

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 10, 2011 – 0530 MT
National Preparedness Level 4**

National Fire Activity

Initial attack activity:	Light (183 new fires)
New large fires:	7 (*)
Large fires contained:	11
Uncontained large fires: **	34
Area Command Teams committed:	0
NIMOs committed:	3
Type 1 IMTs committed:	7
Type 2 IMTs committed:	10

Nationally, there are 75 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft and support personnel from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard) have been activated and will operate from Boise, Idaho. Two MAFFS C-130 aircraft from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and two MAFFS from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard) and support personnel have been activated and will operate from Austin, Texas.

Southern Area (PL 4)

New fires:	46
New large fires:	4
Uncontained large fires:	24
NIMOs committed:	1
Type 1 IMTs committed:	3

A NIMO (Kleinman) and two Type 1 Incident Management Teams (Opliger and Morcom) are assigned to provide support to existing and new fires in Texas.

Bastrop County Complex (two fires), Texas Forest Service. IMT 1 (Wilder). Six miles northeast of Bastrop, TX. Southern rough. Moderate fire activity. Numerous residences threatened. Evacuations in effect.

536 Bear Creek, Texas Forest Service. Four miles southwest of Linden, TX. Timber. Active fire behavior.

Ferguson, Wichita Mountains NWR. Transfer of command from IMT 1 (McGowan) back to local unit will occur today. Twelve miles northeast of Cache, OK. Timber. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Riley Road, Texas Forest Service. Eleven miles southwest of Montgomery, TX. Timber. Active fire behavior. Residences threatened. Evacuations in effect.

101 Ranch, Texas Forest Service. Eight miles west of Palo Pinto, TX. Timber. Creeping and smoldering.

Spicewood, Texas Forest Service. Five miles west of Lakeway, TX. Grass. Minimal fire activity.

Delhi, Texas Forest Service. Eight miles north of Thompsonville, TX. Grass. Minimal fire activity.

Old Magnolia, Texas Forest Service. Two miles southwest of White Oak, TX. Grass. Active fire behavior.

C491, Texas Forest Service. Nine miles east of Mart, TX. Grass. Minimal fire activity.

841 Arbor, Texas Forest Service. Five miles east of Crockett, TX. Grass. Moderate fire activity.

Lutherhill, Texas Forest Service. Seven miles northeast of LaGrange, TX. Grass. No new information. Last report unless new information is received.

Moore, Texas Forest Service. Four miles southwest of Gladewater, TX. Timber. Minimal fire activity.

Boot Walker, Texas Forest Service. Six miles east of Jefferson, TX. Timber. Active fire behavior.

Cedar Ridge, Texas Forest Service. Seven miles southwest of Aquilla, TX. Grass. Active fire behavior.

504, Texas Forest Service. Eleven miles northeast of Grapeland, TX. Timber. Minimal fire activity.

Three Horses, Okmulgee Field Office, BIA. Five miles north of Weleetka, OK. Hardwood Litter. No new information. Last report unless new information is received.

Diana, Texas Forest Service. Four miles west of Diana, TX. Timber. Minimal fire activity . Reduction in acreage due to more accurate mapping.

* **Dam**, Texas Forest Service. Five miles southwest of Whitney, TX. Grass. Active fire behavior.

508, Texas Forest Service. Twelve miles east of Tyler, TX. Timber. Minimal fire activity.

10539, Oklahoma DOF. Two miles northeast of Atoka, OK. Grass. No new information.

521, Texas Forest Service. Four miles southeast of Reklaw, TX. Timber. Minimal fire activity.

Womack, Texas Forest Service. Three miles northeast of Apple Springs, TX. Timber. Minimal fire activity.

* **Pine Valley**, Oklahoma Division of Forestry. Ten miles northeast of Tahlequah, OK. Hardwood litter. No further information received.

Predictive Services Discussion: A thermal trough over the Pacific Northwest will produce hot and unstable conditions across much of the Northwest, northern California, northern Rockies and western Great Basin with isolated, mainly dry, thunderstorms. Widely scattered thunderstorms will develop over the Southwest, Pacific Coast, Great Basin, Central and Southern Rockies. Warm and dry weather will continue across most of the central and southeast US while scattered showers and thunderstorms are expected from the Central Great Plains to the Middle Atlantic Coast States.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Entrapment Category.

FIRE SHELTER DEPLOYMENT

Firefighters must never rely on fire shelters, but instead should depend on well-defined and pre-located escape routes and safety zones. However, if the need for shelter deployment should ever arise, it is imperative that the firefighter knows how to deploy and use the shelter.

- Don't think of your fire shelter as a tactical tool.
- Recognize when deployment is your only option. When considering escape, remember that you can hold your breath for only about 15 seconds while running through flames or superheated air.
- If time runs out while attempting to escape, get on the ground before the flame front arrives and finish deploying on the ground. Death is almost certain if the fire catches a person off the ground. (The optimal survival zone with or without a shelter is within a foot of the ground.) Once entrapped, the highest priority is to protect the lungs and airways.
- When deploying, remove packs and place them away from the deployment area.
- Even though deploying your shelter is a last resort, time is critical when entrapped. Play it safe; give yourself ample time to deploy. Failure to adequately anticipate the severity and timing of the turnover and failure to utilize the best location and proper deployment techniques contributed to the fatalities and injuries on the Thirty Mile incident. Don't let the cost of opening a shelter become a factor in your decision.
- Before passing through superheated gases, try to close the front of your shroud. You can take your shelter out of the plastic bag and use it for a heat shield to pass quickly through a hot area. If you use the shelter in this way, don't drop it or allow it to snag on brush. Remember that your lungs are still vulnerable.
- If flames contact the shelter, the glass/foil fabric heats up more rapidly. If flame contact is prolonged, spots of aluminum foil can melt or tear away, reducing protection. Even if this happens, it is still safer inside the shelter. Your flame-resistant clothing becomes your backup protection. It's even more critical to keep your nose pressed to the ground and stay in your shelter.
- Remember, direct contact with flames or hot gases is the biggest threat to your shelter. It is vital to deploy in a spot that offers the least chance of such contact. The heavier the fuels, the bigger your fuel break needs to be.
- Remember, once you commit yourself to the shelter, stay there. No matter how bad it gets inside, it is usually much worse outside. If you panic and leave the shelter, one breath of hot, toxic gases could damage your lungs. Suffocation may follow. Most firefighters were killed as a result of heat-damaged airways and lungs, not by external burns. Protect your airways and lungs at all costs by keeping your face close to the ground and staying in your shelter.
