

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, May 11, 2008 – 0800 MDT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (67 new fires)  
 New large fires: 1 (\*)  
 Large fires contained: 1  
 Uncontained large fires: 8  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 2  
 Fire Use Teams committed: 0

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

CCD – Carson City Field Office, BLM

**Predictive Services Discussion:** An approaching low pressure system will generate gusty winds in combination with low relative humidity for the southern Great Basin and portions of Colorado. The Southwest will see very dry conditions and breezy winds. The Southeast will also see windy conditions with the passage of a cold front.

## AVIATION "WATCH OUT" SITUATIONS

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are all hazards identified and have you made them known?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
  - Communications
  - Confusion
  - Personnel
  - Weather
  - Turbulence
  - Conflicting priorities
- Is there a better way to do it?
- Are you driven by the task and sense of urgency?
- Can you justify your actions?
- Are there other aircraft in the area?
- Will the pilot accept the mission?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
