

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, SEPTEMBER 19, 1995 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL II

*** THE TEN STANDARD FIRE ORDERS ARE FIRM. ***
*** WE DON'T BREAK THEM; WE DON'T BEND THEM. ***

Current Situation: Fire activity remained moderate in the West. Most large fires are meeting containment objectives.

Hurricane Marilyn Support:

A total of 185 overhead personnel have been activated in support of FEMA operations in the Caribbean. A Type I Incident Management Team (O'Bannon) is assigned to St. Thomas. A Type II Incident Management Team (Kearney) is assigned to St. Croix, and another Type II North Carolina State Team (Hendricks) to San Juan. The teams are establishing command posts and developing strategies for logistical support. The ordering of resources is expected to increase as damage assessment progresses and receiving and distribution centers become functional. Security is a major problem and law enforcement personnel from all agencies are badly needed to support operations.

Western Great Basin Large Fires:

Barber Complex, Winnemucca District, BLM. The complex consists of the Jupiter Mine, Barber Canyon and Fortune Cookie fires. Contained.

Rock Creek, Winnemucca District, BLM. A Type II Incident Management Team (Black) is assigned. Favorable weather conditions allowed firefighters to make excellent progress. Fire activity is now confined to interior islands.

Eastern Great Basin Large Fires:

LAVA RIDGE, Richfield District, BLM. The fire was fairly quiet yesterday with only minor flare-ups and some interior islands burning out. Suppression objectives are expected to be met.

OUTLOOK: *** A RED FLAG WARNING IS POSTED FOR DRY EAST RIDGETOP WINDS ALONG THE SOUTHERN WASHINGTON AND NORTHERN OREGON CASCADES. ***

*** A FIRE WEATHER WATCH IS POSTED FOR STRONG DRY EAST WINDS ON THE NORTHERN OREGON COAST AND WILLAMETTE VALLEY. ***

Strong high pressure along the Pacific Coast has created very warm and dry conditions in parts of Washington and Oregon. A cold front will become stationary from southwest Wyoming, across central Idaho and into central Washington, bringing scattered rain and snow showers to Montana and Wyoming. Monsoon moisture will be confined to central and southeast Arizona where widely scattered thunderstorms are expected. High temperatures will reach only in to the 40's and 50's across much of Montana and Wyoming. Highs in the Great Basin will be in the 70's and 80's. Hot weather still dominates from the northern California valleys to the desert Southwest with temperatures again ranging from 100 to 110 degrees. High pressure will bring cool and dry weather to the northeastern states with partly to mostly sunny skys. Highs will be in the low to mid 70's. Fire activity is expected to remain moderate in the West. Support for the Teams assigned to Hurricane Marilyn is expected to continue.
