

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY AUGUST 17, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was heavy in the Northwest Area, moderate in the Rocky Mountain Area and light elsewhere. Nationally, 268 new fires were reported. Two new large fires were reported, one each in the Northwest and Eastern Great Basin Areas. Four large fires were contained, three in the Northern California Area and one in the Southern Area. Very high to extreme fire indices were reported in Alaska, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming.

Hurricane Charley, Florida. A Presidential Disaster Declaration was issued on 8/13. A Type 1 Incident Management Team (Ferguson) is assigned to provide logistical and resource support. The team will work jointly with the GSA, FEMA, Florida State Emergency Response Team, Army Corp of Engineers, U.S. Air Force and state law enforcement agencies.

NORTHWEST AREA LARGE FIRES:

FISCHER, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Anderson) is assigned. This fire is four miles southeast of Leavenworth, WA in grass, brush and timber. Intermittent torching in heavy fuel was reported. Evacuation orders remain in effect for Williams, Jude, Upper Derby, Bjork and Eagle Canyon. An evacuation request has been issued for Estes, Olalla and lower Derby Canyon.

POT PEAK/SISI RIDGE COMPLEX, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Furlong/Gormley) is assigned. This complex, comprised of the Pot Peak, SiSi Ridge and Deep Harbor fires is 15 miles northwest of Chelan, WA in timber. Fire activity on all fires included torching, short range spotting and short crown runs. The voluntary evacuation request remains in effect for Domke Lake, Lucerne and Holden Village.

BYBEE COMPLEX, Crater Lake National Park. A Type 2 Incident Management Team (West) is assigned. This fire is 16 miles northeast of Prospect, OR in timber. Active ground fire and isolated torching were observed. Trail closures remain in effect.

DIRTY FACE PEAK, Okanogan-Wenatchee National Forest. A Type 2 Incident Management Team (Larsen) is assigned. This fire is 20 miles north-northwest of Leavenworth, WA in timber. Occasional torching was reported with minimal fire growth.

GRASSY, Fremont National Forest. A Type 2 Incident Management Team (Paul) is assigned. This fire is 20 miles northeast of Lakeview, OR in timber, brush and cheatgrass. Thunderstorms over the incident area resulted in moderate fire behavior. Reduction in acreage is due to more accurate mapping.

MEBEE PASS, Okanogan-Wenatchee National Forest. A transfer of command from a Washington State Interagency Management Team (Johnson) to a Fire Use Management Team (Cook) will occur at 1800 PDT. This fire is 30 miles northwest of Winthrop, WA in timber. Minimal fire behavior was reported.

FREEZEOUT COMPLEX, Okanogan-Wenatchee National Forest. This fire is 65 miles northeast of Bellingham, WA in timber. A joint U.S. Forest Service/British Columbia Forest Service helibase has been established in Manning Park, Canada to support air operations. Fire activity included single tree torching and short range spotting.

RATTLESNAKE PEAK, Okanogan-Wenatchee National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 40 miles west of Yakima, WA in timber, is being managed to accomplish resource objectives. Rolling materials resulted in low to moderate surface spread.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

WWF = Wallowa-Whitman National Forest

ALASKA AREA LARGE FIRES:

CENTRAL COMPLEX, Bureau of Land Management, Upper Yukon Zone. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Crazy, Bolgen Creek, Rock Creek, Preacher Creek, Middle Birch, Big Bluff and Takoma Bluff fires, is surrounding Central, AK in spruce and hardwoods. Fire activity increased with surface fire, torching, crown runs and spotting observed.

TAYLOR HIGHWAY COMPLEX, Alaska Division of Forestry, Tok Area Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. The Billy Creek was actively burning on the flats; running and torching were observed in the mountains. Increased activity on several flanks was observed on the Porcupine. Clear skies and higher temperatures resulted in increased activity on the Chicken. Continuous ground fire and some torching was observed on the Gardiner Creek.

BOUNDARY, Alaska Division of Forestry, Fairbanks Area Forestry. This fire is 20 miles northeast of Fairbanks, AK in black spruce and tundra. Fire behavior was minimal. Mopup of interior hot spots continued.

NOD = Bureau of Land Management, Northern California Resource Area

SOUTHERN CALIFORNIA AREA LARGE FIRES:

DEEP, Sequoia National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This fire is 18 miles northeast of Porterville, CA in chaparral. Minimal fire behavior was reported. Evacuations and the highway closure remain in effect.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
DEEP	CA	SQF	3,222	85	8/17	1,669	48	92	10	0	5.7M

EASTERN GREAT BASIN AREA LARGE FIRES:

NORTH STAR BUTTE, Payette National Forest. A Type 2 Incident Management Team (Whalen) is assigned. This fire is 17 miles northwest of New Meadows, ID in subalpine fir. Torching and spotting were observed. Road and trail closures remain in effect.

BEAR SPRING, Salmon-Challis National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 11 miles northwest of North Fork, ID in timber. Short runs with torching and short crown runs were reported. Numerous spot fires were located on the east flank.

PORTER, Salmon-Challis National Forest. A Fire Use Management Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 25 miles northwest of Stanley, ID in timber, is being managed to accomplish resource objectives. Fire activity was minimal. Local forest road closures are in effect. Reduction in acreage is due to more accurate mapping.

BIG CANYON, Bureau of Land Management, Moab Field Office. This fire is 40 miles southeast of Price, UT in timber and chaparral. Minimal fire behavior was reported. This fire will be monitored by aerial resources.

PHANTOM, Payette National Forest. This lightning-caused Wildland Fire Use (WFU) incident, located four miles south of Lantz Bar, ID in timber, is being managed to accomplish resource objectives. No new information was reported. This will be the last report unless significant activity occurs.

OUTLOOK:

Weather Discussion: High pressure continues over the West except for a disturbance centered over the Great Basin. Thunderstorms are expected east of the Cascades and Sierra. Hot and dry weather is on tap for Alaska as high pressure covers the area.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ALASKA AREA Eastern Interior: Partly cloudy and smoky.	Eastern Interior: 70s to 80s.	Eastern Interior: 25 to 40%.	Eastern Interior: Southwest to southeast 5 to 10 mph.
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Partly cloudy and cooler with scattered thunderstorms, mainly wet. Utah, Arizona Strip: Mostly cloudy with widely scattered to numerous thunderstorms. Locally, heavy rain possible.	Idaho, Bridger-Teton: 65 to 76 mountains. 77 to 88 valleys. Utah and Arizona Strip: 67 to 84 mountains. 85 to 100 valleys. 98 to 106 Lake Mead.	Idaho, Bridger-Teton: 28 to 43% mountains. 20 to 32% valleys. Utah, Arizona Strip: 23 to 38% mountains. 15 to 28% valleys.	Idaho, Bridger-Teton: Northwest to west 5 to 10 mph. Utah, Arizona Strip: Southwest to northwest 6 to 14 mph.
NORTHERN CALIFORNIA AREA: Clear with afternoon cumulus over the Sierra Cascade Crest. Patchy night and morning coastal fog with a shallow marine layer.	60s to 70s coast. Upper 70s to 102 inland.	8 to 18% inland.	Southwest to northwest 4 to 8 mph with higher afternoon gusts.
NORTHERN ROCKIES AREA: Widely scattered showers or wet thunderstorms, mainly to the west of the Continental Divide. Cold front dropping south into North Dakota Tuesday night.	West of Continental Divide: 83 to 95 Idaho. 84 to 96 elsewhere. East of Continental Divide: 67 to 77 mountains. 74 to 84 North Dakota. 76 to 88 elsewhere.	West of Continental Divide: 16 to 30% Idaho. 18 to 32% elsewhere. East of Continental Divide: 30 to 44% North Dakota. 19 to 33% elsewhere.	West of Continental Divide: Valley 3 to 8 mph except briefly gusty 23 to 35 mph under thunderstorms. East of divide: In Montana, west to north 5 to 10 mph in afternoon. In North Dakota, increasing to west 7 to 15 mph in the evening.
NORTHWEST AREA: Partly cloudy with isolated, wet thunderstorms to the extreme east.	West of the Cascades: Upper 70s to 80s north. 80s to low 90s south. East of the Cascades: 80s to 90s. Near 100 Columbia Basin.	West of the Cascades: 45% north. 25% south. East of the Cascades: 10 to 20% eastern Washington. 15 to 30% eastern Oregon.	West to northwest 5 to 15 mph.
ROCKY MOUNTAIN AREA: Scattered afternoon thunderstorms over Colorado, western Wyoming and Nebraska. Isolated dry lightning in southwest Wyoming and northwest Colorado.	Mid 80s to lower 90s. 70s mountains.	Less than 20% across southeast Colorado into central Wyoming.	South at 8 to 18 mph in western Kansas.
SOUTHERN CALIFORNIA AREA: Areas of morning low clouds and fog coastal basins. Partly cloudy with isolated thunderstorms over the Sierra crest eastward and the eastern deserts. Otherwise sunny.	65 to 80 coastal. 80 to 95 mountains. 85 to 95 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	20 to 35% valleys. 10 to 20% mountains. 10 to 20% deserts.	Southwest to northwest 5 to 15 mph.

HEAT DISORDERS

Heat becomes a problem when humidity, air temperature, and radiant heat combine with hard work to raise body temperature beyond safe limits. Sweat is your main defense. Everyone on the fireline must understand the importance of drinking water often.

- There are three forms of heat stress.
 - Heat cramps
 - Heat exhaustion
 - Heat stroke

- The mildest is heat cramps. Heat cramps can progress to heat exhaustion and eventually heat stroke.
- Heat cramps are involuntary muscle contractions caused by failure to replace fluids or electrolytes, such as sodium and potassium.
 - Cramps can be relieved with stretching and by replacing fluids and electrolytes.
 - Heat cramps can be prevented by maintaining an adequate intake of water, electrolyte replacement drinks and by eating fresh fruits and vegetables.

- Heat exhaustion is characterized by:
 - Weakness
 - Extreme fatigue
 - Nausea
 - Headaches
 - Wet, clammy skin

- Heat exhaustion is caused by inadequate fluid intake. Treat heat exhaustion by resting in a cool environment and replacing fluids and electrolytes.
- Heat stroke is caused by failure of the body's heat controls. Sweating stops and the body temperature rises.
- Heat stroke is characterized by:
 - Hot, often dry skin
 - Body temperature above 105.8 degrees Fahrenheit
 - Mental confusion
 - Loss of consciousness, convulsions, or even coma

- Heat stroke is a medical emergency. Brain damage and death may result if treatment is delayed. Begin rapid cooling with ice or cold water, fanning the victim to promote evaporation. For rapid cooling, partially submerge the victim's body in cool water. Treat for shock if necessary.
- You can prevent the serious consequences of heat disorders by improving your level of fitness and becoming acclimated to the heat. Maintaining a high level of aerobic fitness is one of the best ways to protect against heat stress. The fit worker has a well-developed circulatory system and increased blood volume. Both are important to regulate body temperature. Fit workers start to sweat sooner, so they work with a lower heart rate and body temperature. They adjust to the heat twice as fast as the unfit worker.
