

INCIDENT MANAGEMENT SITUATION REPORT
Monday 11/01/93 0530 MDT
Preparedness Level II

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

KINNELOA, Angeles NF - 5,700 acres. Type I Team (Dougherty) committed. Mop-up progressing well along the northern portion of the fire. Handcrews and overhead are being released. The fire is 95% contained; full containment is expected today, 11/1.

ORTEGA, Cleveland NF - 20,500 acres. Type I Team (Smart) committed. Fire spread has been minimal. Good progress is being made on line construction. The fire is 75% contained with full containment expected today, 11/1.

GREEN MEADOW, Ventura County and Santa Monica Mountains NRA, California State and NPS - 42,644 acres. Demobilization of excess resources is being processed. The fire is 96% contained with full containment expected today, 11/1.

STECKLE, Ventura County, California State - 26,500 acres. Containment was expected yesterday, 10/31. No new information received.

GUEJITO, San Diego RU, California State - 20,722 acres. Firefighters have made excellent progress due to favorable weather conditions. The fire is 90% contained with full containment expected today, 11/1.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No activity

ANALYSIS: Favorable weather conditions on fires in southern California aided suppression efforts, allowing containment targets to be moved up. Demobilization of crews and overhead is in progress. New fire activity in California and all other geographic areas was minimal.

PROGNOSIS: A RED FLAG WATCH has been issued for central California for strong northeast to east winds (15-30 MPH) tonight. This will increase the potential for initial attack activity. Southern California will have cooler temperatures, higher humidities, low clouds and fog along the coastal sections, aiding the suppression efforts on large fires. A RED FLAG WATCH has been posted for the Colorado River Valley of Arizona for strong winds, increasing the potential for initial attack activity.

INCIDENT MANAGEMENT SITUATION REPORT
Tuesday 11/02/93 0S30 MST
Preparedness Level II

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

KINNELOA, Angeles NF - 5,700 acres. Type I Team (Dougherty) committed. Contained.

ORTEGA, Cleveland NF - 20,500 acres. Type I Team (Smart) committed. Contained.

GREEN MEADOW, Ventura County and Santa Monica Mountains NRA, California State and NPS - 42,644 acres. Contained.

STECKLE, Ventura County, California State - 26,500 acres. Contained.

GUEJITO, San Diego RU, California State - 20,722 acres. Contained.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: Initial attack activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity

ANALYSIS: Initial attack activity was minimal nationwide. Good progress was made on all fires due to favorable weather. Demobilization of helicopters, shower units and prepositioned crews continued from large fires in southern California.

PROGNOSIS: A RED FLAG WARNING has been issued for the Sacramento Valley and central California for gusty north to east winds (15-30 MPH with local gusts higher) and low relative humidity. RED FLAG WATCHES AND WARNINGS have been issued for southern California for strong northeast winds (20-40 MPH with local gusts to 50 MPH) and low relative humidities. California will be sunny, warm and dry with patchy, early morning fog in the southern coastal areas. The potential for escaped initial attack and large fires will increase with the predicted strong winds.

INCIDENT MANAGEMENT SITUATION REPORT
Wednesday 11/03/93 0530 MST
Preparedness Level II

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

GREENMEADOW, Ventura County - 43,844 acres. The fire has escaped the control lines in the area of Leo Carrillo and is burning to the south and southeast. Containment expected 11/4.

TOPANGA, Los Angeles County - 33,000 acres. Fire is located near Calabasas and Malibu. The fire is burning from the Calabasas area to the coast along Topanga Canyon. No estimate of containment.

REPPLIER, Riverside RU, California State - 8,000 acres. Fire was started by arcing powerlines near the city of Banning. Cherry Valley and Beaumont are currently threatened. Containment expected today, 11/3.

OLD COACH, San Diego RU, California State - 1,600 acres. Fire is located near the city of Poway. No estimate of containment.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity

ANALYSIS: Santa Ana winds caused extreme fire behavior in southern California. Three new fires have been reported with increased activity on the Greenmeadow fire. Numerous residences were threatened with an unknown number being destroyed. Additional airtankers, Type I and II helicopters, communications equipment and miscellaneous overhead have been mobilized to southern California

PROGNOSIS: A RED FLAG WARNING has been issued for this morning in central California due to strong north to east winds up to 30 MPH. Warm weather with low humidities and strong winds will continue the potential for fire activity in North Zone California. RED FLAG WATCHES AND WARNINGS remain in effect in southern California for Santa Ana winds (15-35 mph) and low humidities. Winds will gradually diminish from the north to 5-15 mph over most areas by this evening. Sunny and warm weather with low humidity is forecast to continue. The potential for escaped initial attack and large fires is expected to continue.

INCIDENT MANAGEMENT SITUATION REPORT
Thursday 11/04/93 0530 MST
Preparedness Level II

ALASKA: No activity.

NORTHWEST: Initial attack and large fire activity.

KING BEE, Wenatchee NF - 600 acres. Gusty winds and dry fuels are causing control problems. Containment is expected 11/5.

VALE BUTTE, Vale District, BLM - 515 acres. High winds impeded control efforts. Containment is expected today, 11/4.

MILL CREEK, Warm Springs Agency, BIA - 100 acres. Containment was expected yesterday, 11/3.

RED MOUNTAIN, Benton County, Washington State - 2,000 acres. Controlled.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

GREEN MEADOW, Ventura County, California State - 4 3,521 acres. Contained.

TOPANGA, Los Angeles County, California State - 35,000 acres. The fire has burned over 300 structures near Calabasas and Malibu. Effective helicopter bucket drops slowed the rate of spread. Erratic winds continue to cause flare-ups on the south and southeast flanks. No estimate of containment.

REPPLIER, Riverside RU, California State - 8,000 acres. Four homes were destroyed and two damaged. Containment is expected today, 11/4.

OLD COACH, San Diego RU, California State - 1,600 acres. Contained.

NORTHERN ROCKIES: Initial attack and large fire activity.

FREEZEOUT LAKE, Montana State - 7,680 acres. Contained.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity.

ANALYSIS: Initial attack and large fire activity increased in the Northwest and Northern Rockies areas due to high winds. Containment targets continued to be met on large fires in southern California despite high winds. Minimal resource mobilization occurred nationally.

PROGNOSIS: Surface high pressure will continue to weaken over the Great Basin, resulting in weakening pressure gradients over southern California. A warm, dry upper ridge of high pressure continues off the California and Pacific Northwest coasts. Southern California will be sunny and warm with local easterly winds to 15 MPH in the eastern mountains and El Cahon Pass area, changing to onshore winds by afternoon. The potential for escaped initial attack and large fires is expected to decrease as winds subside across the West Coast.

NICC Intelligence Section

INCIDENT MANAGEMENT SITUATION REPORT
Friday 11/05/93 0530 MST
Preparedness Level II

ALASKA: No activity.

NORTHWEST: Initial attack and large fire activity.

KING BEE, Wenatchee NF - 400 acres. Containment is expected today,
11/5.

VALE BUTTE, Vale District, BLM - 515 acres. Contained.

MILL CREEK, Warm Springs Agency, BIA - 100 acres. Containment is
expected today, 11/5.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

MONETTI, Santa Barbara County, California State - 700 acres. No
structures have been reported threatened. Containment expected
today, 11/5.

TOPANGA, Los Angeles County, California State - 17,027 acres. The
fire has burned from Calabasas to the Pacific Coast Highway. Acreage
decrease due to remapping. Steep terrain, heavy fuel loading and
narrow winding roads have impeded control efforts. Containment is
expected today, 11/5.

REPPLIER, Riverside RU, California State - 8,680 acres. Contained.

NORTHERN ROCKIES: No significant activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No significant activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity.

ANALYSIS: Containment targets are being met on all large fires.
Southern California fires began demobilization.

PROGNOSIS: Strong high pressure aloft will continue off the California
coast. Surface high pressure over the Great Basin will strengthen
slightly, resulting in northwest to north winds to 15 mph over the
southern California mountain passes. Southern California will be mostly
sunny with patchy morning fog and light westerly winds during the
afternoon. The potential for escaped fires continues to decrease as
winds subside.

INCIDENT MANAGEMENT SITUATION REPORT

Saturday 11/06/93 0900 MST

Preparedness Level II

ALASKA: No activity.

NORTHWEST: Large fire activity.

KING BEE, Wenatchee NF - 400 acres. Containment expected today, 11/6.

MILL CREEK, Warm Springs Agency, BIA - 100 acres. Contained.

CALIFORNIA NORTH ZONE: No significant activity. CALIFORNIA SOUTH

ZONE: Initial attack and large fire activity.

MINETTI, Santa Barbara County, California State - 700 acres. Controlled.

TOPANGA, Los Angeles County, California State - 17,027 acres. Containment expected today, 11/6.

NORTHERN ROCKIES: No significant activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No significant activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity.

ANALYSIS: Demobilization continued from large fires in California. Containment targets have been met on Northwest Area large fires. Minimal fire activity was reported nationwide.

PROGNOSIS: A surface high pressure is rebuilding over the Great Basin, causing a weak Santa Ana event in southern California this morning. Onshore flows will return to the coast and coastal basins with winds 5-15 mph this afternoon. Southern California will be mostly sunny with north to northeast winds 10-20 mph, gusting to 30 in the northern mountain passes and below Cajon and Banning passes. The potential for escaped fires will increase with pressure gradient winds.

INCIDENT MANAGEMENT SITUATION REPORT
Sunday 11/07/93 0900 MST
Preparedness Level II

ALASKA: No activity.

NORTHWEST: Large fire activity.

KING BEE, Wenatchee NF - 400 acres. Contained.

CALIFORNIA NORTH ZONE: No significant activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

TOPANGA, Los Angeles County, California State - 17,027 acres.
Containment expected 11/8.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity.

ANALYSIS: Demobilization continued in southern California. No significant activity occurred elsewhere.

PROGNOSIS: The high pressure ridge over the Great Basin will weaken. Southern California will be mostly sunny with decreasing northeast winds over the northern inland valleys and below Cajon and Banning passes this morning. Afternoon onshore winds from 7-15 mph will cool daytime temperatures and increase humidities. The potential for initial attack activity will decrease as a result of the cooler weather. Demobilization from southern California will continue.

NICC Intelligence Section

INCIDENT MANAGEMENT SITUATION REPORT
Monday 11/08/93 0530 MST
Preparedness Level I

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

TOPANGA, Los Angeles County, California State - 17,027 acres.
Containment expected today, 11/8.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No significant activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity.

ANALYSIS: Minimal fire activity occurred nationwide. Demobilization of national resources from large fires in southern California and Washington continued. The 8 MAFFS units in southern California were released yesterday, 11/7.

PROGNOSIS: Weakening high pressure aloft over the west coast will allow normal onshore afternoon breezes to 20 mph through the coastal valleys, passes and interior valleys of southern California. Coastal morning fog changing to sunny skies and relative humidities 5 to 10% higher are forecast for southern California. Minimal fire activity is expected throughout the U.S.

INCIDENT MANAGEMENT SITUATION REPORT
Tuesday 11/09/93 0530 MST
Preparedness Level I

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No activity.

CALIFORNIA SOUTH ZONE: Initial attack and large fire activity.

TOPANGA, Los Angeles County, California State - 17,027 acres. Contained.

NORTHERN'ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No significant activity.

ANALYSIS: Demobilization of the remaining out of area crews from California was completed yesterday, 11/8. Minor initial attack activity was reported in southern California.

PROGNOSIS: Minor activity is expected to continue in southern California with morning low clouds along the coast, dry and a little warmer with offshore winds 8-16 MPH this afternoon.

NICC Intelligence Section

INCIDENT MANAGEMENT SITUATION REPORT
Wednesday 11/10/93 0530 MST
Preparedness Level I

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No activity.

CALIFORNIA SOUTH ZONE: Initial attack activity.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No activity.

ANALYSIS: Minimal initial attack activity occurred in southern California, however, several units continue to experience very high to extreme indices. No activity was reported in any of the other areas.

PROGNOSIS: Initial attack activity is expected to decrease in southern California with cooler temperatures and morning low clouds along the coast. Inland it will be partly cloudy this afternoon with a slight chance of showers.

*** THERE WILL BE NO REPORT TOMORROW, THURSDAY 11/11/93 DUE TO THE HOLIDAY ***

NICC Intelligence Section

INCIDENT MANAGEMENT SITUATION REPORT
Friday 11/12/93 0530 MST
Preparedness Level I

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No activity.

CALIFORNIA SOUTH ZONE: No significant activity.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: No activity.

ANALYSIS: Minimal initial attack activity occurred in southern California. No activity was reported in any of the other areas.

PROGNOSIS: Initial attack activity is expected to be minimal in southern California with cooler temperatures and rain, turning into widely scattered afternoon thundershowers. A drying trend with northeasterly winds is forecasted for Saturday.

*** THIS WILL BE THE LAST DAILY REPORT. A WEEKLY REPORT WILL BE PRODUCED
FRIDAYS AT 1000 MST BEGINNING 11/19. ***

NICC Intelligence Section

INCIDENT MANAGEMENT SITUATION REPORT
Friday 11/26/93 1000 MST
Preparedness Level I

ALASKA: No activity.

NORTHWEST: No activity.

CALIFORNIA NORTH ZONE: No activity.

CALIFORNIA SOUTH ZONE: No significant activity.

NORTHERN ROCKIES: No activity.

EASTERN GREAT BASIN: No activity.

WESTERN GREAT BASIN: No activity.

SOUTHWEST: No activity.

ROCKY MOUNTAIN: No activity.

EASTERN: No activity.

SOUTHERN: Initial attack activity. 126 fires for 680 acres were reported this week.

ANALYSIS: Southern California continued to experience minimal fire activity. A small amount of initial attack activity occurred in the Southern Area. No incident activity was reported in any other geographic area.

PROGNOSIS: A RED FLAG WATCH is in effect in Southern California Friday and Saturday for gusty north to northeast winds in areas below passes and in constricted canyons. High clouds and mild temperatures will prevail through the weekend with winds tapering off by Sunday. Mostly cloudy skies with a chance of showers are forecast for Monday and Tuesday. Predicted winds will increase the potential for suppression activity in Southern California. A frontal system will move across the western portion of the Southern Area bringing scattered showers and cooler temperatures. Fire activity in the Southern Area is expected to be minimal.
