

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, June 28, 2007 - 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Moderate (201 new fires)
 New large fires: 8 (*)
 Large fires contained: 2
 Uncontained large fires: 19
 Area Command Teams committed:
 NIMOs committed:
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 3
 Fire Use Teams committed:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Northern California Area (PL 2)

New fires: 24
 New large fires: 0
 Uncontained large fires: 1
 Type 1 IMTs committed: 1

Angora, Lake Tahoe Basin Management Unit, FS. IMT 1 (Hawkins). Two miles southwest of South Lake Tahoe, CA. Timber and grass. Isolated torching, creeping and smoldering. Numerous structures, recreation sites and cultural resources remain threatened. Mandatory evacuation remains in effect.

SDS - South Dakota State Forestry

Predictive Services Discussion: Windy conditions will continue over northeastern California and the Great Basin ahead of a large low pressure system off the coast. There is a chance for thunderstorms, some dry, to develop over eastern Arizona, western New Mexico and portions of the intermountain West. In Alaska, conditions will become warmer and drier. The Southeast will see widespread showers and thunderstorms by late week.

Lookouts

Lookouts are often better situated to notice the cumulative changes of fire behavior.

- Fire Order #8 says, "Establish lookouts in potentially hazardous situations." Should you utilize lookouts at all times?
 - Lookouts should be posted at all times.
- What are you looking for when you are selecting a lookout location?
 - Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
 - Utilize aircraft if they are available, but only as a complement to established lookouts on the ground. Never rely exclusively on aircraft as your lookout.
- What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?
 - Experienced firefighter.
 - Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
 - Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
 - Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- What is the necessary equipment for a lookout?
 - PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, and water.
