

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JULY 8, 2006 – 0800 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was moderate nationally with 246 new fires reported. Seven new large fires (*) were reported, three in the Rocky Mountain Area and one each in the Southern California, Northern Rockies, Southern and Eastern Great Basin Areas. Five large fires were contained, one each in the Western Great Basin, Rocky Mountain, Northern Rockies, Eastern Great Basin and Northwest Areas. Very high to extreme fire indices were reported in Arizona, California, Minnesota, Montana, Nebraska, Nevada, North Dakota and South Dakota.

A Type 1 Incident Management Team (Opliger) is assigned to incident C10157, 60 kilometers west of Quesnel, British Columbia, Canada.

WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

LINCOLN COUNTY COMPLEX, Ely Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This complex is ten miles south of Caliente, NV in grass, sagebrush, juniper and pinyon pine. A major powerline remains threatened. The Twin Springs fire has been contained. Smoldering and creeping were reported.

DSR - Desert National Wildlife Refuge

NORTHERN ROCKIES AREA INCIDENTS/LARGE FIRES:

PARK CITY COMPLEX, Southern Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Incident Management Team (Heintz) is assigned. This complex, comprised of the previously reported Coal Creek and Benedict fires, is four miles northeast of Park City, MT in timber, sagebrush, and grass. Several residences and outbuildings are threatened. High winds and thunderstorm activity are making containment difficult. Creeping, smoldering, and flare-ups were reported.

ROCKY MOUNTAIN AREA INCIDENTS/LARGE FIRES:

CLUBHOUSE, Cheyenne River Agency, Bureau of Indian Affairs. This fire is two miles north of Eagle Butte, SD in grass. Residences have been evacuated. Several residences, agricultural fields and livestock are threatened. High rates of spread and fire whirls were reported.

FOUR BEAR, Cheyenne River Agency, Bureau of Indian Affairs. This fire is one mile northwest of Swiftbird, SD in grass. Residences are threatened. Very active fire behavior was reported.

DRY MEDICINE CREEK, Bighorn National Forest. This fire is 30 miles east of Greybull, WY in timber. Active fire behavior with single tree torching was observed.

SHF – Shoshone National Forest

SDS - South Dakota Wildland Fire Suppression (GPC Area)

NORTHWEST AREA INCIDENTS/LARGE FIRES:

SPUR PEAK, Okanogan/Wenatchee National Forest. A Washington Interagency Incident Management Team (Jennings) is assigned. This fire is 13 miles northeast of Winthrop, WA in spruce and lodgepole pine. Forest road and trail closures are in effect. Steep terrain and heavy amounts of dead and down fuel are hampering containment efforts. Tiffany Springs Campground remains threatened. Ground fire with occasional single tree torching was observed.

WSA – Warm Springs Agency, Bureau of Indian Affairs

EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

BULL COMPLEX, Cedar City Field Office, Bureau of Land Management. A transfer of command from a Type 1 Incident Management Team (Martin) back to the local unit will occur today. This complex, comprised of the Bull and Cove Mountain fires, is 25 miles northwest of St. George, UT in grass, brush, pinyon pine and juniper. Minimal fire activity continues.

SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

KINGSTON #2, California Desert District, Bureau of Land Management. This fire is 70 miles northeast of Baker, CA in grass and brush. Steep inaccessible terrain is hindering containment. Moderate fire behavior with torching was observed.

PICO, San Bernardino County. This fire is located approximately three miles from Grand Terrace, CA in tall grass and brush. Several residences are threatened. Evacuations have been lifted and roads have been reopened. Access, steep slopes, and communications are hampering containment efforts. Moderate fire behavior was reported.

NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

LAVA, Modoc National Forest. This fire is 44 miles northwest of Alturas, CA in old growth ponderosa pine, white fir and brush. Minimal fire activity was observed. The fire is being monitored.

YOLLA BOLLY COMPLEX, Mendocino National Forest. A Fire Use Management Team (Perkins) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is burning 35 miles west of Red Bluff, CA in timber. Increased fire activity on the southwest flank was observed.

OUF – Ouachita National Forest

ALASKA AREA INCIDENTS/LARGE FIRES:

PARKS HWY, Fairbanks Area Forestry, Alaska Division of Forestry. This fire is one mile southeast of Nenana, AK in black spruce, tundra and grass. Numerous residences, native allotments, recreational cabins, commercial property and utility infrastructure remain threatened. Structure protection is in place. Creeping and smoldering were reported.

OUTLOOK:

Fire Weather Watch: For parts of northern and central Nevada due to dry lightning.

Weather Discussion: Increasing mid-level moisture will bring a threat of mostly dry thunderstorms to the northern Sierras, northeast California, western Nevada and into portions of southern Oregon. Otherwise, high pressure building over the West will bring warmer and drier weather to much of the region. In Alaska, a low pressure trough will continue over the north with a weak high pressure ridge over the south.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Western Great Basin Isolated to widely scattered dry thunderstorms will develop in the afternoon hours across parts of northern, central and western Nevada, sunny across the far east and northeast. Isolated wet thunderstorms are possible across southern Nevada.	Northern valleys: 84 to 99. Southern valleys: 92 to 112. Northern mountains: 73 to 92. Southern mountains: 82 to 87.	Northern valleys: 7 to 22%. Southern valleys: 10 to 30%. Northern mountains: 10 to 32%. Southern mountains: 17 to 22%.	Variable at 6 to 12 mph, gusty near any thunderstorms.
Northern Rockies Upper ridge becomes re-established over Idaho and Montana. The area will experience rather warm and dry conditions with partly cloudy skies. The only risk of precipitation and dry lightning will be over the higher terrain of southwest Montana into Wyoming during the later afternoon.	West of divide: 85 to 90. East of divide: 88 to 92. Western North Dakota: 88 to 92. Eastern North Dakota: 82 to 86.	West of divide: 20 to 25%. East of divide: 25 to 30%. North Dakota: 30 to 35%.	West of divide: variable 5 to 10 mph. East of divide: west 5 to 10 mph. North Dakota: west 10 to 15 mph.
Rocky Mountain Area Scattered showers and thunderstorms over Colorado, and southern Wyoming.	Highs 80 to 90 lower elevations with 70s in the mountains.	15 to 20% over northern Wyoming and the Black Hills region, 20 to 35% elsewhere.	East to northeast 5 to 15 mph.
Eastern Great Basin Idaho, Bridger-Teton: Partly cloudy with isolated afternoon thunderstorms in southeast Idaho and western Wyoming. Northern Utah: Partly cloudy with scattered afternoon showers and thunderstorms. Southern Utah, Arizona Strip: Partly cloudy with scattered afternoon showers and thunderstorms.	Idaho, Bridger-Teton: 66 to 80 mountains, 80 to 95 valleys. Northern Utah: 70 to 80 mountains, 80 to 93 valleys. Southern Utah, Arizona Strip: 68 to 83 mountains, 84 to 99 valleys, 100 to 104 low deserts.	Idaho, Bridger-Teton: 16 to 25% mountains, 12 to 24% valleys. Northern Utah: 28 to 42% mountains, 14 to 28% valleys. Southern Utah, Arizona Strip: 30 to 48% mountains, 17 to 29% valleys.	Idaho, Bridger-Teton: upslope/upvalley 5 to 10 mph. Northern Utah: western portions: west 15 mph. eastern portions: east 10 to 15 mph. Southern Utah, Arizona Strip: western portions: north 10 to 20 mph, eastern portions: southeast: 5 to 15 mph.
Southern California Area Patchy morning low clouds and fog coastal areas, otherwise mostly sunny, except becoming partly cloudy with a few showers and thunderstorms over the Sierra and deserts in the afternoon.	85 to 100 mountains. 95 to 105 valleys. 95 to 105 upper deserts. 105 to 115 lower deserts.	40 to 60% coastal areas. 15 to 30% valleys. 15 to 30% mountains. 10 to 20% deserts.	Southeast to southwest 5 to 15 mph.
Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind

<p>Southwest Area Partly cloudy. Widely scattered to scattered thunderstorms across northern and eastern Arizona, northern and western New Mexico and northwest Texas. A slight chance for thunderstorms elsewhere.</p>	<p>Mid 80s to near 105 lower elevations. Mid 60s to the mid 80s in the higher terrain.</p>	<p>15 to 25% lower elevations of Arizona. 25 to 40% remainder.</p>	<p>South to southeast 10 to 20 mph and gusty southern and eastern New Mexico and west Texas. Southwest 5 to 15 mph elsewhere, with higher afternoon gusts western Arizona.</p>
<p>Northern California Area Mostly sunny.</p>	<p>Upper 80s to near 106 warmest inland areas.</p>	<p>8 to 22%.</p>	<p>Afternoon wind mostly southwest to northwest 3 to 12 mph and locally gusty.</p>
<p>Alaska Mostly cloudy with scattered showers and thunderstorms in the south half of Alaska. Partly to mostly cloudy in the north.</p>	<p>Upper 50s to low 70s.</p>	<p>Above 40% except 30% to 40% in the northern interior.</p>	<p>Northeast winds to 15 mph in the northern interior. Otherwise winds northwest to southwest 5 to 15 mph</p>
<p>Southern Area No information reported.</p>			
<p>Eastern Area No information reported.</p>			
<p>Northwest Area No information reported.</p>

NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

● The Pocket Card provides:

- A general indicator of the potential for extreme fire behavior and difficulty of control.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Locally significant values for temperature, humidity, wind speed, and more.

● Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://famweb.nwccg.gov/pocketcards/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the PocketCard for site specific fire behavior predictions and fireline actions.
