**INCIDENT MANAGEMENT SITUATION REPORT  
FRIDAY, DECEMBER 14, 2001- 1000 MST  
NATIONAL PREPAREDNESS LEVEL 1**

**CURRENT SITUATION:**

Initial attack activity was light in the Southern, Southwest, and Southern California Areas.

**OUTLOOK:**

A cold front moving through Georgia over the southwest Florida panhandle will spread rain across central and eastern portions of the Southern Area. High pressure will build over Mississippi while over Oklahoma and Texas a southerly flow will moderate temperatures. High temperatures will generally be in the 40s and 50s, with 60s from the Florida panhandle to the Carolinas. Winds will shift from a southerly to a more northerly direction as the cold front moves east. Humidity will range from 40 to 80 percent throughout the South.

## Six Minutes For Safety

[www.nifc.gov/sixminutes/index\\_j.asp](http://www.nifc.gov/sixminutes/index_j.asp)

### NICC's Selection: Hypothermia

- Hypothermia happens when your core body temperature falls below normal. It can easily happen in cold winds or wetness. You can avoid hypothermia if you guard against dehydration, fatigue, cold winds, wet clothes, and are aware of the symptoms. Your body automatically begins to shiver to rewarm itself.
- As your energy is used up to keep warm, you may reach a point where your body will be unable to rewarm itself. If left untreated, your body will gradually shut down and you can die.
- Symptoms of hypothermia include slurred speech, loss of coordination, confusion, apathy, and irrational behavior.
- This dangerous condition can be avoided if you: 1. Dress warmly. 2. Stay dry.
- Protect yourself from wind. (This can be done most effectively by wearing clothes that block wind and moisture.)
- Eat/drink.
- If you recognize hypothermia in someone, move the victim to shelter, remove wet clothes, and replace them with warm, dry garments. If the victim is alert enough to hold a cup, give warm liquids to drink. Never give food or drink to an unconscious victim--he or she may choke. To help speed rewarming, place the victim in a pre-warmed sleeping bag.
- If the victim is unconscious, seek medical help immediately, before re-warming.
