

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY AUGUST 6, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was heavy in the Northwest, moderate in Eastern Great Basin and light elsewhere. Nationally, 274 new fires were reported. Two new large fires were reported, one each in the Rocky Mountain and Southern Areas. Five large fires were contained, one each in the Southern California and Southern Areas and three in the Northern Rockies Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Mann) is assigned to manage the Wedge Canyon, Robert, Trapper Creek Complex, Little Salmon Creek Complex (WFU) and Ross Creek fires on the Flathead and Kootenai National Forests, and the Glacier National Park.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is in sub-alpine fir with down fuels, 20 miles east of Eureka, MT. Creeping was observed. Crews are beginning to mop up on the east of the Flathead River in Glacier National Park. Structure protection is in place for 100 residences.

ROBERT, Flathead National Forest. A transfer of command from Stam's Type 1 Incident Management Team to Ferguson's Type 1 Incident Management Team will occur today. This fire will remain under a unified command between Ferguson's Type 1 Incident Management Team and Flathead County. This fire is in timber, 8 miles north of Columbia Falls, MT. Ground fire with occasional torching was visible along the perimeter. Crews are making good progress securing containment lines on the west flank. Structure protection is in place for six commercial properties. Reduction in acreage is due to more accurate mapping.

TRAPPER CREEK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Raley) is assigned. This complex, comprised of Trapper Creek, Wolf Gun and Paul Bunyan fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. Both the Trapper Creek and the Wolf Gun fires are burning through old burns. Slow burning surface fire due to light rain over the last two days was observed. Crews made good progress constructing fireline on the south flank of the Trapper Creek fire. The major road through Glacier National Park (Going to the Sun Highway from West Glacier Gate to Logan Pass) will be opened on a controlled basis between the hours of 1000 and 1800. Smoke continues to impact Glacier National Park, Waterton Lakes National Park, and Lethbridge, Alberta, Canada. Structure protection is in place for three commercial properties.

SLIMS, Nez Perce National Forest. A Type 1 Incident Management Team (Mortier) is assigned. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. Minimal fire behavior due to rain was observed. Crews are constructing direct line from the south and indirect line from Green Ridge east toward Meadow Creek drainage. Aerial resources held the fire east of Meadow Creek and west of Copper Ridge in support of future direct line construction.

BLACK FROG COMPLEX, Bitterroot National Forest. Plans are being made for a transfer of command from Frye's Type 1 Incident Management Team to Type 3 organizations on both the Blackwall and Frog Pond fires. This complex, comprised of the Blackwall and Frog Pond fires, is in lodgepole pine and mixed conifer with dead and down fuels, 34 miles south of Hamilton, MT. Minimal fire behavior was observed. Highways 93 and 43 are open.

BIG CREEK, Bitterroot National Forest. This fire is in timber, four miles northwest of Victor, MT. Minimal fire behavior with occasional torching was observed.

SOS = Southern Land Office, Montana Department of Natural Resources and Conservation

IPF = Idaho Panhandle National Forest

EASTERN GREAT BASIN AREA LARGE FIRES:

HOT CREEK, Boise National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire is in mixed conifer with heavy fuel loading, three miles west of Atlanta, ID. Minimal fire behavior was observed due to lower temperatures and higher humidity. Evacuations of isolated summer cabins and campers remain in effect. Structure protection is in place for 80 residences and ten commercial properties. The Middle Fork Boise River Road remains closed due to mudslides. James Creek Road is currently the only road access into Atlanta and is closed to all but essential fire traffic.

NORTH FORK LICK, Payette National Forest. A Type 2 Incident Management Team (Brunner) is assigned. This fire is comprised of the Grimmet and North Fork Lick fires. These fires are in sub-alpine fir with dead and down fuels, 18 miles northeast of McCall, ID. Fires are being managed in a confine/contain strategy. Torching and spotting were observed.

LOST PACKER COMPLEX, Salmon-Challis National Forest. This complex, comprised of the Waugh, Upper West Horse and Horse fires, is 36 miles northwest of Salmon, ID. Minimal fire behavior with single and group tree torching was observed in sub-alpine fir, mixed conifer and grass. Fires are in monitor status.

NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Management Team (Lohrey) is assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Slow backing fire with flame lengths of two to three feet was observed.

FAWN PEAK COMPLEX	WA	OWF	77,039	60	UNK	1,008	24	18	12	0	32M

ROCKY MOUNTAIN AREA LARGE FIRES:

LANE GULCH, Grand Junction Field Office, Bureau of Land Management. This fire is in pinyon pine and juniper, 12 miles north of Grand Junction, CO. Extreme fire behavior with running and torching was observed.

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. This fire is in ponderosa pine, pinyon pine and juniper, 20 miles southwest of Buffalo, WY. Minimal fire behavior was observed. Structure protection is in place for 6 residences.

NORTHERN CALIFORNIA AREA LARGE FIRES:

HOOVER, Santa Clara Unit, California Department of Forestry & Fire Protection. This fire is in Coe State Park, 15 miles east of Morgan Hill, CA. Minimal fire behavior with individual torching was observed in grass, brush and oak woodland.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
HOOVER	CA	SCU	168	50	8/6	241	9	12	5	0	NR

SOUTHWEST AREA LARGE FIRES:

BLUE RIVER COMPLEX, Apache-Sitgreaves National Forest. This complex, comprised of the Steeple, Largo and Thomas fires, is in ponderosa pine, mixed conifer, pinyon pine, brush and grass, 18 miles south of Alpine, AZ. Gusty winds and lightning from thunder cells remain a concern over the fire.

OUTLOOK:

Red Flag Warning: Parts of eastern and central Nevada for strong winds, low relative humidity and very high fire danger.

Weather Discussion: The combination of low pressure off the coast and a high pressure ridge axis along the Rockies is producing a dry southwest flow over much of the West. However, showers and thunderstorms are on tap for the Northern Rockies as a disturbance tracks through the region. There is also some limited moisture over New Mexico, Colorado and Wyoming.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Breezy with isolated thunderstorms in central Idaho mountains and eastern Utah mountains. Otherwise, generally warming and drying.	Idaho, Bridger-Teton: 63 to 84 mountains, 80 to 91 valleys. Utah and Arizona Strip: 74 to 92 higher elevations, 92 to 102 valleys.	Idaho, Bridger-Teton: 14 to 26% mountains, 10 to 20% valleys. Utah, Arizona Strip: 17 to 24% mountains, 7 to 20% valleys.	Southwest 10 to 25 mph over western Utah, Snake River Plain, and ridgelines. Upslope or southwest 5 to 15 mph elsewhere.
NORTHERN CALIFORNIA AREA Areas of fog and low clouds along the coast. Otherwise fair, becoming partly cloudy over northern inland areas, with a chance of at least isolated afternoon showers or thunderstorms.	60s to mid 70s near the coast and in the mountains. Upper 70s to upper 80s inland.	21 to 30% in the driest inland areas.	Mainly south southwest to west 5 to 15 mph, with gusts 22 to 30 mph over exposed higher terrain and in northeast California.
NORTHERN ROCKIES AREA Partly cloudy, showers and thunderstorms developing.	West of the Divide: 75 to 90 East of the Divide: 85 to 100	West of the Divide: 20 to 30% East of the Divide: 15 to 25%	West of the Divide: variable 5 to 10 mph East of the Divide: southeast to east 10 to 20 mph higher gusts eastern Montana.
NORTHWEST AREA Partly to mostly cloudy with scattered thunderstorms.	Highs mid 60s coast. In the 70s and 80s elsewhere.	40 to 60% western sections, 25 to 35% east. Some mid teens southeast Oregon.	Generally less than 15 mph.
ROCKY MOUNTAIN AREA Isolated thunderstorms over Colorado mountains, northern Wyoming, Black Hills, Front Range and the plains.	Highs in the 85 to upper 90s over most of the Rocky Mountain Area. High elevation 75 to 85.	10 to 15% lower elevations of western slope of Colorado and most of Wyoming. 20 to 40% elsewhere.	Southeast wind 15 to 30 mph over South Dakota and northeast Wyoming. Southwest wind 10 to 20 mph over western Colorado and western Wyoming. On the plains southeast wind 10 to 20mph.
SOUTHERN CALIFORNIA AREA Morning coastal fog. Otherwise sunny.	65 to 80 coastal areas. 75 to 90 mountains. 85 to 95 valleys. 90s upper desert. 95 to 110 low desert.	8 to 20% mountains and deserts. 15 to 30% valleys. 40 to 50% coast.	Southwest 10 to 20 mph.

SOUTHWEST AREA Partly cloudy. Widely scattered thunderstorms, most numerous southeastern Arizona, western New Mexico and northern New Mexico.	80s and 90s mountains, mid 90s to near 105 lower elevations.	15 to 20% Arizona, 20 to 30% New Mexico, 15 to 20% parts of eastern New Mexico, western Texas.	Variable to upslope 5 to 15 mph, except east to southeast 10 to 20 mph across southwestern Texas and south 5 to 15 across northern New Mexico.
WESTERN GREAT BASIN AREA Mostly sunny with a breezy to windy afternoon.	80s to 90s in the lower elevations, upper 60s to 70s in the upper elevations, 103 in the southern deserts.	3 to 18% at lower elevations, 10 to 25% in upper elevations, and 15 to 30% in the Sierras.	South to southwest 10 to 30 mph and gusting to 40 mph.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

Wildland Urban Interface Hazards

Firefighters in the wildland urban interface may encounter hazards other than the fire itself, such as hazardous materials, utility lines and poor access.

● Hazardous Materials

- Common chemicals used around the home may be a direct hazard to firefighters from flammability, explosion potential and/or vapors or off-gassing. Such chemicals include paint, varnish and other flammable liquids; fertilizer; pesticides; cleansers; aerosol cans, fireworks, batteries and ammunition. In addition, some common household products such as plastics may give off very toxic fumes when they burn. Stay OUT of the smoke from burning structures and any unknown sources such as trash piles.

● Illicit Activities

- Marijuana plantations or drug production labs may be found in wildland urban interface areas. Extremely hazardous materials such as propane tanks and flammable/toxic chemicals may be encountered, as well as booby traps.

● Propane tanks

- Both large (household size) and small (gas grill size) liquefied propane gas (LPG) tanks can present hazards to firefighters, including explosion. See the "LPG Tank Hazards" discussion for details.

● Utility lines

- Utility lines may be located above and below ground and may be cut or damaged by tools or equipment. Don't spray water on utility lines or boxes.

● Septic tanks and fields

- Below-ground structures may not be readily apparent and may not support the weight of engines or other apparatus.

● New construction materials

- Many new construction materials have comparatively low melting points and may "off-gas" extremely hazardous vapors. Plastic decking materials that resemble wood are becoming more common and may begin softening and losing structural strength at 180° F, though they normally do not sustain combustion once direct flame is removed. However, if they continue to burn they exhibit the characteristics of flammable liquids.

● Pets and livestock

- Pets and livestock may be left when residents evacuate and will likely be highly stressed, making them more inclined to bite and kick. Firefighters should not put themselves at risk to rescue pets or livestock.

● Evacuation occurring

- Firefighters may be taking structural protection actions while evacuations of residents are occurring. Be very cautious of people driving erratically. Distraught residents may refuse to leave their property, and firefighters may need to disengage from fighting fire to contact law enforcement officers for assistance. In most jurisdictions firefighters do not have the authority to force evacuations. Firefighters should not put themselves at risk trying to protect someone who will not evacuate!

● Limited access

- Narrow one-lane roads with no turn-around room, inadequate or poorly maintained bridges and culverts are frequently found in wildland urban interface areas. Access should be sized-up and an evacuation plan for all emergency personnel should be developed.
