

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY JULY 15, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was moderate in the Southwest Area and light elsewhere. Nationally, 219 new fires were reported. Nine new large fires were reported, one each in the Eastern Great Basin, Western Great Basin; Northern Rockies and six in the Southwest Area. Two large fires were contained, one each in the Eastern Great Basin and Northwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

SOUTHWEST AREA LARGE FIRES:

KINISHBA, Fort Apache Agency, Bureau of Indian Affairs. Type 1 Incident Management Team (Humphrey) is assigned. This plume dominated fire is in ponderosa pine, woodlands and chaparral, two miles west of Whiteriver, AZ. Crews are constructing indirect containment lines for burn out operations. The communities of Cradleboard, Over the Rainbow, Jurassic Park and Whiteriver have been evacuated. Structure protection is in place for 700 threatened residences.

ENCEBADO, Taos Northern Pueblos Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Raley) is assigned. This fire is one mile south of Taos Pueblo, NM. Minimal fire behavior was observed in ponderosa pine, pinyon pine and juniper. Crews are mopping up and rehabilitating containment lines.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned; the Team is also managing the Turnbo fire. This lightning caused Wildland Fire Use complex, comprised of the Dry Lake, Sycamore, Moonshine and Granny fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish multiple resource objectives. Minimal fire activity was observed in pinyon pine, juniper, ponderosa pine and grass.

TURNBO, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This fire is 37 miles northwest of Silver City, NM, and is being managed with a confinement suppression strategy. Minimal fire activity was observed in mixed conifer with heavy dead and down fuel.

MOLINA COMPLEX, Santa Fe National Forest. This complex, comprised of the Capulin and Molina fires, is eight miles east of Cundiyo, NM. The fire is being managed with a confinement strategy. No new information was reported.

ASPEN, Coronado National Forest. A Type 1 Incident Management Team (Oltrogge) is assigned. This fire is in the Pusch Ridge Wilderness Area, 17 miles northeast of Tucson, AZ. Minimal fire behavior was observed in mixed conifer and Sonora Desert vegetation. Crews are patrolling and mopping up on all divisions and rehabilitating containment lines.

SPRUCE, Gila National Forest. This fire is in mixed conifer, nine miles east of Glenwood, NM. Active fire behavior with torching and spotting was observed. Personnel are monitoring fire activity and contacting land owners.

LARGO, Apache-Sitgreaves National Forest. This fire is in ponderosa pine, pinyon pine, juniper and grass, 15 miles south of Alpine, AZ. Active fire behavior with short uphill runs, torching, and short range spotting was observed. Crews are constructing containment lines utilizing existing trail systems and conducting burn out operations.

STEEPLE, Apache-Sitgreaves National Forest. This fire is in mixed conifer with heavy dead and down fuel, five miles east of Hannagan Meadow, AZ. Active fire behavior with short uphill runs, torching and spotting was observed. Trigger points have been identified and personnel are monitoring fire spread.

MAPLE, Apache-Sitgreaves National Forest. This fire is in grass, brush and ponderosa pine, 15 miles east of Clifton, AZ. The fire is being managed with a confine/contain strategy. No new information was reported.

DIVIDE, Gila National Forest. This fire is seven miles southeast of Aragon, NM. Extreme fire behavior was observed as the fire moved east, crossing dozer lines. Personnel disengaged from suppression activities yesterday afternoon due to safety concerns; dozer line construction has been re-initiated.

LUERA, Socorro District, New Mexico - State Forestry. This fire is in pinyon pine, ponderosa pine, juniper and Douglas fir, 20 miles south of Datil, NM. Crews are constructing and holding containment lines, and conducting some burn out operations.

WEST, Safford-Tucson Field Office, Bureau of Land Management. This fire is 15 miles southeast of Sierra Vista, AZ. Moderate to extreme fire behavior was observed in Sacaton grass, cottonwood, and mesquite. Personnel are preparing for possible burn out operations on the south flank with aerial support.

POPCORN, San Carlos Agency, Bureau of Indian Affairs. This fire is in pinyon pine, juniper, and brush, 35 miles northeast of Globe, AZ. Erratic fire behavior due to high winds was observed. Crews are constructing fireline with the support of aerial resources.

MAVERICK, Apache-Sitgreaves National Forest. This fire is in grass, brush and juniper, ten miles northeast of Clifton, AZ. The fire is being managed with a confine/contain strategy. No new information was reported. This will be the last report unless new information is received.

EASTERN GREAT BASIN AREA LARGE FIRES:

CAUSEY, Northwest State, Utah State. This fire is 10 miles northeast of Huntsville, UT. Extreme fire behavior was observed in cheat grass, oak and sage brush. Crews are constructing direct attack fireline and conducting burn out operations. Structure protection is in place for the 100 threatened residences. Six structures have been confirmed lost. Highway 39 is closed in the vicinity of the fire.

TOBIAS, Salmon-Challis National Forest. A Type 2 Incident Management Team (Van Bruggen) is assigned. This fire is in grass, sage and mixed conifer with dead and down fuel, 18 miles north to northwest of Leadore, ID. Active fire behavior in grass and sagebrush with some crowning and single tree torching was observed. Crews are constructing direct and indirect attack containment lines. Structure protection is in place; fifteen residences are threatened. One residence and 10 outbuildings have been confirmed lost.

FARMINGTON, Wasatch-Cache National Forest. A Type 1 Incident Management Team (Hart) is assigned. This fire is one half mile east of Farmington, UT. Moderate fire behavior with a low rate of spread was observed. Crews are constructing fireline with support from aerial resources. Structure protection remains in place for several summer cabins and 41 residences in Farmington and Fruit Heights.

EAST TABLE, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This fire is ten miles east of Alpine, WY. Moderate fire behavior with spotting up to one quarter mile ahead of the front was observed in heavy timber. Highway 89 has been reopened. Crews are constructing containment lines with the support of aerial resources.

BULLDOG, Richfield Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Brunner) is assigned. This fire is in oak, mountain mahogany, juniper and pinyon pine, 17 miles north of Ticaboo, UT. Extreme fire behavior with flame lengths in excess of 200 feet and spotting up to three quarters of a mile ahead of the front was observed. Crews are improving containment lines and conducting burn out operations. The Garfield County Sheriff's Office has implemented traffic control measures on Highways 95 and 276 due to smoke inversion. Three residences and one commercial property are threatened; structure protection is in place.

BLACKWALL, Salmon-Challis National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in mixed conifer with heavy ground fuel. Active fire behavior with torching and spotting was observed.

WOODENSHOE, Manti-LaSal National Forest. This fire is in the Dark Canyon Wilderness Area, 25 miles west of Blanding, UT. The fire is being managed with a confine/contain strategy. Minimal fire activity was observed in mixed conifer and brush. Personnel are mopping up and monitoring unburned areas of the fire.

NORTHWEST AREA LARGE FIRES:

CLARK, Willamette National Forest. A Type 2 Incident Management Team (Gardner) is assigned. This fire is in timber and understory, ten miles northeast of Lowell, OR. Active fire behavior with running, torching and spotting was observed. Crews are building containment lines on the south, east, and west flanks and have initiated handline construction on the north perimeter. The Bed Rock Campground remains evacuated and structure protection is in place for five threatened residences.

MIDDLE FORK, Southeast Washington State. A Washington Interagency Incident Management Team (Bernt/Andring) is assigned. This fire is 21 miles east of Yakima, WA. No new information was reported.

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires; the Fawn Peak and Sweetgrass fires have been contained. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. A significant run to the north was observed in the Disaster and Lake Creek drainages of the Pasayten Wilderness Area. Crews have successfully conducted burn out operations between Lake Creek and Andrews Creek and are constructing fireline towards Barney Mountain. The residents of nine summer homes remain evacuated; structure protection is in place east of the Church River.

JENKINS CABIN, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Keith) is assigned. This fire is in conifer, brush and grass, five miles north of Mount Vernon, OR. Minimal fire behavior was observed. Crews are reinforcing containment lines and mopping up.

COA = Colville Agency, Bureau of Indian Affairs

ROCKY MOUNTAIN AREA LARGE FIRES:

DOTSERO CRATER, Grand Junction Field Office, Bureau of Land Management. This fire is in pinyon pine, juniper, Douglas fir, sagebrush and grass, one mile northeast of Dotsero, CO. A small amount of torching and a ¼ acre slopover were observed. Crews made significant progress on the south flank and are continuing fireline construction

BEAR CREEK, San Juan National Forest. A Fire Use Management Team (Clark) is assigned. This Wildland Fire Use fire is in spruce and fir, five miles northeast of Vallecito, CO. The fire is being managed for resource benefit. Slow burning through dead and down fuels and occasional torching were observed. Crews are constructing and holding handline on southern flanks of the fire and in the Vallecito Creek Canyon.

BRUSH MOUNTAIN, Garfield County, CO. A Type 2 Incident Management Team (Blume) is assigned. This fire is 30 miles north of Grand Junction, CO. Active fire behavior with short runs and torching was observed in spruce, fir, pinyon pine, juniper, brush and grass. Crews are constructing fireline and conducting burn out operations. Structure protection is in place at a threatened residence. Decrease in acreage is due to more accurate mapping.

ALTA, San Miguel County, CO. This fire is four miles southwest of Telluride, CO. Active ground fire with minor torching was observed in spruce, fir and aspen. Snags and fire weakened green trees are making the fire extremely hazardous. Crews are strengthening handline, falling hazard trees along the control line, and mopping up. Structure protection is in place for 30 residences and two commercial properties.

NORTHERN ROCKIES AREA LARGE FIRES:

JIMTOWN, Helena National Forest. A Type 2 Incident Management Team (Swope) is assigned. This fire is in grass and timber, ten miles northeast of Helena, MT.

ARMELLS, Lewistown Field Office, Bureau of Land Management. This fire is 18 miles northwest of Roy, MT. Short runs, torching and spotting up to one quarter mile ahead of the front were observed in timber and grass. Crews are constructing fireline. Six residences are threatened; structure protection is in place.

OUTLOOK:

Weather Discussion: A weak upper level disturbance will cross over the Pacific Northwest today, providing increasing afternoon instability especially in eastern Oregon. A tight pressure gradient will also keep it breezy today in the Northwest. The Southwest and southern Rocky Mountain Areas will see a continued chance of thunderstorms, as moisture wraps around high pressure which will slowly drift north and east through the end of the week. Along the southeast Texas coast, Claudette is expected to make landfall today with heavy rain and strong wind. In Alaska, a frontal system dropping down from the north will bring rain to much of the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Mostly sunny except partly cloudy over Payette and Salmon Challis NF's. Utah, Arizona Strip: Partly cloudy with isolated dry thunderstorms over mountains, and hot.	Idaho, Bridger-Teton: 67 to 85 mountains, 80 to 95 valleys. Utah and Arizona Strip: 82 to 98 higher elevations, 95 to 112 valleys.	Idaho, Bridger-Teton: 18 to 29% mountains, 9 to 22% valleys. Utah, Arizona Strip: 2 to 14%	Idaho, Bridger-Teton: Southwest 5 to 15 mph. Utah, Arizona Strip: Southwest 5 to 25 mph.
NORTHERN CALIFORNIA AREA Clear except for areas of morning fog and low clouds along and in the coastal valleys.	From 60s to low 70s along the coast and 80s and 90s inland	12 to 22% inland, except 8 to 14% east of the Sierra Cascade Crest	Southwest to west 6 to 12mph gusts 22 to 24 mph east of the Sierra Cascade Crest.
NORTHERN ROCKIES AREA Mostly Sunny	West of the Divide: 85 to 100 East of the Divide: 80 to 100	West of the Divide: 15 to 25% East of the Divide: 10 to 20%	West of the Divide: Southwest 5 to 10 mph East of the Divide: Southwest to-Southeast 5 to 15 mph
NORTHWEST AREA Partly cloudy except mostly cloudy western Washington.	Generally 70s to mid 80s west of Cascades except 60s along the coast. Highs in the 80s to low 90s east side.	West of Cascades 50 to 70% except 35 to 50% interior southwest Oregon. Eastside ranging from 20 to 35% most areas. Minimums 10 to 20% in southeast Oregon.	No significant wind. Generally west to northwest 5 to 15 mph most areas. Gusts to 25 mph east slopes of Washington Cascades.
ROCKY MOUNTAIN AREA Isolated to widely scattered mainly dry thunderstorms Colorado, Wyoming, and the Black Hills.	Highs mid 80s and 90s (75 to 85 mountains).	8 to 18% western CO. 10 to 20% eastern WY and Black Hills. 20 to 30% Front Range, NE, KS.	South to southeast 15 to 30 mph in NE and 15 to 25mph in SD. West 8 to 18 mph western WY, and variable 5 to 15 mph western CO. South 8 to 18mph eastern WY and eastern CO.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal areas, otherwise mostly sunny.	70 to 85 coastal areas. 85 to 105 mountains. 90 to 110 valleys. 100 to 110 upper desert. 110 to 120 low desert.	5 to 15% deserts. 5 to 15% mountains. 15 to 30% valleys.	Southwest to northwest 5 to 15 mph, except 15 to 25 mph with higher gusts over the deserts.

SOUTHWEST AREA Mostly sunny and hot. A mix of wet and dry thunderstorms New Mexico and AZ.	80 to 90 mountains, mid 90s to near 110 lower elevations.	5 to 14% AZ and NM, 18 to 25% west TX.	Variable 8 to 18 mph. Locally stronger south aspects eastern AZ and western NM Gusts to 45+ near thunderstorms.

UNBURNED FUEL BETWEEN YOU AND THE FIRE

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- To reduce the risks:
 - Post lookouts
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
