

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 20, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (165 new fires)
New large fires:	8 (*)
Large fires contained:	2
Uncontained large fires: **	16
Area Command Teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	3
Type 2 IMTs committed:	4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Rocky Mountain Area (PL 4)

New fires:	15
New large fires:	1
Uncontained large fires:	5
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

High Park, Larimer County. IMT 1 (Hahnenberg). Fifteen miles west of Fort Collins, CO. Timber, brush and grass. Active fire behavior with group tree torching and short-range spotting. Subdivisions and recreation sites threatened. Evacuations and road closures in effect.

Springer, Pike and San Isabel NF. IMT 2 (Richardson). Four miles southwest of Lake George, CO. Timber. Active fire behavior with torching and short-range spotting. Community of Lake George threatened. Evacuations in effect.

Russels Camp, Converse County. IMT 2 (Pechota). Thirty miles south of Glenrock, WY. Timber and brush. Active fire behavior with group tree torching and short-range spotting. Structures threatened. Road closures in effect.

Little Sand, San Juan NF. NIMO (Gage). Thirteen miles northwest of Pagosa Springs, CO. Timber. Active fire behavior with group tree torching and long-range spotting. Structures threatened. Evacuations in effect

Cottonwood, Nebraska DOF. Seventeen miles west of Crawford, NE. Hardwood litter. Smoldering.

* **Willow**, Rawlins District, BLM. Ten miles east of Baggs, WY. Grass. Structures threatened. No further information received.

Predictive Services Discussion: A cold front will move across the upper Midwest through the central Plains, remaining stationary across the central Rockies and the southern Great Basin. Scattered showers and thunderstorms will develop across the Great Lakes, the upper Mississippi Valley and the central Plains. Showers and thunderstorms will also develop over the western Gulf states and southern Florida. High pressure in the Atlantic will keep warm and humid conditions in place over the East. High pressure will drop into the Northwest, northern Rockies and northern Great Basin. Hot and dry conditions will continue across the Southwest. In Alaska, warm and dry conditions will continue across the North with isolated showers and thunderstorms over the Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Aviation Category.

Scenarios are situations that can arise on a Wildland Fire or Aviation incident and are meant to add a realistic setting for the application of Today's Safety Discussion.

WORKING WITH HELICOPTER DROPS

Consider the following questions when you have a helicopter with a bucket working in your area:

If the helicopter is a Type 1 increase the distance of standby place from the drop zone.
Use helicopter drops to knock down or secure a fire area that poses a direct imminent threat to escaping control lines or climbing up ladder fuels.

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- What is the turnaround time for the helicopter?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Give feedback to the pilot about drop accuracy. Be honest and constructive.
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
