

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, July 10, 2010 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Moderate (224 new fires)  
 New large fires: 2 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 5  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

Nationally, there are 50 large fires being managed to achieve multiple objectives.

\*\* Uncontained large fires include only fires being managed under a full suppression strategy. \*\*

Interagency personnel are assigned to a number of locations in the Gulf of Mexico to assess and mitigate impacts resulting from the Deepwater Horizon oil spill.

- Support to the Fish and Wildlife Service include these areas: Delta, Breton and Bon Secour National Wildlife Refuges, as well as Houma, LA and Mobile, AL.

- Support to the National Park Service include these areas: Gulf Islands National Seashore, Jean Lafitte Park and Preserve, Everglades National Park, Dry Tortugas, Biscayne National Park, De Soto National Memorial and Big Cypress National Preserve.

**Alaska Area (PL 2)**

New fires: 5  
 New large fires: 2  
 Uncontained large fires: 3

**Louie Creek**, Galena Zone, BLM. Started on private land eight miles southwest of Huslia, AK. Black spruce and mixed hardwoods. Moderate fire activity with group tree torching. Structures threatened.

**Pat Creek**, Upper Yukon Zone, BLM. Fifteen miles north of Stevens Village, AK. Black spruce and tundra. Creeping fire with isolated torching.

\* **Evaingiknuk**, Galena Zone, BLM. Limited perimeter control incident. Sixty miles northwest of Kotzebue, AK. Black spruce and tundra. Smoldering fire with occasional torching. Last report unless significant activity occurs.

\* **No Name Creek**, Southwest Area Forestry, Alaska DOF. Confine/contain incident. Fifteen miles northwest of Telida, AK. Mixed spruce and hardwoods. Moderate fire activity. Last report unless significant activity occurs.

**Fiasco Lake**, Upper Yukon Zone, BLM. Ten miles north of Circle City, AK. Black spruce and tundra. Smoldering. Reduction in acreage due to more accurate mapping.

**Predictive Services Discussion:** A mix of wet and dry thunderstorms is expected over northern California, eastern Oregon and much of the intermountain West today. These storms will gradually shift eastward over the weekend. The northern Alaska Interior will be a little cooler with widely scattered showers and isolated thunderstorms.

**Today's discussion is from the Motorized Operations Category.**

## **ATV Transport**

### **ATV**

### **Loading/Unloading**

Loading/unloading of ATVs has resulted in serious injury and even death to employees. Only those who have been fully trained in ATV operations should conduct loading/unloading procedures. The following safety measures are recommended:

- Wear all PPE (including gloves, helmet, etc.) until ATV is either secured or unloaded
- Ensure header board (board placed in front of bed of truck or trailer) is in place and in good condition
- ATV tire ramps should be secure to trailer or tail gate and on level terrain
- If possible, use a tilt trailer to haul an ATV. If this is not feasible, try to lower back end of vehicle so slant of loading ramp is reduced. Back into ditch, hillside, or anything else to try and lower back end of vehicle
- When loading ATV onto vehicle or trailer, keep seated, and lean body weight forward on ATV.
- When unloading ATV, keep seated and keep weight forward. This helps keep ATV from flipping over backwards.
- Never load or unload an ATV with a load on the racks. Load all ATVs empty.

### ● **Securing ATV for transport**

ATVs improperly loaded can be dangerous to you and other highway users. Steering can be affected if your load is not properly distributed and if not properly secured, can become dislodged and damage equipment and cause injury or death during a quick stop or crash.

- Drivers are responsible for their load—regardless who actually loads equipment. All drivers are responsible for:
  - Inspecting the ATV
  - Recognizing overloads and poorly balanced weight
  - Knowing the gear loaded on the ATV is securely tied down.

### ● **Securing ATV's:**

- Secure ATV in its normal operating position (on all four wheels)
- Set the parking brake and place transmission in gear
- Turn fuel valve OFF
- Use chock (that fits snugly against wheels) in front and back of ATV. Front end header boards should also block forward movement of ATV.
- Tie down ATV on at least each corner--use tie downs made from one inch nylon strap or greater, with hooks at each end and that have ratcheting buckles (ordinary rope should not be used due to stretching) or tie down straps that will lock in place.
- ATVs should never be hauled with a load attached to the cargo racks. Hazard exists of losing the load from the ATV while in transit.
