ALASKA: Initial attack activity.

NORTHWEST: No significant activity.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Opal, California Desert District, BLM - 100 acres.
Contained.

NORTHERN ROCKIES: No significant activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No significant activity.

SOUTHWEST: Wylie, New Mexico State - 150 acres. Controlled.

Whiskey, Gila NF - 300 acres. Containment expected 5/25.

ROCKY MOUNTAIN: No significant activity.

EASTERN: Initial attack activity.

SOUTHERN: Initial attack and large fire activity.

Donahoe, Jeff Davis County, Texas State - 21,000 acres. No estimate of
containment.

Cornudas, Hudspeth County, Texas State - 4,000+ acres. No other
information available.

Kaywell Park, Texas State - 300 acres. Contained.

Turkey Point, Florida State - 7,000+ acres. No estimate of containment.

ANALYSIS: High to extreme fire danger continues in Florida, Georgia and Texas,
resulting in increased fire activity and acreage burned. High to very high
indices and predicted winds caused fires to have increased rates of spread
in West Texas. The Southwest and Southern California experienced less
initial attack and lighter winds than expected.

PROGNOSIS: Initial attack activity expected to increase in the Southern and
Southwest Areas with high to extreme fire dangers, high temperatures, and
forecasted thunderstorms. A red flag watch has been posted for strong west
winds in western Arizona.

SOUTHERN: Initial attack and large fire activity.

Donahoe, Texas State - 21,000 acres. No estimate of containment.

Cornudas, Texas State - 4,000+ acres. No other information available.

Turkey Point, Florida State - 8,500 acres. Estimate containment today, 5/26.

ANALYSIS: Initial attack activity increased slightly in Florida and the southwest as a result of high to extreme indices and thunderstorm activity. A coastal influence has moderated initial attack activity in southern California.

PROGNOSIS: A Red Flag Watch has been issued for winds to 35 mph for west and northwest Arizona. Initial attack activity expected to increase as thunderstorms and high to extreme indices continue in the southwest. Initial attack activity is expected to increase in Florida as high pressure and high to extreme fire danger continues.
