SCU – Santa Clara Unit, Cal Fire

Predictive Services Discussion: Southern California and the Southwest will be very warm and dry today and Sunday. There will also be the chance of dry lightning over western New Mexico and eastern Arizona this weekend. Florida and the Southwest can expect scattered thundershowers. Alaska's Kenai Peninsula will be partly cloudy with light winds.

Entrapment Avoidance

Entrapment Avoidance is described in the NWCG Glossary as follows: "A process used to improve the safety of personnel on the fireline, which emphasizes tools and tactics available to prevent being trapped in a burnover situation. This process includes appropriate decision making through risk management, application of LCES, use of pre-established trigger points, and recognition of suitable escape routes and safety zones.

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Review how LCES relates to the 10 Standard Fire Orders.
