

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, July 18, 2009 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (195 new fires)
 New large fires: 6 (*)
 Large fires contained: 13
 Uncontained large fires**: 16
 Area Command Teams committed: 0
 NIMOs committed: 2
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 3

Nationally, there are 43 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents. **

Alaska Area (PL 3)

New fires: 2
 New large fires: 1
 Uncontained large fires: 5
 NIMOs committed: 1
 Type 2 IMTs committed: 1

Railbelt Complex (3 fires), Fairbanks Area, Alaska DOF. IMT 2 (Allen). Twelve miles southwest of Nenana, AK. Black spruce and tussock with mixed hardwood litter. Active fire behavior. Numerous structures threatened.

Shanta Creek, Kenai – Kodiak Area, Alaska DOF. NIMO (Gage). Started on FWS land twelve miles southeast of Soldotna, AK. Spruce. Moderate fire activity.

Rock Slough, Upper Yukon Zone, BLM. Started on FWS land, forty-seven miles northeast of Fort Yukon, AK. Black spruce, brush and tundra. Creeping and smoldering with isolated torching. Numerous structures threatened.

***Wood River 1**, AFS – Military Zone, BLM. Managed for resource benefit objectives. Twenty-seven miles south of Fairbanks, AK. Spruce and tundra. Moderate fire activity. Last report unless significant activity occurs.

Predictive Services Discussion: Hot and dry conditions will continue across the West. Initially dry thunderstorms are possible across California, Oregon, the Great Basin and Montana. Better moisture will accompany storms in the Southwest. In Alaska, cooler and wet conditions will develop across the southwest with warm conditions and thunderstorms across the interior and east.

Entrapment Avoidance

Entrapment Avoidance is described in the NWCG Glossary as follows: "A process used to improve the safety of personnel on the fireline, which emphasizes tools and tactics available to prevent being trapped in a burnover situation. This process includes appropriate decision making through risk management, application of LCES, use of pre-established trigger points, and recognition of suitable escape routes and safety zones.

- Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

- Review how LCES relates to the 10 Standard Fire Orders.
