

INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, AUGUST 21, 1996 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL V

\*\*\* ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT \*\*\*

CURRENT SITUATION: Several Areas reported moderate initial attack activity. Type II Incident Management Teams were mobilized in the Eastern Great Basin and Rocky Mountain Areas. Firefighters made good progress on many large fires across the western United States. The Task Force Vanguard, Fort Carson, Colorado, completed deployment to the Fork Incident in Northern California yesterday. Resource mobilization through NICC was steady.

Southern California Large Fires:

HWY. FIFTY-EIGHT, San Luis Obispo Ranger Unit, California State. A State Type I Incident Management Team (Bates) and a Type II Incident Management Team (Smith) are assigned. This fire is 5 miles east of Santa Margarita, CA. Crews made good progress on line construction. Acreage is expected to increase due to additional burnout operations. Damage assessment confirmed six homes, three mobile homes, 15 outbuildings and three vehicles were destroyed by the fire.

KAWEAH, Tulare Ranger Unit, California State and Sequoia Kings NP. A Type I Incident Management Team (Monahan) is assigned. Control efforts are hindered by steep terrain and inaccessibility. The fire continues to threatened Giant Sequoia Groves and the Giant Forest Development.

ROGGE, Stanislaus NF. A Type I Incident Management Team (Greenhoe) is assigned. The fire is burning in the Tuolumne River drainage south of Highway 108. Excellent progress toward containment objectives continues. Heavy fuel loading and steep terrain are hampering control efforts.

ACKERSON COMPLEX, Yosemite NP. Type I (Dague) and Type II (Byrd) Incident Management Teams are assigned. The complex consists of the ACKERSON, POOP/NAUT, BIG CREEK, and MIGUEL fires. All fires were active yesterday. Line construction was slowed by dense fuels and rugged terrain.

CHALOLO, Sequoia NF. The fire is burning on the Tule Indian Reservation, east of Springville, CA. There were a total of 14 starts. Two continue to burn actively. Extreme fire behavior was observed yesterday. Burnout operations are in progress.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOST	EST LOSS	SSS C-T-D

Northwest Large Fires:

BULL COMPLEX, Umatilla NF. A Type II Incident Management Team (Kearney) is assigned. The BULL, SUMMIT, ROCKY, and #104 fires comprise this complex. Crews made good progress in picking up slopovers. Control lines have been tied into road systems.

TOWER, Umatilla NF. A Type II Incident Management Team (Lukens) is assigned. The Tower fire is 17 miles south of Ukiah, OR. Fire activity was minimal due to higher humidity levels. Good progress was made on fuel reduction around the Tower Mountain electronic site and along the handline on the north end.

SOUTH ZONE COMPLEX, Willamette NF. A Type II Incident Management Team (Gardner) is assigned. The complex is 11 miles southeast of Oakridge, OR. Private land, high value timber, and endangered species continue to be threatened. Anticipated warmer and drier conditions with easterly winds could threaten the containment on several of the fires.

SPRING, Umpqua NF. A Type II Incident Management Team (Murphy) is committed. The fire is burning in the Boulder Creek Wilderness, near Toketee Falls, OR. The fire was actively burning on the south flank yesterday. Suppression forces attempted to keep the fire out of the Rattle Snake drainage.

NORTH UMPQUA COMPLEX, Umpqua NF. Suppression forces continue to meet containment goals. Current threats include a key watershed and endangered Cutthroat Trout habitat. Heavy downed fuels, blowdown, and steep terrain are hampering control efforts.

WILDCAT COMPLEX, Malheur NF. A Type I Incident Management Team (Dubois) is assigned. The fire is 10 miles southeast of John Day, OR. The fire is being suppressed under Unified Command with Oregon State. The Wildcat and Graham fires are included in this complex. Hot and dry weather is expected with thunderstorm activity this weekend.

SALT COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) is assigned. The complex includes the SALT CREEK, DAM, SHEEP CREEK, and HEAVEN'S GATE fires. The fires are burning on the Oregon/Idaho border of the Hells Canyon Recreation Area. The Sheep Creek Fire made advances on the north and northeast flanks yesterday. Intense fire runs in timber and grass were observed on south aspects. Today's fire behavior is expected to be extreme. The Wilderness boundary on the Idaho side is threatened.

Two fires are in a confinement suppression strategy totalling 5,148 acres.

Northern California Large Fires:

FORK, Mendocino NF. An Area Command Team (Mann) is assigned. Two Type I Incident Management Teams (Kohut & Loving) are assigned. The 3rd Brigade, 4th Infantry Division (Lt. Col. Bayles, Commander), will establish camp and begin field training today. The fire is located north of the town of Upper Lake, CA. Fire activity was moderate yesterday. Favorable weather allowed suppression forces to make progress on line construction. Some burnout operations were completed.

MORRIS, Shasta-Trinity NF. The fire is located in an inaccessible area about 12 miles northwest of Weaverville, Ca. Light winds and cooler temperatures aided firefighting efforts. Rolling material is hampering containment of the fire.

EAST FORK, Shasta-Trinity NF. The fire is located about 25 miles north of Weaverville, Ca. Some progress was made yesterday, but rolling material and winds continue to hamper containment efforts.

ROCK, Shasta-Trinity NF. A Type II Incident Management Team (Madden) is assigned. The fire is located 40 miles southwest of Redding, CA. Preparations for a large burnout were completed yesterday. Mopup and rehabilitation efforts have begun on the north, west, and south flanks of the fire.

BUTCHER, Shasta-Trinity NF. This fire is burning near McCloud, CA. Open line remains on the incident. Line construction has been hampered by steep, inaccessible terrain along with numerous snags and rollouts.

Rocky Mountain Large Fires:

CHAPIN #5, Mesa Verde NP. A Type II Incident Management Team (Hart) is assigned. This fire is burning 8 miles southeast of Cortez, CO. The fire was very active yesterday, burning on the north and south ends. Fire line was constructed from the south end to north of the Far View Complex. The Park Point Lookout is threatened as the fire burns to the north. Lack of anchor points, good safety zones and escape routes, and poor access are making containment and control of the east flank difficult.

SINK CREEK, Grand Junction District, BLM. A Type II Incident Management Team (Summerfeldt) is assigned. The fire is located 15 miles east of Grand Junction, CO. No smoke was spotted yesterday, but probe-eye operations indicated tremendous amounts of heat in oak brush litter. There is a possibility of reburn if humidity levels drop below about 20%.

DANO, Shoshone NF. A Type II Incident Management Team has been ordered. This fire is burning in spruce-fire vegetation 25 miles northwest of Cody, Wy. No other information available.

Northern Rockies Large Fires:

SCARFACE II, Northern Cheyenne Agency, BIA. This fire is located about 5 miles northwest of Ashland, Mt. It is burning in grass and sage vegetation. Presently, the fire is burning at low spread rates. A potential problem is dry lightning that is forecast for the area.

SWET/WARRIOR, Nez Perce NF & Bitterroot NF. A Type II Incident Management Team (Hodge) is assigned. Overcast skies and higher humidities have reduced fire activity and aided fire suppression efforts today.

One fire is in confinement suppression strategy totalling 226 acres.

Western Great Basin Large Fires:

HORSETHIEF, Ely District, BLM. The fire is located about 20 miles northeast of Pioche, Nv. Extreme fire behavior was observed as pinyon-juniper fuels were burning in steep terrain. Current threats are to a wilderness study area and deer winter range.

SHOEMAKE, Ely District, BLM. This fire is located 35 miles southeast of Caliente, Nevada. No new information was received.

Eastern Great Basin Large Fires:

CUNNINGHAM, Cedar City District, BLM. A Type II Incident Management Team (Casey) is assigned. The fire is located 10 miles northwest of Beaver,

UT. The fire spread rapidly yesterday due to strong constant winds. It jumped U.S. Interstate 15 and burned through a rest area. A semi-trailer truck was burned. The fire is currently threatening a house, transmission lines, and the Interstate. Control problems include high winds and high temperatures.

SARAH, Utah State. This fire is located about 20 miles northeast of Delta, Utah. It is burning on both private and public lands (BLM). A grazing allotment and wildlife range are threatened. Gusty winds caused control problems.

3 CREEK WELL, Boise District, BLM. This fire is located about 46 miles south of Glens Ferry, Id. Seeded areas and a Wilderness Study Area (WSA) are threatened. The fire exhibited extreme behavior and rapid rates of spread. It is burning in a remote area.

STODDARD, Salmon/Challis NF. The fire is burning in a remote area of the Frank Church River-of-No-Return Wilderness above the Middle Fork of the Salmon River. It is surrounded on three sides by old burns. An outfitter camp is threatened. Low humidity levels and high winds are causing control problems.

Three fires are in confinement suppression strategy totalling 6,104 acres.

ALF = Alabama National Forests

Alaska Large Fires: Sixteen fires are in a non-suppression status totalling 419,109 acres.

OUTLOOK:

An upper level trough will move across the Northern Rockies while an upper ridge starts to rebuild over the desert Southwest. A weak cold front will move into southern Wyoming and northern Utah. High pressure at the surface will build into the Pacific Northwest. Montana and northern Wyoming will have scattered showers and a few thunderstorms associated with the upper trough. Monsoon moisture will produce thunderstorms with rain in southern Colorado, New Mexico and eastern Arizona. Isolated and drier thunderstorms are forecast for western Arizona, southeast Utah and western Colorado. It will be sunny and a little warmer along the West coast from Washington to California. Very warm and dry air will cover Nevada and much of Utah. High temperatures will range from the 70's in Montana to 108 in the desert Southwest. Most areas will be in the 80's and 90's.
