

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY JUNE 14, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 73 fires reported. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Texas, Utah and Wyoming.

SOUTHWEST AREA LARGE FIRES:

SEDGWICK, Cibola National Forest. A Type 2 Incident Management Team (Winchester) is assigned. This fire is 17 miles west of Grants, NM in ponderosa pine. Inaccessible terrain and smoke along the Interstate 40 corridor are major concerns. Short runs caused by terrain driven winds were reported.

THREE FORKS, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is 11 miles west of Alpine, AZ in ponderosa pine and mixed conifer. Individual and group tree torching in unburned islands of fuel was observed. Structure protection remains in place for the community of Nutrioso.

PEPPIN, Lincoln National Forest. This fire is six miles northeast of Capitan, NM in timber. Steep terrain, poor accessibility, heavy fuel loading, prolonged drought and high winds are ongoing concerns. Crown runs were observed in isolated pockets of fuel in the interior. Crews continue to perform burn out operations and work on isolated hot spots.

KP, Apache-Sitgreaves National Forest. This fire is 20 miles south of Alpine, AZ in brush and mixed conifer. No new information was reported. This will be the last report unless new information is received.

GREASEWOOD - WFU	CO	WRD	7,528	N/A	N/A	46	0	5	1	0	155K

OUTLOOK:

Weather Discussion: High pressure continues to strengthen over the West with a dry westerly flow over most areas. However, a weak upper trough will be moving into southern California.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHWEST AREA Mostly sunny and very dry with locally breezy conditions.	60s and 70s mountains 80s and 90s lower elevations 100 to 105 southwest Arizona deserts	5 to 15%	West to southwest 10 to 20 mph with some higher gusts, except south to southeast 10 to 20 mph in the eastern plains of New Mexico and west Texas.
ROCKY MOUNTAIN AREA Breezy with isolated mixed wet/dry thunderstorms in the Front Range of Colorado. Isolated wet thunderstorms in the eastern plains.	70s and 80s for most of the Rocky Mountain Area 60s and 70s in the mountains 80s and 90s in the eastern Rocky Mountain Area	Less than 15% southwest Colorado Less than 20% in western/eastern Colorado and southeast Wyoming	West wind 10 to 20mph over western sections of the Rocky Mountain Area. Southeast wind 10 to 20mph for eastern Rocky Mountain Area.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog into the coastal valleys, otherwise partly cloudy with scattered afternoon showers and thunderstorms over Central California from the Sierra eastward.	70 to 80 coastal areas 70 to 85 mountains 80 to 90 valleys 80 to 90 upper deserts 95 to 105 lower deserts	20 to 35%	Southeast to southwest 5 to 15 mph.
WESTERN GREAT BASIN Mostly sunny with afternoon cumulus and a slight chance of afternoon thunderstorms over the Sierra.	North Valleys: 80s to low 90s South Valleys: 90s to 104 Mountains: 70s to mid 80s	North: 12 to 20% South: 5 to 12% Mountains: 15 to 25%	North: northwest to north at 5 to 15 mph. South: south to southwest at 5 to 10 mph.

WORKING WITH HELICOPTER DROPS

Consider the following questions when you have a helicopter with a bucket working in your area:

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- Are other aircraft in the area?
- Are people on the ground aware of the effects of the helicopter's rotor wash?
- Will terrain and obstructions allow the helicopter to attain the proper drop height?
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
