

**National Interagency Coordination Center
Incident Management Situation Report
Monday, September 7, 2009 – 0530 MDT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Light (124 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires : ** 9
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 3
 Type 2 IMTs committed: 1

Nationally, there are 75 large fires being managed with minimal or no resource commitment that are not shown on today's report.

** Uncontained large fires do not include confine/contain and resource benefit incidents.

Southern California Area (PL 3)

New fires: 24
 New large fires: 0
 Uncontained large fires: 3
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 1

Station, Angeles NF. Unified command between IMT1 (Dietrich), IMT2 (Woychak) and Los Angeles County FD. Four miles north of La Canada, CA. Chaparral. Moderate fire behavior. Residences, power lines and a major communications facility threatened. Road closures in effect.

Big Meadow, Yosemite National Park, NPS. IMT1 (McGowan). Three miles northeast of El Portal, CA. Brush with heavy dead and down fuels. Isolated pockets of fuel continue to burn.

Oak Glen 3, San Bernardino Unit, Cal Fire. Four miles north of San Bernardino, CA. Mixed conifer, oak and chaparral. Smoldering.

Aviation Communications

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?

- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
