

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY SEPTEMBER 18, 1994 - 0800 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Good progress continues to be made on large fires in Montana and Idaho. No significant activity occurred.

Eastern Great Basin Area Large Fires:

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Helicopter support is being provided by the A/6-158 Aviation Unit USAR. Acreage increase was due to remapping. Structure protection, suppression rehabilitation and plantation protection continues. Active ground fire and torching of scattered trees continued in dense spruce stands.

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Maupin) is assigned. The complex consists of the BANNOCK, BEAR RIVER, RABBIT CREEK, NORTH FORK and STAR GULCH fires. Handline is completed on the most critical areas of the fire. Crews held the line throughout the burning period. Air support held the fire in Little Silver Creek from crossing the ridge south of Tye Mountain. Interior islands continued to burn with torching and short range spotting.

CHICKEN COMPLEX, Payette NF. A Type I Incident Management Team (Birch) is assigned. Gusty winds induced by passing showers caused increased fire activity. Crews continue to make progress on the northwest flank. Structure protection crews have been removed from Mackay Bar and Chamberlain Basin. Demobilization is expected to increase today.

THUNDERBOLT, Boise NF. A Type II Incident Management Team (Martin) is assigned. Line operations are aggressively reducing hotspots. Some isolated torching occurred throughout the fire area.

TIN CUP COMPLEX, Caribou NF. Burnout operations on the west line were unsuccessful due to high humidities.

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. Hughes operations continue with retrieval of salvage, hazmat backhaul, debris removal and woodcutting. All building supplies have been delivered and reconstruction will begin soon. Allakaket operations have escalated to include removal of all school supplies and school records have been sent to Fairbanks for restoration. All remaining sled dogs were evacuated and increased efforts to expand and repair the runway to handle C-130 Aircraft has begun. Alatna damage assessment continues.

Outlook: High pressure continues to dominate the weather over the west. A couple of very weak upper level disturbances rotating around the high have very limited, but enough, moisture to combine with a slightly unstable afternoon airmass for isolated afternoon and early evening mountain thunderstorms. Thunderstorms are expected over eastern and central Oregon, Washington, Idaho, western Montana, Wyoming, northeast Arizona, northern New Mexico, eastern Utah, western Colorado and from the Sierra's into Nevada. Widespread coastal morning clouds from Washington south to southern California will give way to sunny conditions in the afternoon. Mostly sunny conditions can be expected in the valley areas of the west. A slow warming trend will continue with no major changes in humidities or winds. Increased activity is possible with warming and drying trend coupled with forecasted thunderstorms.
