

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY SEPTEMBER 12, 1994 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

Current Situation: Several large fires in Oregon, Montana and Idaho were aided by cooler temperatures and higher humidities. Eastern Montana continued to report new fires. A Type I Incident Management Team was ordered to rotate a Type I Team on the Payette NF. A Type II Incident Management Team was ordered from the Northwest for the Northern Rockies. Twelve crews were mobilized to the Eastern Great Basin.

Colonel Chip Leonard, USA, is the Task Force Commander of one Battalion and one Aviation Unit assigned to the Corral Creek and Blackwell fires. Colonel Joseph Leigh, USA, is the Task Force Commander of one Battalion assigned to the Kooocanusa Complex.

Eastern Great Basin Area Large Fires:

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Monahan), and the 1st Engineer Battalion, 1st Infantry Division, USA (Lt. Col. Bostick, Commander) are assigned. Helicopter support is being provided by the 4th Battalion, 1st Aviation Brigade, (Lt. Col. Brostrom, Commander) and the A/6-158th Aviation Unit, USAR. Fire activity was low, due to higher humidity and cooler temperatures.

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Maupin) is assigned. The complex consists of the BANNOCK, BEAR RIVER, RABBIT CREEK, NORTH FORK and STAR GULCH fires. Cooler temperatures and cloud cover have limited the intensity of fire activity. Dry, heavy fuels are hampering the effectiveness of direct attack. The fire spotted into Wapiti Creek and across the Payette River, causing a postponement of the return of evacuated residents to the Wapiti and Grandjean summer home area.

CHICKEN COMPLEX, Payette NF. A Type I Incident Management Team (Birch) is assigned. Some torching, spotting and small runs occurred on steep drainages within the fire perimeter. Structure protection remains in place at Bradley, Copenhagen, Mackey Bar, Davis Ranch and the town of Warren.

THUNDERBOLT, Boise NF. A Type II Incident Management Team (Martin) is assigned. The 4th Battalion, 1st Aviation Brigade, USA is providing helicopter support. Minimum fire activity allowed crews to make progress. An afternoon inversion hampered air operations on the north flank.

TIN CUP COMPLEX, Caribou NF. High winds caused numerous spots across the containment lines. Burnout operations were conducted along a portion of the east side in an attempt to reduce the continual spotting problems.

PIONEER COMPLEX, Challis NF. Due to favorable weather conditions, no significant activity occurred.

TROJAN II, Uinta NF. A Type II Incident Management Team (Fitzgerald) is assigned. The Trojan explosive plant was threatened during the initial run causing the evacuation of 1 square mile. The threat has diminished somewhat in the area. Crews supported by air operations, kept the fire from advancing into the interface areas.

EAST MINOR, Bridger-Teton NF. A Type II Incident Management Team (Krugman) is assigned. The 2 Oceans fire in the Teton Wilderness was assigned to the Team. The East Minor fire is contained. There was no major activity on either fire.

EAST MINER	BTF	WY	107	80	9/12	204	8	0	3	0	UNK	340K

Northern Rockies Area Large Fires:

BLACK BUTTE, Gallatin NF. A Type II Incident Management Team (Bennett) is assigned. Favorable weather and calm winds allowed crews to make good progress. Increase in acreage is due to remapping.

BABY DEAN, Northern Cheyenne Agency, BIA. A Type I Incident Management Team (Meuchel) is assigned. Erratic winds and spotting across the line hampered control efforts. Saturday, there were precautionary deployments when a crew used shelters as heat shields to move to safety zones. Structures continue to be threatened.

SMITH CREEK, Gallatin NF. A Type II Incident Management Team (Cowin) is assigned. Structure protection and evacuation plans for 18 private structures remain in place. Control lines have been completed around 2 structures adjacent to the fire perimeter. Large unburned islands of timber in meadows remain within the perimeter.

SOUTH SNOWY, Lewistown District, BLM. A Type II Incident Management Team (Lukens) is assigned. Residences, livestock and ranch improvements are threatened.

WINDY POINT, Lewistown District, BLM. A Type II Incident Management Team (Stone) is assigned. Good progress was made in securing the north end of the fire. Higher humidity and lower temperatures kept fire activity low.

MOOREHEAD COMPLEX, Miles City District, BLM. The complex consists of the DOONAN, TURTLE, PLUM, WINCOOP, BIRTHDAY, SPUR, BAYHORSE, THOMPSON CREEK and FLUFFY fires. Cooler temperatures and calmer winds have allowed all but two fires to be contained or controlled. The Thompson Creek fire continues to threaten homes. The Fluffy fire is threatening cultivated fields.

ROBINSON, Yellowstone NP. Airtankers and helicopters were heavily utilized yesterday.

KOOCANUSA COMPLEX, Kootenai NF. The 3-11th Field Artillery, I Corps (Lt. Col. Patterson) is committed. The complex is contained.

NORTH FORK COMPLEX, Glacier NP. The major fires in the complex are:

STARVATION, HOWLING and ADAIR II. Higher humidities kept fire activity low.

POWELL COMPLEX, Clearwater NF. The fires have met containment objectives and are being managed under confinement strategy. The complex will no longer be reported unless significant activity occurs.

NORTH FORK CX	GNP	MT	5,353	60	UNK	27	1	2	1	0	UNK	985K

Northwest Area Large Fires:

TWIN LAKES, Wallowa-Whitman NF. A Type I Incident Management Team (Liebersbach) and a Type II Incident Management Team (Duke) are assigned. Twenty-one and a half miles of line have been built, with twelve and six tenths miles more to build. Lower temperatures and higher humidity have allowed direct line work and mop-up. There was very little fire activity yesterday.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST
				CTN	CTN	PERS				LOST	LOSS	COST
TWIN LAKES	WWF	OR	19,440	65	9/14	1,730	59	39	12	1	UNK	6.9M

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type II Incident Management Team (Abbott) is assigned. The villages of Hughes, Allakaket and Alatna have been affected by the floods. Two hundred and fifty-two residents from these villages are being sheltered in Fairbanks. The Team is managing the efforts in Hughes to salvage property.

Outlook: *** A RED FLAG WARNING has been posted for Utah and western Wyoming for low humidity and strong, gusty winds. A RED FLAG WATCH has been posted for southern Nevada and northwest Arizona for strong, gusty winds. ***
 The major, cool upper level trough has now moved onto the West Coast. The upper level low spawned by this trough is meandering across northern California and northwest Nevada. Scattered showers and thundershowers will develop from the cool, moist air mass. High pressure is moving into Washington and Oregon while the rest of the West is under the influence of the upper trough. Strong, gusty winds will continue in Nevada, Utah, Arizona and western Wyoming. Temperatures will be cool across the Northwest and into northern California, while mild temperatures will continue across southern Idaho, Utah and western Wyoming. Fire activity will continue with the potential for increased activity

in areas with red flag conditions.
