

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY AUGUST 4, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5

CURRENT SITUATION:

Initial attack activity was moderate in the Eastern Great Basin and Southern California Areas, and light elsewhere. Nationally, 139 new fires were reported. One new large fire was reported in the Northern Rockies Area. Four large fires were contained, one in the Eastern Great Basin Area and three in the Northern Rockies Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Mann) is assigned to manage the Wedge Canyon, Robert, Trapper Creek Complex and Ross Creek fires on the Flathead and Kootenai National Forests, and the Glacier National Park.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is in sub-alpine fir with down fuels, 20 miles east of Eureka, MT. A tenth of an inch of rain fell on the fire and temporarily suppressed fire activity, creeping ground fires were observed. Evacuations for the Trail Creek have been down graded to a precautionary evacuation status. Structure protection is in place for 100 residences.

ROBERT, Flathead National Forest. A unified command between a Type 1 Incident Management Team (Stam) and Flathead County is in place. This fire is in timber, 8 miles north of Columbia Falls, MT. Fire activity decreased due to light rain, light winds and increased humidity. Active ground fire in heavy fuels with occasional torching was observed. Glacier National Park Headquarters, Apgar Village and private holdings near Fish Creek will reopen today. Structure protection is in place for 200 residences and 24 commercial properties.

TRAPPER CREEK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Raley) is assigned. This complex, comprised of Trapper Creek, Wolf Gun and Paul Bunyan fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. Both the Trapper Creek and the Wolf Gun fires are burning through old burns. Slow burning surface fire due to light rain was observed. The rain is not expected to have an effect on the fire for more than a day or two. The major road through Glacier National Park (Going to the Sun Highway) has been closed from West Glacier Gate to Logan Pass. Smoke continues to impact Glacier National Park, Waterton Lakes National Park, and Lethbridge, Alberta, Canada. Structure protection is in place for three commercial properties.

TOBOGGAN, Idaho Panhandle National Forest. A Type 2 Incident Management Team (Larsen) is assigned. This fire is 12 miles northeast of Wallace, ID. One quarter inch of rainfall has decreased fire activity. Creeping fire in duff was observed.

SLIMS, Nez Perce National Forest. A Type 1 Incident Management Team (Mortier) is assigned. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. Rainfall limited fire spread to occasional torching and flare-ups. Crews are securing the west side of the Meadow Creek drainage.

TREASURE COUNTY COMPLEX, Southern Land Office, Montana Department of Natural Resources and Conservation. This complex is comprised of the Johnny, Earl and Starks fires. These fires are in ponderosa pine, down and dead fuels, sagebrush and grass, eight miles south of Hysham, MT. Significant progress was made on the Starks and Earl fires; the Johnny fire was the most active. Structure protection is in place for 15 residences and two commercial properties.

BOOTH, Southern Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Management Team (Swope) has been ordered. This fire is 17 miles south of Colstrip, MT. Moderate fire spread with some spotting was observed in grass and timber.

BLACK FROG COMPLEX, Bitterroot National Forest. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Blackwall and Frog Pond fires, is in lodgepole pine and mixed conifer with dead and down fuels, 34 miles south of Hamilton, MT. One half inch of precipitation fell over the fire, minimal fire activity was observed. Structure protection is in place for 87 residences and nine commercial properties. Evacuations from Moose Meadows remain in place. Highway 93 is open 24 hours a day with piloted traffic from 0800 to 2000. Highway 43 is open from Lost Trail Pass, east.

PORCUPINE CREEK, Fort Peck Agency, Bureau of Indian Affairs. This fire is in grass and timber, seven miles north of Nashua, MT. Strong winds produced extreme fire behavior with rapid rates of spread.

BIG CREEK, Bitterroot National Forest. This fire is in timber, four miles northwest of Victor, MT. Creeping was observed in isolated interior pockets.

LITTLE SALMON CREEK COMPLEX, Flathead National Forest. A Fire Use Management Team (Wirt) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, which began on July 19, is being managed to accomplish resource objectives. The complex is in fir and lodgepole pine, 47 miles southeast of Kalispell, MT. Wind and fuel driven crown fire with group torching and mid range spotting was observed. The fire will continue to spread south up the South Fork of the Flathead River. Structure protection is in place for six residences. One structure has been confirmed lost.

EASTERN GREAT BASIN AREA LARGE FIRES:

HOT CREEK, Boise National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire is in mixed conifer with heavy fuel loading, three miles west of Atlanta, ID. Minimal fire behavior due to lower temperature, higher humidity, and occasional showers was observed. Evacuations of isolated summer cabins and campers remain in effect. Structure protection is in place for 80 residences and ten commercial properties. Landslides, resulting from rain over the fire area, have closed the Middle Fork Boise River Road between Phifer Creek and Queens River Roads and blocked the river at the confluence of Lake Creek.

NORTH FORK LICK, Payette National Forest. A Type 2 Incident Management Team (Brunner) is assigned. This fire is comprised of the Grimmet and North Fork Lick fires. These fires are in sub-alpine fir with dead and down fuels, 18 miles northeast of McCall, ID. These fires are being managed in a confine/contain strategy. The Grimmet fire is contained. Minimal fire behavior was observed. Increase in acreage is due to more accurate mapping on the North Fork Lick fire.

LOST PACKER COMPLEX, Salmon-Challis National Forest. This complex, comprised of the Waugh, Upper West Horse and Horse fires, is 36 miles northwest of Salmon, ID. Minimal fire behavior was observed in sub-alpine fir, mixed conifer and grass. Fires are in monitor status.

JOE HATCH, Moab Field Office, Bureau of Land Management. This fire is in Douglas fir and mountain brush, 25 miles north of Green River, UT. No new information was received.

CRYSTAL CREEK, Salmon-Challis National Forest. This fire is in sub-alpine fir, brush and grass, 18 miles north/northwest of Stanley, ID. No new information was received.

NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A transfer of command from Anderson's Type 1 Incident Management Team to Lohrey's Type 1 Incident Management Team will occur on 8/5. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Minimal fire behavior was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
FAWN PEAK COMPLEX	WA	OWF	75,555	57	UNK	954	23	23	17	0	31.2M

ROCKY MOUNTAIN AREA LARGE FIRES:

LANGLAS DRAW, White River National Forest. This fire is in fir, ponderosa pine, aspen and oak brush, 25 miles southeast of Meeker, CO. Minimal fire behavior with occasional interior torching was observed. Structure protection is in place for nine residences.

RED CREEK 3, Casper Field Office (East Zone), Bureau of Land Management. This fire is 12 miles south of Casper, WY. Smoldering and isolated burning were observed in ponderosa pine, grass and down timber.

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. This fire is in ponderosa pine, pinyon pine and juniper, 20 miles southwest of Buffalo, WY. Intermittent interior torching was observed. Fire spotted into the north drainage of Poison Creek. Structure protection is in place for 6 residences.

SOUTHWEST AREA LARGE FIRES:

BLUE RIVER COMPLEX, Apache-Sitgreaves National Forest. This complex, comprised of the Steeple, Largo and Thomas fires, is in ponderosa pine, mixed conifer, pinyon pine, brush and grass, 18 miles south of Alpine, AZ. No new information was received.

SPRUCE COMPLEX, Gila National Forest. This complex, comprised of the Spruce, Silver, Nabours, Parallel, Sacaton, Rain, and House fires, is in brush, ponderosa pine and mixed conifer, 18 to 20 miles east, southeast and northeast of Glenwood, NM. No new information was received. This will be the last report unless new information is received.

OUTLOOK:

Weather Discussion: The general weather pattern features a high pressure ridge along the Rockies and a low pressure trough off the West Coast. One disturbance is through eastern Montana and the Dakotas while another moves onshore late today in northern California and Oregon. A drier southwest flow is pushing into southern California, portions of the Great Basin and the Southwest.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Generally warming and drying. A slight chance of mountain showers and thunderstorms over Idaho and eastern Utah.	Idaho, Bridger-Teton: 70 to 86 mountains, 80 to 91 valleys. Utah and Arizona Strip: 70 to 92 higher elevations, 86 to 99 valleys.	Idaho, Bridger-Teton: 20 to 35% mountains, 17 to 30% valleys. Utah, Arizona Strip: 17 to 32% mountains, 13 to 26% valleys.	West or upslope 5 to 15 mph.
NORTHERN CALIFORNIA AREA Night and morning coastal fog and low clouds. Elsewhere mostly sunny in the morning becoming partly cloudy in the afternoon over the higher elevations in the north with a chance of showers and thunderstorms.	60s and 70s near the coast and in the mountains. Low 80s to low 90s inland valleys.	25 to 35% driest inland areas.	Southwest to west 6 to 12 mph in the afternoons with higher gusts.
NORTHERN ROCKIES AREA Partly cloudy. Isolated thunderstorms, mainly south-central and eastern Montana.	West of the Divide: 70 to 90 East of the Divide: 75 to 95	20 to 30%	West of the Divide: southwest to northwest 5 to 15 mph. East of the Divide: west to northwest 10 to 20 mph.
NORTHWEST AREA Partly cloudy. Scattered wet thundershowers possible in Oregon from the crest of the Cascades eastward.	Highs generally in the 70s and 80s.	Generally 30 to 50% west of the Cascades and 20 to 35% eastside with isolated valleys near 15%.	General winds less than 15 mph except to 20 mph near the Columbia River Gorge.
ROCKY MOUNTAIN AREA Becoming partly cloudy with isolated thunderstorms.	85 to 95 lower elevations, 70s in the mountains.	14 to 20% western slope of Colorado and southwest Wyoming. 20 to 30% elsewhere.	Variable 5 to 15 mph.
SOUTHERN CALIFORNIA A few cumulus Sierra Crest. Morning coastal fog. Otherwise sunny.	65 to 80 coastal areas. 75 to 90 mountains. 85 to 95 valleys. 90s upper desert. 95 to 110 low desert.	10 to 20% mountains and deserts. 20 to 35% valleys. 40 to 50% coast.	Southwest 10 to 20 mph.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

NO COMMUNICATION LINK WITH CREW MEMBERS, SUPERVISORS & ADJOINING FORCES

Watchout Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communications be established?
 - Talk about how communications are set up on fires.
 - Review situations where communications were a problem and what was done to fix the problem.

- Is the communication triangle complete?
 - Review the communication triangle and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
 - Discuss ways that firefighters can maintain the communication triangle on the fireline.

- Reduce the risks
 - If the situation is complex, wait until communications are in place.
 - Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications.
