

**INCIDENT MANAGEMENT SITUATION REPORT**  
**FRIDAY AUGUST 1, 2003 - 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Eastern Great Basin, Rocky Mountain, Southern California, Southwest and Western Great Basin Areas and light elsewhere. Nationally, 306 new fires were reported. Three new large fires were reported, one each in the Northern Rockies, Northern California and Eastern Great Basin Areas. Thirteen large fires were contained, one each in the Northern Rockies, Northern California, and Southwest Areas, two each in the Rocky Mountain, Northwest and Southern Areas, and four in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

**NORTHERN ROCKIES AREA LARGE FIRES:**

An Area Command Team (Mann) is assigned to manage the Wedge Canyon, Robert, Trapper Creek Complex and Ross Creek fires on the Flathead and Kootenai National Forests, and the Glacier National Park.

ROBERT, Flathead National Forest. A unified command between a Type 1 Incident Management Team (Stam) and Flathead County is in place. This fire is in timber, 8 miles north of Columbia Falls, MT. The inversion lifted by noon in most areas and fire activity rapidly increased. Crews continued burn out operations on the east and west flanks. The fire remains a major threat to communities along the North and Middle Fork drainages of the Flathead River and the communities within Glacier National Park. Evacuations have been implemented in West Glacier, Lake Five and Glacier National Park Headquarters. Structure protection is in place for 200 residences and 24 commercial properties.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is in sub-alpine fir with down fuel, 20 miles east of Eureka, MT. Conditions for extreme fire behavior are in place with very dry fuels and hot, dry weather. Active ground fire with short duration runs and individual and group torching was observed. Crews are constructing fireline in an effort to hold the fire south of Trail Creek. The Canadians have completed a ten mile dozer line/fuel break 100 feet north of the international border. Evacuations remain in effect from Moose Creek to the Canadian border. Evacuated residents are being informed daily on the fire's status through community meetings held each morning and evening. Structure protection is in place for 100 residences. One additional residence has been confirmed lost.

TRAPPER CREEK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Raley) is assigned. This complex, comprised of Trapper Creek, Wolf Gun and Paul Bunyan fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. The major road through Glacier National Park (Going to the Sun Highway) has been closed. There is a potential for the fire to spread across the U.S./Canadian border and also into the Blackfeet Indian Reservation, if the fire continues north and east across the Continental Divide. The Trapper Creek fire is moving to the east and the Wolf Gun fire is moving to the north. Fire managers and the Canadian Park Service are developing cooperative suppression and contingency plans. Smoke continues to impact Glacier National Park, Waterton Lakes National Park, Alberta and Lethbridge, Alberta, Canada. Ground fires with torching, spotting and short interior crowning runs were observed. Crews temporarily disengaged from suppression activities on the south flank due to torching reburns near the line and resulting spot fires. Fireline construction was hampered due to spotting, incomplete burning along the fire perimeter and difficult terrain. Structure protection is in place for three commercial properties.

ROSS CREEK, Kootenai National Forest. A Type 2 Incident Management Team (Sandman) is assigned. This fire is in sub-alpine fir with tall brush and heavy down fuel loads, 20 miles southwest of Troy, MT. Creeping with interior torching was observed. Crews continue to build containment lines and mop up on all divisions. The Ross Creek Trail remains closed.

HUNT CREEK FIRE, Priest Lake Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in heavy, cured logging slash, eight miles northwest of Coolin, ID. Active ground fire with isolated single tree torching and flame lengths from two to six feet was observed.

TOBOGGAN, Idaho Panhandle National Forest. A Type 2 Incident Management Team (Gray) is assigned. This fire is 12 miles northeast of Wallace, ID. Torching and short range spotting were observed.

SLIMS, Nez Perce National Forest. A Type 1 Incident Management Team (Mortier) is assigned. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. Individual and group torching along with short crown runs on the east and south flanks were observed. Winds from the north and northeast are pushing the column across Meadow Creek along the southwest flank of the fire.

BLACK FROG COMPLEX, Bitterroot National Forest. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Blackwall and Frog Pond fires, is 34 miles south of Hamilton, MT. and 32 miles north of Salmon, ID. High temperatures, lower relative humidity and increased winds have resulted in increased fire behavior on both fires. Individual and group torching was common resulting in short range spotting and increased fire activity in ground fuels. Crews continue to make excellent progress on the south, west and north flanks of the Frog Pond fire and on the north, west and east flanks of the Blackwall fire. Structure protection is in place for 87 residences and nine commercial properties. Evacuations from Moose Meadows remain in place. Highway 93 is open to piloted public vehicles from 0600 to 2100. Highway 43 is open from Lost Trail Pass, east.

HIDDEN LAKE, Beaverhead/Deerlodge National Forest. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is in sub-alpine fire, four miles northeast of Polaris, MT. The eastern front of the fire was active with individual and group torching.

BIG CREEK, Bitterroot National Forest. This fire is in timber, four miles northwest of Victor, MT. Occasional interior burning was observed.

### **EASTERN GREAT BASIN AREA LARGE FIRES:**

An Area Command Team (Ribar) is assigned to manage the Cramer and Crystal Creek fires on the Salmon-Challis National Forest.

NORTH FORK LICK, Payette National Forest. A Type 2 Incident Management Team (Brunner) will assume command on 8/1 at 1800. This fire is in sub-alpine fir with dead and down fuels, 18 miles northeast of McCall, ID. Extreme fire behavior with group torching, spotting and running was observed. Personnel disengaged from suppression activities yesterday due to safety concerns.

CENTERVILLE FIRE, Northwest State, Utah State Division of Forestry Fire & State Lands. Type 2 Incident Management Team (Broyles) is assigned. This fire is in very heavy scrub oak, grass, sub-alpine fir and bug kill timber, at the north end of Centerville, UT. Creeping fire with short runs on south facing slopes was observed. Structure protection is in place for 100 residences.

HOT CREEK, Boise National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire is in mixed conifer with heavy fuel loading, three miles west of Atlanta, ID. Running, torching, crowning and spotting were observed. Evacuations of isolated summer cabins and campers remain in effect. Structure protection is in place for 80 residences and ten commercial properties.

JOE HATCH, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is in Douglas fir and mountain brush, 25 miles north of Green River, UT. Down slope creeping into the left fork of Big Canyon was observed. The fire is in extremely rugged and inaccessible terrain.

CRYSTAL CREEK, Salmon-Challis National Forest. This fire is in sub-alpine fir, brush and grass, 18 miles north/northwest of Stanley, ID. Minimal fire behavior was observed.

### NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Anderson) and a Washington Interagency Incident Management Team (Furlong/Gormley) are assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Many unburned areas within the fire perimeter are now burning. The fire is actively burning with multiple tree torching on the west side of the Chewuch drainage and in Andrews Pass.

KELSAY COMPLEX, Umpqua National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This complex, comprised of the Kelsay, Bear Creek and 230 fires, is in hemlock, lodgepole pine and huckleberry brush with heavy dead and down fuels, 47 miles northeast of Roseburg, OR. Active fire behavior with isolated torching and spotting was observed on the Kelsay fire.

CLARK, Willamette National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is in understory and timber with dead and down fuels, ten miles northeast of Lowell, OR. Creeping fire with individual torching was observed.

FROG HOLLOW, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is in heavy timber and ground fuels, eight miles east of Mitchell, OR. Minimal fire activity with occasional flare-ups in the unburned interior was observed.

CECIL BULGER/SLASHER, Burns District, Bureau of Land Management. This fire is in logging slash and juniper, 17 miles northwest of Riley, OR. No new information was received.

## ROCKY MOUNTAIN AREA LARGE FIRES:

LANGLAS DRAW, White River National Forest. This fire is in fir, ponderosa pine, aspen and oak brush, 25 miles southeast of Meeker, CO. Active ground fire with isolated torching and short crown runs was observed. Structure protection is in place for 15 residences.

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. This fire is in ponderosa pine, pinyon pine and juniper, 20 miles southwest of Buffalo, WY. Hot spots were active in the Poison Creek area.

BALCONY HOUSE COMPLEX, Mesa Verde National Park. This complex, comprised of Moccasin, White, Balcony and Park fires, is in pinyon pine, juniper, ponderosa pine, Douglas fir, grass and brush, 10 miles southeast of Cortez, CO. Minimal fire behavior was observed; ground fuels are continuing to burn. Fires within the complex are being monitored and action taken as needed.

## SOUTHWEST AREA LARGE FIRES:

GRANITE, Gila National Forest. This fire is in mixed conifer, ponderosa pine, grass and oak, 13 miles northwest of Hillsboro, NM. No new information was received.

BLUE RIVER COMPLEX, Apache-Sitgreaves National Forest. This complex, comprised of the Steeple, Largo and Thomas fires, is in ponderosa pine, mixed conifer, pinyon pine, brush and grass, 18 miles south of Alpine, AZ. Heavy thunder cell activity over the fire area was observed.

TURNBO, Gila National Forest. This fire is in mixed conifer with continuous pine stringers, 37 miles northwest of Silver City, NM, and is being managed with a confinement/suppression strategy. No new information was reported. This will be the last report unless new information is received.

SPRUCE COMPLEX, Gila National Forest. This complex, composed of the Spruce, Silver, Nabours, Parallel, Sacaton, Rain, and House fires are in brush, ponderosa pine and mixed conifer, 18 to 20 miles east, southeast and northeast of Glenwood, NM.

## NORTHERN CALIFORNIA AREA LARGE FIRES:

BIG VALLEY COMPLEX, Modoc National Forest. A Type 2 Incident Management Team (Szczepanik) is assigned. This complex consists of 18 known fires in the vicinity of Adin, CA. Lightning storms passed throughout the forest and adjacent Bureau of Land Management unit. Lightning is forecasted for the next three days. Scattered precipitation with heavy rain in some areas was observed.

EAST BAY COMPLEX, Santa Clara Unit, California Department of Forestry & Fire Protection. This complex, comprised of five fires is in oak woodland, eight miles southwest of Tracy, CA.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

MDF = Modoc National Forest

## SOUTHERN CALIFORNIA AREA LARGE FIRES:

CHINA, Sequoia National Forest. A transfer of command from McCormick's Type 2 Incident Management Team to a Type 3 organization will take place today. This fire is in grass, brush and oak woodland, 11 miles southwest of Lake Isabella, CA. Minimal fire was observed. Reduction in acreage is due to more accurate mapping.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

UNIT 1	TX	MCR	600	100	---	2	0	1	0	0	NR

TXS = Texas Forest Service

MCR = McFaddin National Wildlife Refuge

## OUTLOOK:

**Red Flag Warnings:** For dry lightning until Friday morning in the Sacramento Valley and western foothills from Yuba City south, the East Bay area, the southern Mendocino National Forest, and Napa, Sonoma, and Marin Counties.

**Weather Discussion:** High pressure will be located in northern New Mexico today, while moisture spreads from California slightly over the border into southern Oregon. The moisture may produce isolated dry thunderstorms over the extreme southern Oregon mountains during the afternoon. Windy conditions and low relative humidity are also expected over central Oregon, northern Washington and western parts of Montana. Some record high temperature readings are also possible in western Montana. Monsoon moisture continues to flow through California, Arizona, northern New Mexico and Colorado, where mainly wet thunderstorms are expected. The Great Basin will see an increase in thunderstorm activity today, while southeast Oklahoma experiences dry weather until Saturday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>NORTHERN CALIFORNIA AREA</b> Coastal low clouds and fog. Otherwise, partly to mostly cloudy with scattered showers and thunderstorms south of a line from Alturas to Clear Lake. Dry lightning is possible until early Friday.	60s and 70s near the coast, and 80s to near 95 inland.	17 to 35%	Variable under 12 mph, with local gusts southeast to southwest 14 to 18 mph in the afternoon. Short-lived erratic wind gusts of 25 to 35 mph near thunderstorms.
<b>NORTHERN ROCKIES AREA</b> Mostly Sunny and hot	Idaho: 90 to 105 Montana: 85 to 95 North Dakota: 75 to 85	Idaho: 13 to 21% Montana: West of the Divide 8 to 18%. East of the Divide 15 to 30%. North Dakota: 25 to 40%	Idaho and Montana, west of the Divide, west 5-15 mph North Dakota and Montana, east of the Divide, east 5 to 15 mph.
<b>NORTHWEST AREA</b> Sunny. Scattered afternoon and evening thunderstorms in southeast and south central Oregon.	Mostly 90s east of the Cascades and 80s and 90s westside except into the 70s in northwest Washington.	Generally 8 to 18% east of the Cascades. Westside, 20 to 35% except above 40% in northwest Washington.	A little breezy in central Washington and north central Oregon, west to northwest 8 to 16 mph with gusts to 25. Elsewhere west to northwest 5 to 10 mph.
<b>ROCKY MOUNTAIN AREA</b> Becoming partly cloudy. Scattered thunderstorms over Colorado, isolated elsewhere. A few storms could be dry over northwest Colorado and southwest Wyoming.	85 to 95 lower elevations, 75 to 85 in the mountains.	12 to 18% western slope of Colorado and southwest Wyoming. 20 to 30% elsewhere.	Variable 5 to 15 mph.
<b>SOUTHERN CALIFORNIA AREA</b> A few thundershowers over the Sierra, Inyo, and the southern California mountains east of Cajon pass. Morning coastal fog. Otherwise sunny.	70 to 80 coastal areas. 75 to 90 mountains. 80 to 100 valleys. 85 to 100 upper desert. 95 to 110 low desert.	25 to 40% deserts. 30 to 45% mountains. 30 to 45% valleys.	Southeast to southwest 5 to 15 mph.
<b>SOUTHWEST AREA</b> Partly cloudy. Widely scattered thunderstorms, most numerous central Arizona, northern New Mexico and mountains.	70s and 80s mountains, 90s to near 105 lower elevations.	20 to 30%, except 10 to 20% parts of south central New Mexico, southern New Mexico, and western Arizona.	Variable to upslope 5 to 15 mph, except east to southeast 10 to 20 mph across western Texas and southern New Mexico.

<b>WESTERN GREAT BASIN</b> Partly to mostly cloudy and cooler with isolated to scattered mostly wet thunderstorms across the state.	Mid 80s to upper 90s in low elevations, mid 70s to mid 80s mountains.	15 to 30% at lower elevations, 15 to 30% in upper elevations, 25 to 40% Sierra Nevadas.	South to southeast 5 to 15 mph.
--	---	---	---------------------------------

### UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- Can you ask questions of local experts? What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors.
- To reduce risks:
  - Base all actions on current and expected fire behavior.
  - Post lookouts.
  - Establish escape routes and safety zones.
  - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—Southeast or Alaska).
