

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY AUGUST 14, 2004 – 0800 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was heavy in the Northwest and Western Great Basin Areas, moderate in the Northern California and Southern California Areas and light elsewhere. Nationally, 290 new fires were reported. Four new large fires were reported, three in the Northwest Area and one in the Southern Area. Four large fires were contained, one each in the Southern California, Northern California, Northwest and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

FISCHER, Okanogan-Wenatchee National Forest. A transfer of command from a Washington State Interagency Incident Management Team (Reed/Holloway) to a Type 1 Incident Management Team (Anderson) occurred. This fire is four miles southeast of Leavenworth, WA in grass, brush and timber. Active fire behavior with spotting was observed. Crews are working on a spot fire at the north end of the fire.

POT PEAK/SISI RIDGE COMPLEX, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Furlong/Gormley) is assigned. This complex, comprised of the Pot Peak, SiSi Ridge and Deep Harbor fires is 15 miles northwest of Chelan, WA in timber. Warmer, drier weather increased fire activity on all fires; torching, short crown runs and short range spotting were reported.

MUD LAKE, Washington Department of Natural Resources, Southeast. A Washington State Interagency Incident Management Team (Berndt/Andring) is assigned. This fire is seven miles northwest of Naches, WA in grass, brush and timber. Fire activity was low due to an inversion. Crews secured fireline and began mopping up.

MEBEE PASS, Okanogan-Wenatchee National Forest. A Washington State Interagency Incident Management Team (Jennings/Perry) is assigned. The team is also managing the Freezeout fire. This fire is 30 miles northwest of Winthrop, WA in timber. Backing fire with single tree torching was reported.

FREEZEOUT, Okanogan-Wenatchee National Forest. A transfer of command from a Washington State Interagency Incident Management Team (Jennings/Perry) to a Fire Use Management Team (Cook) will occur today. This fire is 65 miles northeast of Bellingham, WA in timber. A joint U.S. Forest Service/British Columbia Forest Service helibase has been established in Manning Park, Canada to support air operations. No new information was received.

RATTLESNAKE PEAK, Okanogan-Wenatchee National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 40 miles west of Yakima, WA in timber, is being managed to accomplish resource objectives. Fire activity increased with torching and moderate spread through ground fuels.

GRASSY, Fremont National Forest. A Type 2 Incident Management Team (Paul) has been ordered. This fire is 20 miles northeast of Lakeview, OR in timber, brush and cheatgrass. Extremely active fire behavior with individual and group tree torching, running and short range spotting was observed.

JIM WHITE RIDGE, Wallowa-Whitman National Forest. This lightning-caused Wildland Fire Use (WFU) incident, located five miles east of Cove, OR in heavy dead and down timber, is being managed to accomplish resource objectives. Active fire behavior with torching and spotting was observed.

HAZEL 2, Wallowa-Whitman National Forest. This lightning-caused Wildland Fire Use (WFU) incident, located 21 miles east of La Grande, OR in subalpine fir, timber and understory, is being managed to accomplish resource objectives. Torching, short runs and spotting were reported.

ALASKA AREA LARGE FIRES:

CENTRAL COMPLEX, Bureau of Land Management, Upper Yukon Zone. A transfer of command from a Type 2 Incident Management Team (Morcom) to a Type 1 Incident Management Team (Frye) will occur at 0800 ADT. This complex, comprised of the Crazy, Bolgen Creek and Wolf Creek fires, is surrounding Central, AK in spruce and hardwoods. Most fires in the complex experienced gusty winds, resulting in wide spread torching and numerous crown runs. Crews are constructing and reinforcing fireline for structure protection.

TAYLOR HIGHWAY COMPLEX, Alaska Division of Forestry, Tok Area Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Major runs were observed on the Porcupine and Billy Creek fires; the Gardiner Creek fire continued to spread toward the Alaska Highway; the Chicken fire experienced increased fire activity.

BOUNDARY, Alaska Division of Forestry, Fairbanks Area Forestry. This fire is 20 miles northeast of Fairbanks, AK in black spruce and tundra. Moderate fire behavior was reported.

NORTHERN CALIFORNIA AREA LARGE FIRES:

BEAR, California Department of Forestry and Fire Protection (CDF), Shasta-Trinity Unit. A Type 1 Incident Management Team (Chuchel) is assigned. This fire is ten miles northeast of Redding, CA in grass and brush. Active fire behavior with spotting was reported. Crews made limited progress with burnout operations and fireline improvement. Some evacuees were allowed back into the area.

EASTERN GREAT BASIN AREA LARGE FIRES:

MIDDLE RIDGE, Bureau of Land Management, Cedar City Field Office. This fire is located 34 miles northwest of St. George, UT in pinyon pine and juniper. No new information was reported.

SALT CREEK, Bureau of Land Management, Richfield Field Office. This fire is nine miles south of Levan, UT in pinyon pine, sagebrush and grass. Minimal fire behavior with smoldering was reported.

PORTER, Salmon-Challis National Forest. A Fire Use Management Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located 25 miles northwest of Stanley, ID in timber, is being managed to accomplish resource objectives. No further information was received.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

DEEP, Sequoia National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This fire is 18 miles northeast of Porterville, CA in chaparral. Rapid rates of spread and spotting were reported. Evacuations remain in effect for the Mountain Home area, Wishon, Upper and Lower Coffee Campgrounds, Wishon drainage and Doyle Springs. State Highway 190 remains closed.

EARLY, Stanislaus National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is located 15 miles northeast of Groveland, CA in brush and timber. Smoldering and isolated hot spots were observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

TCU = California Department of Forestry and Fire Protection (CDF), Tuolumne-Calaveras Unit

SOUTHWEST AREA LARGE FIRES:

HUMBOLDT, Tonto National Forest. This fire is 12 miles northeast of Carefree, AZ in chaparral, hardwood slash and grass. Thunderstorm activity increased fire behavior.

PITCHFORK, Gila National Forest. This lightning-caused Wildland Fire Use (WFU) incident, located 21 miles southeast of Reserve, NM in timber, logging slash and grass, is being managed to accomplish resource objectives. No new information was reported.

TXS = Texas Forest Service

OUTLOOK:

Red Flag Warning: Southwest Idaho, south of the Snake River, for dry lightning.

Fire Weather Watch: Central Idaho, including Payette, Boise and Salmon-Challis National Forests, and most of northwest through southeast Utah for dry lightning.

Weather Discussion: Thunderstorms will continue to develop along the Sierra, in the Great Basin and in the Northwest today as monsoonal moisture is drawn up from the south. Some of the thunderstorms are expected to be dry, especially in northern Nevada, the Northwest and Idaho. Very warm and dry conditions will be in place over much of the eastern Northern Rockies. In Alaska, widespread showers are expected in the morning. In the Southeast, hurricane Charley will emerge back into the Atlantic Ocean and move onto the South Carolina Coast.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHWEST AREA Partly cloudy. Scattered, mainly dry, thunderstorms from the Cascades eastward in the late afternoon and into the night.	West of the Cascades: 80s north. Near 100 south. Mid 60s to lower 70s coast. East of the Cascades: Upper 80s to 104.	West of Cascades: 15 to 25% Cascades and Southwest interior. 60% coast. 25 to 40% elsewhere. East of the Cascades: 9 to 19% most areas.	West to northwest 10 to 20 mph along the coastal strip. Variable 5 to 10 mph inland, favoring upslope/upvalley. Erratic wind in the vicinity of the surface thermal trough.
ALASKA AREA Eastern Interior: Partly to mostly cloudy with rain central and north; a chance of rain east.	Eastern Interior: 60s to low 70s.	Eastern Interior: 45 to 55%.	Eastern Interior: West to southwest 5 to 15 mph.
NORTHERN CALIFORNIA AREA Mostly sunny becoming partly cloudy east of the Cascade/Sierra crest with a 30% chance of afternoon and evening thunderstorms. Ten percent chance of afternoon thunderstorms over the northwest mountains.	60s coast. 80s to low 90s higher elevations. Mid 90s to 103 inland valleys.	12 to 25%.	Southeast to southwest 4 to 12 mph with local afternoon gusts to 22 mph.
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Partly cloudy with isolated to widely scattered dry thunderstorms. Utah, Arizona Strip: Partly cloudy with widely scattered to scattered thunderstorms which will be mainly wet in the southwest; dry elsewhere.	Idaho, Bridger-Teton: 77 to 88 mountains. 70 to 80 western Wyoming mountains. 88 to 99 valleys. Utah and Arizona Strip: 70 to 85 mountains. 82 to 98 lower elevations. 98 to 108 Lake Mead.	Idaho, Bridger-Teton: 15 to 30% mountains. 11 to 18% valleys. Utah, Arizona Strip: 30 to 50% southern mountains. 20 to 30% northern and central mountains. 13 to 25% valleys.	Idaho, Bridger-Teton: Northwest to west 5 to 10 mph, gusty around thunderstorms. Utah, Arizona Strip: Southwest to west 5 to 10 mph, except upslope/upvalley central Utah.

SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal basins. Otherwise, partly cloudy with a few thunderstorms over the Sierra eastward and over the mountains and deserts of Southern California east of Cajon pass.	65 to 80 coast. 80 to 95 mountains. 85 to 95 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	25 to 40% valleys. 20 to 35% mountains. 15 to 30% deserts.	Southeast to southwest 5 to 15 mph.
WESTERN GREAT BASIN AREA Thunderstorms with showers.	84 to 98 valleys. 78 to 89 mountains.	15 to 25% valleys. 25 to 35% mountains.	South to west at 5 to 15 mph with localized gusts near storms to 40 mph.
NORTHERN ROCKIES AREA Isolated dry thunderstorms northern Idaho; mostly sunny skies elsewhere.	West of Continental Divide: 92 to 101. 95 to 106 Idaho. East of Continental Divide: 70s. 85 to 93 North Dakota. 65 to 75 mountains.	West of Continental Divide: 12 to 18% Idaho. 8 to 18% elsewhere. East of Continental Divide: 25 to 35% North Dakota. 14 to 18% elsewhere.	West of Continental Divide: Valley 5 to 10 mph. East of Continental Divide: Southeast-northeast 5 to 10 mph except west at 5 mph in North Dakota.

SERIOUS INJURY PROCEDURES

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the IC, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
 - Number of people injured
 - Type of injuries
 - Severity of injuries (light, moderate, severe, life threatening)
 - Mechanism of injury
 - Vital signs (pulse, respirations, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines; and document any other pertinent information.
