

**National Interagency Coordination Center
Incident Management Situation Report
Monday, April 30, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity (April 27 – April 29)

Initial attack activity: Light (253 new fires)
 New large fires: 5 (*)
 Large fires contained: 1
 Uncontained large fires: ** 5
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 0

Nationally there are no large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires: 80
 New large fires: 2
 Uncontained large fires: 3
 Type 1 IMT committed: 1

* **Livermore Ranch**, Texas Forest Service. IMT1 (Wilder). Eighteen miles west of Fort Davis, TX. Pine, juniper and grass. Numerous residences threatened. Evacuations in effect. No further information received.

* **Spring Mountain**, Texas Forest Service. Twenty-five miles west of Fort Davis, TX. Pine, juniper and grass. No further information received.

County Line, National Forests in Florida. Twenty-five miles north of Lake City, FL. Southern rough. Minimal fire activity.

MNS – Minnesota DNR

Predictive Services Discussion: Westerly flow will prevail across the U.S., bringing increasingly warmer weather across the country through the week. Showers and thunderstorms will continue to move across the Northwest and northern Rockies. Low level southerly flow will feed daily afternoon thunderstorms across the Southeast. For Alaska, conditions will become cooler with increasing potential for rain and snow through the week.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Miscellaneous Category.

RESPONDING TO VEHICLE FIRES

Suppression of vehicle fires is extremely dangerous and poses many health hazards to firefighters. The following procedures are recommended:

- Secure the scene and provide or request assistance for traffic control.
- Provide for your escape route at the scene.
- Do not use road flares if fuel is leaking from the vehicle or if wildland fuel is nearby.
- Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatus (SCBA).
- If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-foot minimum), and avoid contact with vehicle fire smoke or fumes.
- Check vehicle for hazmat placard
- Vehicle fires in remote areas are often associated with illegal drug manufacturing – request and wait for law enforcement
