

INCIDENT MANAGEMENT SITUATION REPORT  
 FRIDAY, SEPTEMBER 6, 1996 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL IV

\*\*\* SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME \*\*\*

CURRENT SITUATION: Minimal initial attack activity occurred yesterday. All fires experienced little activity, except the Shepard and Stockwell II fires which continued to burn aggressively. Moderate mobilization continued through NICC with increasing demobilization.

Northwest Large Fires:

TOWER, Umatilla NF. A Type I Incident Management Team (Richer) is assigned. The 5th Marine Regiment, 1st Marine Division, 1st Marine Expeditionary Force (Lt. Col. Seal, Commander) is assigned. Fire activity was lower yesterday due to lower temperatures and higher humidity although the fire received little or no precipitation from the passing front. The southern edge is continuing to move down steep slopes to the John Day river bottom and east into the John Day Wilderness. Short range spotting is occurring in areas of heavy fuels. Unburned islands within the interior continue to burn out.

SUMMIT, Umatilla NF. A Type I Incident Management Team (Porter) is assigned. Task Force Vanguard, 3rd Brigade, 4th Infantry Division (Lt. Col. Bayles, Commander) is assigned. The fire is contained.

SPRING, Umpqua NF. A Type I Incident Management Team (Wands) is assigned. Helitorch operations are planned for the east fork of Boulder Creek to strengthen the line. Mop up is in progress along the non-wilderness perimeter.

MOOLACK COMPLEX, Willamette NF. A Type II Incident Management Team (Bright) is assigned. Line blasting began on the northwest side of the Charlton fire. New spots were picked up outside the line on the Moolack fire. Progress remains slow.

SALT COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (Macdonald) is assigned. Transition to a Type III organization will occur today.

One fire is under a confine/contain suppression strategy for 3,650 acres.

Northern Rockies Large Fires:

SHEPARD MTN, Custer NF. A Type I Incident Management Team (Bailey) is

assigned. The fire was started approximately 19 miles due west of Red Lodge, Montana by lightning. Residents were evacuated from the East Rosebud Lake area as well as an area 10 miles down the canyon. The incident command post was evacuated and burned over with major equipment losses. Twenty-six residences and summer homes were confirmed destroyed. Yesterday, storm cells continued to pass over the fire creating major activity and the fire advanced to the north and northeast. Many structures are threatened. An initial request has been made to the Federal Emergency Management Agency for assistance.

One fire is under a confine/contain suppression strategy for 41,985 acres.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOST	EST LOSS	SSS C-T-D
SHEPARD MTN	CNF	MT	10,000	0	UNK	242	14	48	7	26	NR	450K

#### Rocky Mountain Large Fires:

STOCKWELL, Big Horn NF. A Type II Incident Management Team (Gaugen) is assigned. The fire experienced high winds much of yesterday. As the day progressed, cooler, more humid weather replaced earlier warm and dry weather. No rain was received on the fire. Airtankers were used to control flare-ups and 3 spot fires. Threats to area facilities are limited. Limited access is causing logistical problems.

STOCKWELL II, Big Horn NF. A Type I Incident Management Team (Liebersbach) is assigned. The fire is located approximately 8 miles west of Story, Wyoming. High winds were experienced much of yesterday with cooler and more humid weather replacing warm, dry weather. No rain was received on the fire. Airtankers were used to build holding lines along the northeast portion of the fire, hold spots and secure the perimeter on the western side. Torching, spotting and erratic behavior were observed as the cold front arrived. Threats exist to summer homes and other facilities in the area. Limited access poses logistical problems.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOST	EST LOSS	SSS C-T-D

#### Eastern Great Basin Large Fires:

ASPEN HOLLOW, Bridger-Teton NF. A Type II Incident Management Team (Sisk) is assigned. The fire received rain showers during the morning hours, causing fire activity to remain low. With increased temperatures and lower humidities expected over the next few days, fire activity is expected to increase. The increase in acres is due to active burning last night. Wildlife habitat, fisheries and watershed are threatened.

BRIDGE, Salmon-Challis NF. A Type I Incident Management Team (Birch) is assigned. The fire is located 29 miles west of Challis, ID in the Frank Church River of No Return Wilderness. The confinement strategy objectives are expected to be met.

Three fires are in a confine/contain suppression strategy for 3,082 acres.

Alaska Large Fires:

Ten fires are in a non-suppression status totalling 342,723 acres.

OUTLOOK

\*\*\*\*\*

A RED FLAG WARNING IS POSTED FOR THE NORTHERN SACRAMENTO VALLEY AND SURROUNDING FOOTHILLS BELOW 2,000 FEET FOR 10-20 NORTH WINDS, LOW HUMIDITY AND WARM TEMPERATURES.

\*\*\*\*\*

A deep upper level trough over the northern Rockies this morning will lift northward into Canada this afternoon. This will leave cooler temperatures and generally higher humidities from Washington and Oregon into Montana and northwest Wyoming. Eastern Montana will have widely scattered showers with breezy northwest winds. A Red Flag warnign is posted for the northern Sacramento Valley and foothills in northern California due to breezy north winds. Arizona, New Mexico and Colorado will have scattered to numerous wet thunderstorms. High temperatures will range from the upper 50's and 60's in the northern Rockies to 106 in the desert Southwest.
