

INCIDENT MANAGEMENT SITUATION REPORT  
 THURSDAY, JULY 25, 1996 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

\*\*\* THE TEN STANDARD FIRE ORDERS ARE FIRM \*\*\*  
 \*\*\* WE DON'T BREAK THEM; WE DON'T BEND THEM \*\*\*

CURRENT SITUATION: Dry lightning resulted in increased fire activity in the Great Basin, Northwest, Northern California and Rocky Mountain Areas. A Type II Incident Management Team was mobilized from the Northern Rockies to the Rocky Mountain Area. Resource mobilization through NICC remained constant.

Rocky Mountain Large Fires:

TELEPHONE, Grand Mesa-Uncompahgre-Gunnison NF. This fire is burning in Ponderosa Pine, Pinyon/Juniper and oak 35 miles southwest of Montrose, Co. Erratic fire behavior due to low fuel moistures and low humidities were reported. High winds caused the fire to crown from Pinyon/ Juniper into Ponderosa Pine and oak. The fire is in a remote area and inaccessibility is a major problem.

TWIN BUTTES INCIDENT, Craig District, BLM. A Type II Incident Management Team (Hart) is assigned. The TWIN BUTTES and HATCHET fires are being managed together as the Twin Buttes Incident. The Twin Buttes fire is 1,400 acres. Significant progress was made on line construction. Threats continue to oil and gas improvements and ranches. The Hatchet fire is 2,195 acres and threats are to oil and gas improvements and private land. Erratic fire behavior was experienced from 1100 to 1800. Four airtankers flew over 16 hours dropping 94,000 gallons of retardant.

DISAPPOINTMENT, San Juan NF. A Type II Incident Management Team (Hefner) is assigned. This fire is burning in Ponderosa Pine, Pinyon/Juniper, scrub oak and sage brush 20 miles northwest of Delores, CO. Crews and dozers made good progress on the west and east sides. The fire was active in oak brush fuels, making short runs to the south and west. Airtankers were crucial in holding line and keeping the fire from burning into heavier fuels. Major problems are extreme fire behavior and the potential for reburn of unburned fuels. Ranch structures and Benchmark Lookout remain threatened.

Eastern Great Basin Large Fires:

CURTIS CREEK, Boise NF. This prescribed natural fire 16 miles northeast of Cascade, ID. has been declared a wildfire. The total area is 833 acres of which 414 are outside of the prescription and are being suppressed. Good progress was made in burnout operations and line holding. The main

hampering control efforts.

SIMMONS GULCH, Vale District, BLM. This fire is burning in grass and brush 30 miles west of Vale near Highway 20.

KRN = Kern County, California State

Alaska Large Fires: Twenty-nine fires are in a non-suppression status totalling 432,407 acres.

Southwest Large Fires: Two fires are in a confinement suppression strategy totalling 19,736 acres.

OUTLOOK:

\*\*\* FIRE WEATHER WATCHES ARE POSTED IN EXTREME SOUTHEAST \*\*\*  
 \*\*\* OREGON, WESTERN IDAHO, NORTHEAST NEVADA AND THE MOUNTAINS \*\*\*  
 \*\*\* AND EASTERN DESERTS OF SOUTHERN CALIFORNIA FOR DRY LIGHTNING \*\*\*

Strong high pressure remains over the West with persistent hot and dry conditions. The combination of unstable air and mid-level moisture will isolated to widely scattered afternoon thunderstorms from the Oregon Cascades and California Sierras eastward into the Rockies. Some of these thunderstorms will be dry in southeast Oregon, western Idaho, northeast Nevada and the mountains and eastern deserts of southern California. Precipitation is expected to increase with thunderstorms in Colorado, New Mexico and Arizona. A little cooler air will filter into the coastal valleys of Washington and Oregon, but the interior areas will remain abnormally hot. High temperatures in the West will range from the 70's along the coasts, with most areas in the 90's and 100's and up to 115 in the Southwest deserts. Fire activity is expected to increase in the areas where dry lightning is forecasted.
