

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY OCTOBER 1, 1994 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity was minimal throughout the U.S. Favorable weather conditions continued to assist suppression efforts on most large fires. Acreage increases were minimal on large fires. Resource mobilization through NICC has moderated.

Northern Rockies Area Large Fires:

SIAM, Clearwater NF. A Type II Incident Management Team (Kechter) is assigned. Fire activity increased yesterday with warmer temperatures and light winds. Crews completed an additional 4,200 feet of line construction using FLE, bringing the total of FLE constructed line to 7,800 feet.

LIBBY COMPLEX, Kootenai NF. A Type II Incident Management Team (Bosworth) is assigned. The District and the Team are monitoring fires, and taking action on four fires within the complex. Marginal success was attained on yesterday's burnout.

CABINET COMPLEX, Kootenai NF. A Type II Incident Management Team (Spradlin) is assigned. The active fires in this complex are the ROBERTS, SMITH PEAK and LOST GIRL. The containment percentage was decreased due to the addition of LOST GIRL. Recent mapping reflected an increase in acreage. Excellent progress was made on the lines with favorable weather conditions.

KOOCANUSA COMPLEX, Kootenai NF. A Type II Incident Management Team (Suenram) is assigned. Humidities have continued to slow the rate of spread and good progress is being made. A structure protection plan is now in place.

ROBINSON, Yellowstone NP. A Type II Incident Management Team (Hancock) is assigned. Favorable weather conditions are present and no additional acres were burned. More accurate mapping accounts for the additional acreage shown today. There are approximately 11 miles of line left to build.

Great Basin Area Large Fires:

THUNDERBOLT, Boise NF. A Type II Incident Management Team (McAtee) is assigned. The fire was fairly inactive yesterday. Crews made good progress in Divisions F and S. The fire did not gain any acreage.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Fire activity was low due to high humidities. The fire

was limited to low intensity ground fire in large fuels with areas of isolated torching and active ground fire in the afternoon where precipitation was minimal.

CHICKEN COMPLEX, Payette NF. Previous days rain continued to keep fire activity low. Crews took advantage of the higher humidities to mop-up along the fireline in several locations.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

CHICKEN CMPLX	PAF	ID	102,130	53	UNK	456	13	15	7	15	UNK	13.6M

North Zone - California Large Fires:

SPECIMEN, Klamath NF. A Type II Incident Management Team (Phenix) is assigned. Fire activity was minimal yesterday and demobilization is in progress. A planned burnout is being delayed due to weather conditions. Five handcrews are on loan to the forest. The team is responsible for initial attack of a five mile radius surrounding the fire.

Rocky Mountain Area Large Fires:

RAYMOND MOUNTAIN, Rock Springs District, BLM. A Type II Incident Management Team (Hart) is assigned. Wet and humid weather conditions allowed good progress to be made towards containment.

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. Johnsons team is transitioning with another Type I Incident Management Team (Liebersbach). The team is coordinating the activities of all

participating agencies in providing for the needs of the flood victims, assessing damages, contracting and administering repair contracts. The team is in the process of transitioning with a construction management company and the Tanana Chiefs Conference for management, construction and health and human services.

Outlook: The upper level low pressure system over eastern Utah will move into northwest Colorado today. This system produced significant moisture over southern Idaho and will keep unstable conditions over the Eastern Great Basin. The remainder of the West is under a weak flow aloft with another storm system approaching western Washington. Washington and Montana will be mostly sunny with afternoon showers over western Washington. Oregon and western Idaho will be mostly sunny with areas of morning fog and afternoon winds over western Oregon. Colorado, eastern Idaho, Wyoming, Utah and New Mexico will be mostly cloudy with scattered showers and isolated thunderstorms. Arizona, Nevada and California will be mostly sunny with morning fog and low clouds along the coastal sections of California. No significant fire activity is expected. Resource reassignment and demobilization should begin to increase.
