

**INCIDENT MANAGEMENT SITUATION REPORT**  
**WEDNESDAY, JULY 14, 2004 – 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Southern California, Alaska and Eastern Great Basin Areas, and light elsewhere. Nationally, 243 fires were reported. Five new large fires were reported, four in the Southern California Area and one in the Alaska Area. Two large fires were contained in the Southern California Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Florida, Idaho, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Texas, Utah and Wyoming.

**ALASKA AREA LARGE FIRES:**

EVANSVILLE, Tanana Zone, Bureau of Land Management. This fire is one half mile southeast of Bettles, AK in black spruce. Fire behavior was extreme due to strong winds and hot dry weather; crown fire and spotting were observed. Firefighters completed two miles of burnout.

EAGLE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Cones) is assigned. This complex, consisting of the American Summit, Edwards Creek, King Creek, Kandik River, Indian Grave Creek, Deer Creek and seven additional fires, is located three miles northeast of Eagle, AK in tundra, black spruce and mixed hardwoods. Fire activity moderated due to higher relative humidity levels.

TAYLOR COMPLEX, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This complex, comprised of the Wall Street, Billy Creek, Gardiner Creek, Big Creek, Anomaly, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Extreme fire behavior continued; torching and crowning runs occurred in areas of continuous fuels and exposed slopes.

CENTRAL COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Chrisman) is assigned. This complex, comprised of the Middle Birch Creek, Birch Creek, Rock Creek, Crazy and Tokoma Bluffs fires, is one mile south of Central, AK in timber. Fire activity was extreme due to high winds and low relative humidity levels.

BOUNDARY, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Hart) is assigned. This fire is 20 miles northeast of Fairbanks, AK in alpine tundra and black spruce. Fire behavior moderated with some cloud and smoke cover. Short crown runs in black spruce were observed.

SOLSTICE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Bird) is assigned. This incident is 57 miles northwest of Fort Yukon, AK in black spruce and tundra. The complex consists of the Pingo, Winter Trail, Sucker River, Black Currant River, Vundik Lake, Boulder Creek and Sheenjek fires. Heavy smoke obscured the fire area. Flanking and backing fires were observed.

YUKON CROSSING COMPLEX, Upper Yukon Zone, Bureau of Land Management. This complex includes the previously reported Waldron Creek and Fort Hamlin Hills fires. This complex is ten miles southwest of Stevens Village, AK in black spruce and tundra. Extreme fire behavior was observed.

WOLF CREEK, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. Active fire was backing into the wind with torching and intermittent uphill runs.

CAMP CREEK, Delta Area Forestry, Alaska Division of Forestry. This fire is 23 miles northwest of Delta Junction, AK in tundra and spruce. The fire made a significant run.

LOWER MOUTH, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. Extreme fire behavior was reported with torching, crowning and significant runs.

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

VERBENIA, Riverside Unit, California Department of Forestry and Fire Protection (CDF). A Type 2 Incident Management Team (McCormick) is assigned. This fire is 10 miles northwest of Palm Springs, CA in grass and chaparral. Extreme fire behavior with long range spotting and several upslope runs was reported.

PINE, Los Angeles County Fire Department. A Type 1 Incident Management Team (Gelobter) has been ordered. This fire is 14 miles southeast of Lebec, CA in heavy brush. Erratic winds caused the fire to spot numerous times over containment lines. Significant runs driven by wind and slope were reported.

MATAGUAY, Monte Vista Unit, California Department of Forestry and Fire Protection. This fire is 14 miles southwest of Ranchita, CA in chaparral and grass. Extreme fire behavior with rapid rates of spread and spotting was observed. Ranchita's outlying areas are being evacuated.

LAKEVIEW, Riverside Unit, California Department of Forestry and Fire Protection. This fire is two miles southeast of Sedco Hills, CA in brush and grass. A mandatory evacuation of 70 to 100 structures affecting 200 to 300 people is in place. Fire behavior was extreme, with rapid rates of spread and spotting observed.

PETERSON, Fresno-Kings Unit, California Department of Forestry and Fire Protection. A CDF Type 1 Incident Command Team (Kerrigan) is assigned. This fire is 30 miles northeast of Fresno, CA in timber and brush. Minimal fire activity was reported. Reduction in acreage is due to more accurate mapping.

MEADOW, Yosemite National Park. A Fire Use Management Team has been ordered. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is seven miles southeast of Yosemite Village, CA in timber. Fire behavior was very active due to low relative humidities. The fire made a significant run to the north. Torching, isolated crown runs and spotting up to one mile were observed.

### SOUTHWEST AREA LARGE FIRES:

NUTTALL COMPLEX, Coronado National Forest. A transfer of command occurred from a Type 1 Incident Management Team (Oltrogge) to a Type 2 Incident Management Team (Winchester). This complex, located 15 miles southwest of Safford, AZ in brush and heavy timber, consists of the Clark, Nuttall and Gibson fires. Moderate fire behavior was reported on some parts of the fires. Some surface spread occurred in areas of heavy fuels.

WILLOW, Tonto National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is six miles southwest of Payson, AZ in timber, grass and chaparral. Some fire activity was observed in unlined portions of the fire adjacent to extreme terrain.

JACKET, Coconino National Forest. This fire is 13 miles southeast of Winona, AZ in grass, juniper and pinyon pine. No new information was received. This will be the last report unless new information is received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
NUTTALL COMPLEX	AZ	CNF	29,400	75	7/19	415	6	14	2	1	9.2M

### ROCKY MOUNTAIN AREA LARGE FIRES:

SADDLE MOUNTAIN, Delta County. A Type 2 Incident Management Team (Mullenix) is assigned. A transfer of command from a Type 2 Incident Management Team (Mullenix) to a Type 3 organization will occur at 0600 MDT. This fire is five miles east of Crawford, CO in Douglas fir, oak brush, aspen and pinyon pine. Minimal fire behavior was reported.

OIL SPRINGS, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is 27 miles south of Rangely, CO in pinyon pine, juniper, sagebrush and grass. Isolated single and group tree torching were observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

### WESTERN GREAT BASIN AREA LARGE FIRES:

CHROME, Ely Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Muir) is assigned. A transfer of command from a Type 2 Incident Management Team (Muir) to a Type 3 organization will occur at 0700 MDT. This fire is 45 miles northwest of Ely, NV in pinyon pine, juniper, sagebrush and grass. Fire behavior was minimal. Rehabilitation of the dozer line was completed.

## OUTLOOK:

**Weather Discussion:** More hot weather is on tap for the West as the areas remains under a strong ridge of high pressure. With the high centered over Colorado, moisture continues to circulate out of the Southwest into the Great Basin and the southern California mountains and deserts. In the Pacific Northwest, there is the threat of thunderstorms over the Cascades. In Alaska, high pressure will bring warm, dry weather to the area.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>ALASKA AREA</b> Central and Eastern Interior: Partly cloudy. A chance of scattered thunderstorms in the afternoon.	Central and Eastern Interior: 70 to 90.	Central and Eastern Interior: 20 to 37%.	Central and Eastern Interior: Southwest 10 to 15 mph with some gusts to 20 mph over higher terrain.
<b>SOUTHERN CALIFORNIA AREA</b> Areas of morning low clouds and fog coastal areas. Otherwise, partly cloudy with scattered showers and thunderstorms over the mountains and deserts of Southern California and a slight chance of afternoon showers and thunderstorms over the Sierra.	75 to 85 coastal areas. 80 to 95 mountains. 90 to 105 valleys. 90 to 105 upper deserts. 100 to 115 lower deserts.	15 to 30% valleys 10 to 30% mountains. 15 to 30% deserts.	Southeast to southwest at 10 to 20 mph.
<b>SOUTHWEST AREA</b> Partly cloudy. Widely scattered to scattered thunderstorms eastern and central AZ, western and northern NM.	Upper 60s to 80s mountains and mostly 90s lower elevations, except 100 to 105 southern, western AZ deserts.	5 to 20% northern AZ, northwestern NM, southwest TX, 20 to 30% remainder.	South to southeast 5 to 15 mph with higher gusts much of NM into extreme eastern AZ, west to southwest 5 to 15 mph western and northern AZ, south to southeast 10 to 20 eastern NM and west TX.
<b>NORTHWEST AREA</b> Isolated to scattered thunderstorms likely mainly in the Cascades.	Hot: Highs in 80s and 90s locally to 100 in the Columbia Basin.	West of Cascades: 25 to 35% north and down to 20% interior SW Oregon. East of Cascades: Very dry. Mostly 5 to 15%	West of Cascades: Westerly 5 to 12 mph. Eastside: Easterly 5 to 15 mph.
<b>ROCKY MOUNTAIN AREA</b> Isolated showers and scattered afternoon thunderstorms, mainly South Dakota and Colorado.	Highs in 90s. 70s and 80s mountains.	10 to 20% Wyoming and southeast Colorado. 25 to 40% elsewhere.	Variable at 5 to 15 mph.
<b>EASTERN GREAT BASIN</b> <b>Idaho, Bridger-Teton:</b> Mostly sunny, hot, and dry west. Partly cloudy with widely scattered wet and dry thunderstorms east. <b>Utah, Arizona Strip:</b> Partly cloudy with widely scattered wet and dry thunderstorms.	<b>Idaho, Bridger-Teton:</b> 70 to 84 mountains. 86 to 100 valleys. <b>Utah and Arizona Strip:</b> 77 to 91 mountains. 87 to 103 valleys.	<b>Idaho, Bridger-Teton:</b> 18 to 30% western Wyoming and Payette. 7 to 20% elsewhere. <b>Utah, Arizona Strip:</b> 18 to 37% mountains. 13 to 22% valleys.	<b>Idaho, Bridger-Teton:</b> Light and variable winds 5 to 10 mph except strong gusty winds over 40 mph near storms. <b>Utah, Arizona Strip:</b> Light and variable winds 5 to 10 mph except strong gusty winds over 40 mph near storms.

<p><b>WESTERN GREAT BASIN AREA</b> Isolated wet/dry thunderstorms northeast to southwest, wet thunderstorms southeast, sunny across the northwest with breezy afternoon winds.</p>	<p>North: 85 to 99. South: 92 to 105. Mountains: 75 to 90.</p>	<p>South Valleys: 10 to 20%. West Valleys: 5 to 15%. East Valleys: 15 to 25%. Mountains: 15 to 25%.</p>	<p>Northwest: SW at 10 to 20 mph with localized gusts 25 to 30 mph. Elsewhere: SSW at 5 to 15 mph.</p>
<p><b>NORTHERN CALIFORNIA AREA</b> Mostly clear except for night and morning coastal low clouds and fog.</p>	<p>60s to low 70s coast, with the warmer inland valleys 90s to near 101.</p>	<p>8 to 18% drier inland areas.</p>	<p>South to West 5 to 13 mph in the p.m. hours, with gusts to mid 20s on higher exposed terrain in the north and eastern sections.</p>
<p><b>NORTHERN ROCKIES</b> Partly cloudy with a chance of isolated thunderstorms along the Divide.</p>	<p>Middle 90s low elevations to upper 80s higher terrain.</p>	<p>12 to 23%.</p>	<p>Generally southwest 5 to 15 mph.</p>

### **UNBURNED FUEL BETWEEN YOU AND THE FIRE**

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- To reduce the risks:
  - Post lookouts
  - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
