challis National Forest.

CENTERVILLE FIRE, Northwest State, Utah State Division of Forestry Fire & State Lands. Type 2 Incident Management Team (Broyles) has been ordered. A This fire is in very heavy scrub oak, grass, sub-alpine fir and bug kill timber, at the north end of the city of Centerville, UT. Creeping fire with short runs, crowning and spotting was observed. Structure protection is in place for 100 residences.

HOT CREEK, Boise National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire is in mixed conifer with heavy fuel loading, three miles west of Atlanta, ID. Occasional torching and short uphill runs were observed. Crews and aerial resources successfully completed two burn out operations today. Evacuations of isolated summer cabins and campers remain in effect. Structure protection is in place for 80 residences and ten commercial properties.

CRAMER, Salmon-Challis National Forest. A Type 1 Incident Management Team (Martin) is assigned. This fire is in timber, 20 miles west of North Fork, ID. Minimal fire behavior with some visible smokes was observed. Structure protection is in place for 38 residences.

OXKILLER, Caribou-Targhee National Forest. This fire is in grass, sage and juniper, three miles east of Franklin, ID. Creeping fire behavior was observed. Crews made good progress securing containment lines. Minimal Impact Suppression Techniques (MIST) were used in the wilderness.

JOE HATCH, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is 25 miles north of Green River, UT. Down slope creeping with isolated torching was observed in Douglas fir and mountain brush. The fire is in extremely rugged and inaccessible terrain.

CRYSTAL CREEK, Salmon-Challis National Forest. This fire is in sub-alpine fir, brush and grass, 18 miles north/northwest of Stanley, ID. Smoldering was observed.

BLACK ROCK, Salt Lake Field Office, Bureau of Land Management. This fire is in pinyon pine, juniper, Douglas fir and sage, 30 miles west of Spanish Fork, UT. Moderate fire behavior with isolated torching was observed.

BULLDOG, Richfield Field Office, Bureau of Land Management. This fire is in oak, mountain mahogany, juniper and pinyon pine, 17 miles north of Ticaboo, UT. No new information was received.

ROCKY MOUNTAIN AREA LARGE FIRES:

LANGLAS DRAW, White River National Forest. This fire is in fir, ponderosa pine, aspen and oak brush, 25 miles southeast of Meeker, CO. Active ground fire with short runs and isolated torching were observed. Structure protection is in place for 15 residences.

RED ROCK, White River Field Office, Bureau of Land Management. This fire is 30 miles south of Rangely, CO. Minimal fire behavior was observed in juniper and pinyon pine.

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. This fire is in ponderosa pine, pinyon pine and juniper, 20 miles southwest of Buffalo, WY. Active fire was observed in the Robinson Creek rim and Poison Creek areas.

DITCH CREEK, Bighorn National Forest. A Type 2 Incident Management Team (Blume) is assigned. This fire is in lodgepole pine, spruce and fir, five miles southwest of Story, WY. Higher temperatures and lower relative humidity increased active fire in heavier fuels with isolated torching and spotting.

BALCONY HOUSE COMPLEX, Mesa Verde National Park. This complex, comprised of Moccasin, White, Balcony and Park fires, is in pinyon pine, juniper, ponderosa pine, Douglas fir, grass and brush, 10 miles southeast of Cortez, CO. Minimal fire behavior was observed; ground fuels are continuing to burn.

DEEP LAKE, Shoshone National Forest. This fire is in mixed conifer and grass, 30 miles northwest of Cody, WY. No new information was received. This will be the last report unless new information is received.

BKF = Black Hills National Forest

NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Anderson) and a Washington Interagency Incident Management Team (Furlong/Gormley) are assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires; the Fawn Peak and Sweetgrass fires have been controlled. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Many unburned areas within the fire perimeter are now burning. Torching, crowning, spotting and upslope runs were observed. A portable retardant dip site has been established in Canada to support helicopter operations.

KELSAY COMPLEX, Umpqua National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This complex, comprised of the Kelsay, Bear Creek and 230 fires, is in hemlock, lodgepole pine and huckleberry brush with heavy dead and down fuels, 47 miles northeast of Roseburg, OR. The Bear Creek and 230 fires are contained. A morning inversion lifted and fire activity increased to an extreme level, hampering containment. Extreme fire behavior with torching, spotting and moderate crown runs was observed on the Kelsay fire.

CLARK, Willamette National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is in understory and timber with dead and down fuels, ten miles northeast of Lowell, OR. Creeping fire with torching of unburned islands near the containment lines was observed.

FROG HOLLOW, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is in heavy timber and ground fuels, eight miles east of Mitchell, OR. Minimal fire activity with occasional flare-ups was observed.

MANASTASH, Spokane District, Bureau of Land Management. This fire is in short grass, seven miles south of Ellensburg, WA. Smoldering fire behavior was observed.

HATTEN ROAD, Spokane District, Bureau of Land Management. A Washington Interagency Incident Management Team (Berndt/Andring) is assigned. This fire is in grassland, 60 miles west of Spokane, WA. Wind-driven grass fire was observed. Structure protection is in place for three residences.

CECIL BULGER/SLASHER, Burns District, Bureau of Land Management. This fire is in logging slash and juniper, 17 miles northwest of Riley, OR.

SOUTHWEST AREA LARGE FIRES:

GRANITE, Gila National Forest. This fire is in mixed conifer, ponderosa pine, grass and oak, 13 miles northwest of Hillsboro, NM. Fire activity was minimal due to high humidity.

BLUE RIVER COMPLEX, Apache-Sitgreaves National Forest. This complex, comprised of the Steeple, Largo and Thomas fires, is in ponderosa pine, mixed conifer, pinyon pine, brush and grass, 18 miles south of Alpine, AZ. The Largo fire is contained. No new information was reported.

TURNBO, Gila National Forest. This fire is in mixed conifer with continuous pine stringers, 37 miles northwest of Silver City, NM, and is being managed with a confinement/suppression strategy. No new information was reported.

KINISHBA, Fort Apache Agency, Bureau of Indian Affairs. This fire is in ponderosa pine, woodlands and chaparral, two miles west of Whiteriver, AZ. No new information was reported.

SPRUCE COMPLEX, Gila National Forest. This complex, composed of the Spruce, Silver, Nabours, Parallel, Sacaton, Rain, and House fires are in brush, ponderosa pine and mixed conifer, 18 to 20 miles east, southeast and northeast of Glenwood, NM. No new information was reported.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

CHINA, Sequoia National Forest. This fire is in grass, brush and oak woodland, 11 miles southwest of Lake Isabella, CA. Minimal fire activity due to increased humidity and precipitation from a passing thunderstorm was observed.

MOUNTAIN COMPLEX, Stanislaus National Forest. This lightning caused Wildland Fire Use fire is being managed to accomplish resource objectives; it is burning in brush and red fir 20 miles northwest of Twain Harte, CA.

AHR = Anahuac National Wildlife Refuge

OUTLOOK:

Weather Discussion: High pressure will begin to migrate southeastward from Nevada toward the four-corners states today, while moisture spreads from California into southern Oregon. The moisture will possibly produce isolated dry thunderstorms in the southern Oregon mountains during the afternoon. Windy conditions are also expected over central Oregon, northern Washington and western parts of Montana. Monsoon moisture continues to flow through California, Arizona, northern New Mexico and Colorado, where mainly wet thunderstorms are expected. The northern Great Basin will see hot and dry conditions, while southeast Oklahoma experiences dry weather until Saturday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Partly cloudy and warm Idaho, Bridger-Teton and northern Utah with isolated thunderstorms over the mountains. Mostly cloudy southern Utah with scattered showers and thunderstorms.	Idaho, Bridger-Teton: 76 to 93 mountains, 90 to 104 valleys. Utah and Arizona Strip: 76 to 92 higher elevations, 90 to 101 valleys.	Idaho, Bridger-Teton: 9 to 23% mountains, 7 to 19% valleys. Utah, Arizona Strip: 19 to 28% mountains, 11 to 24% valleys.	Upslope or west/southwest 5 to 15 mph in Idaho and Bridger-Teton, Upslope 5 to 10 mph in northern Utah, southwest 10 to 15 mph in southern Utah. Gusty near storms.
NORTHERN CALIFORNIA AREA Partly to mostly cloudy with scattered showers and thunderstorms developing.	60s and 70s near the coast, and 80s to 102 inland.	17 to 35%	Variable under 12 mph, with local gusts southeast to southwest 14 to 18 mph in the afternoon. Short-lived erratic wind gusts of 25 to 35 mph near thunderstorms.
NORTHERN ROCKIES AREA Mostly Sunny. Isolated thunderstorms southern, southwest and south-central Montana.	West of the Divide: 90 to 105. East of the Divide: 85 to 95.	West of the Divide: 5 to 15%. East of the Divide: 10 to 20%, 15 to 25% central and eastern Montana.	West of the Divide: west 5 to 15. East of the Divide: southeast to southwest 5 to 5 mph, 15 to 25 mph southwest Montana, east to northeast 5 to 5 mph central and eastern Montana.
NORTHWEST AREA Sunny. Possible afternoon and evening thunderstorms across extreme southern Oregon.	Mostly 80s and 90s locally into the low 100s east of the Cascades and in southwest Oregon.	Generally 5 to 15% east of the Cascades. Mostly 20 to 30% Westside except locally down to 15% southwest Oregon.	A little breezy in central Washington and north central Oregon west to northwest 8 to 16 mph with gusts to 25. Elsewhere west to northwest 5 to 10 mph.
ROCKY MOUNTAIN AREA Becoming partly cloudy. Isolated thunderstorms. Warmer.	Upper 80s to mid 90s lower elevations, 75 to 85 in the mountains.	5 to 15% western slope of Colorado, and Wyoming. 15 to 25% elsewhere.	West to northwest winds 10 to 20 mph over Wyoming and portions of South Dakota. Variable 5 to 15 mph elsewhere.
SOUTHERN CALIFORNIA AREA Partly to mostly cloudy with scattered showers and thunderstorms.	70 to 80 coastal areas. 75 to 90 mountains. 80 to 100 valleys. 85 to 100 upper desert. 95 to 110 low desert.	25 to 40% deserts. 30 to 45% mountains. 30 to 45% valleys.	Southeast to southwest 5 to 15 mph.

SOUTHWEST AREA Partly cloudy. Widely scattered thunderstorms, most numerous Arizona and mountains.	70s and 80s mountains, 90s to near 105 lower elevations.	20 to 30%, except 10 to 20% parts of central and southern New Mexico.	Variable to upslope 5 to 15 mph, except southeast 10 to 20 mph across southwest Texas.
WESTERN GREAT BASIN AREA Partly to mostly cloudy and cooler with isolated to scattered mostly wet thunderstorms across the state.	Mid 80s to upper 90s in low elevations, mid 70s to mid 80s mountains.	12 to 25% at lower elevations, 15 to 30% in upper elevations, 25 to 40% Sierra Nevada.	South to west 5 to 15 mph.
