

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, DECEMBER 23, 2005 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 233 new fires reported for the week. One new large fire was reported and contained in the Southern Area. Very high to extreme fire indices were reported in Nebraska, South Dakota, and Texas.

All National Type 1 and Type 2 Incident Management Teams have been released from hurricane related incidents.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN
YEAGER RD	OK	OMA	627	100	---	37	1	7	0	1	10K	BIA

OMA – Okmulgee Field Office, Bureau of Indian Affairs

OUTLOOK:

Weather Discussion: The overall weather pattern through the weekend across the country will feature a high pressure ridge in the west and a low pressure trough in the east. Warm and dry conditions continue over southern California and Arizona. Weak to moderate off-shore flow will begin again over southern California by Friday evening with warmer and drier conditions to follow. Dry conditions will persist in eastern New Mexico, and western portions of Oklahoma and Texas; however, a weak cold front on Saturday will bring cooler temperatures and milder conditions. Low relative humidity over mainly northern Florida, and southern portions of Alabama and Georgia, will improve over the weekend as a storm system brings a chance for showers.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Partly cloudy.	60s to 70s mountains. 70s valleys. 65 to 75 upper deserts. 70 to 80 lower deserts.	20 to 35%.	Northwest to north 5 to 15 mph, except 10 to 20 mph Southern California.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area
- Identification of alternative traffic routes as part of the incident/project traffic plan
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice
- When potential smoke-related problems are identified:
 - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
 - Notify local law enforcement units and highway departments of a potential problem.
 - Implement preplanned actions such as posting smoke warning signs.
 - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
