

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, JULY 7, 2001 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Five new large fires were reported, two each in Utah and Wyoming, and one in Nevada. Thirteen large fires were contained, nine in Nevada, and one each in Oregon, Wyoming, Idaho, and Utah. Initial attack activity was moderate to heavy in the Northwest, Southern, and Southwest Areas, moderate in Northern California, Eastern Great Basin, and Rocky Mountain Areas, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Nevada, New Mexico, Oregon, Utah, and Wyoming.

EASTERN GREAT BASIN AREA LARGE FIRES:

FISHERMAN COMPLEX, Bridger-Teton National Forest. A Type 1 Incident Management Team (Hart) is assigned. This lightning caused complex, comprised of the Fisherman and Buck fires, is near Bondurant, WY. Higher relative humidity assisted with containment efforts.

GREYS RIVER COMPLEX, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This lightning caused complex, comprised of the Deer, Fawn, Murphy Creek, and Blind Bull fires, is 14 miles southeast of Afton, WY.

NEBO CREEK, Uinta National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This lightning caused fire is near Spanish Fork, UT. A slopover occurred on one division due to strong gusty winds, however crews made good progress on all other divisions. The Nebo Loop Road and campgrounds in the area will be reopened 7/7.

ANTELOPE 4, Northwest State, Utah State. This lightning caused fire is near Salt Lake City, UT. Steep slopes, gusty winds, dry fuels, and low relative humidity are hampering containment efforts. A National Historic Registry ranch facility is threatened.

BEEF, Richfield Field Office, BLM. This lightning caused fire is near the Little Sahara Recreation Area, 25 miles southwest of Nephi, UT. Significant runs and crowning were observed.

BOD = Lower Snake River District, BLM

ROCKY MOUNTAIN AREA LARGE FIRES:

JACK SPRINGS, Dinosaur National Monument. This lightning caused fire is 50 miles northwest of Maybell, CO. The fire burned actively through the night, spreading slowly downslope towards Jack Springs and onto BLM lands. Heavy fuels and low relative humidity are hampering containment efforts. Private land and residences in the Jack Springs drainage are threatened.

EAST GREASEWOOD COMPLEX, Craig District, BLM. A Type 2 Incident Management Team (Sisk) is assigned. This lightning caused complex, comprised of the Broken Track, Spanky, and East Greasewood fires, is 19 miles east of Rangely CO. Limited resources, low fuel moisture, and rugged terrain are hampering containment efforts.

BEAVER RIM, Rawlins District, BLM. This lightning caused fire is 20 miles southwest of Lander, WY. Very dry fuels, steep, inaccessible terrain, high winds, and thunderstorms are hampering containment efforts. Three ranches, above ground oil facilities, and critical wildlife habitat are threatened.

SMITH CANYON, Casper District, BLM. This lightning caused fire is 30 miles west of Casper, WY. Strong, gusty winds and steep, rugged terrain are hampering containment efforts with torching and spotting observed. Crews have completed fireline construction along the east perimeter.

KELLOG, Craig District, BLM. This lightning caused fire is 12 miles northwest of Meeker, CO within the Black Mountain Wilderness Study Area. This fire is being monitored by air resources and will not be staffed until resources become available. The fire was relatively quiet, with some activity observed on the south perimeter.

BEAR SPRINGS, Pinon Canyon Maneuver Site, Department of Defense. This lightning caused fire is 50 miles southeast of La Junta, CO. No new information was reported. This will be the last report unless new information is received.

ALMONT, Grand Mesa-Uncompahgre-Gunnison National Forest. This fire is burning in sagebrush, grass and some timber, near Almont, CO. No new information was reported.

WESTERN GREAT BASIN AREA LARGE FIRES:

ISOLATED, Elko Field Office, BLM. A Type 2 Incident Management Team (Saleen) is assigned. This lightning caused fire is burning in sagebrush and grass 45 miles northeast of Elko, NV. The Isolated and Double Mountain incidents have been combined to form the Isolation Complex. Heavy precipitation was received on the fire.

WINE CUP, Elko Field Office, BLM. This lightning caused fire is burning in grass and sagebrush, 30 miles northeast of Wells, NV. No new information was reported.

OUTLOOK:

Monsoonal moisture continues over the Great Basin, bringing scattered showers and thundershowers. High temperatures will be in the 80's and 90's, and minimum relative humidity will range from 15 to 30 percent. Winds will be southwest at 5 to 15 mph.

Increasing monsoonal moisture over Colorado and Wyoming will bring partly cloudy skies and scattered thundershowers, mainly to the mountain areas. High temperatures will be in the 70's and 80's in the mountains, and 90 to 105 degrees in the valleys. Minimum relative humidity will range from 15 to 30 percent, and winds will be southeast to southwest at 5 to 15 mph.

High pressure over the Northwest and monsoonal moisture circulating in from the south will bring mostly sunny skies except for a slight chance of thundershowers over southern Oregon. High temperatures will be 65 to 75 degrees along the coast, and in the 80's and 90's inland. Minimum relative humidity will range from 5 to 15 percent on the east side of the Cascade Range. Winds will be southwest to northwest at 10 to 20 mph.

Monsoonal moisture continues over the Southwest Area bringing scattered showers and thundershowers. High temperatures will be in the 70's in the mountains, and near 105 degrees in the deserts. Minimum relative humidity will range from 15 to 30 percent. Winds will be south to west at 5 to 15 mph, except 10 to 20 mph over portions of New Mexico.

California will have drier weather to the north, with deep monsoonal moisture residing over the central and southern part of the state. Partly cloudy skies are expected in the north, with a slight chance of thundershowers on the east side of the Sierra Nevada Mountains. The central and southern part of the state can expect partly cloudy skies with scattered showers and thundershowers. High temperatures will be in the 60's and 70's along the coast, 80's and 90's inland, and near 105 degrees in the deserts. Minimum relative humidity will range from 15 to 30 percent in the northern inland areas, and 30 to 50 percent elsewhere. Winds will be southwest to northwest at 10 to 20 mph.
