

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY SEPTEMBER 22, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally, with 57 new fires reported. One new large fire was reported in the Southern Area. One large fire was contained in the Rocky Mountain Area. Very high to extreme fire indices were reported in Arizona, California, Nebraska and Nevada.

A Presidential Disaster Declaration was issued on 9/4 for Hurricane Frances in Florida and another was issued on 9/16 for Hurricane Ivan in Alabama, Florida, Louisiana and Mississippi. An Area Command Team (Ribar) is assigned to the Florida Disaster Field Office, Orlando, FL. An Area Command Team (Williams-Rhodes) is assigned to the Federal Emergency Management Agency Regional Operations Center, Atlanta, GA. Numerous resources have been mobilized as part of the relief effort, including aviation assets, mobile caterers and showers, national buying teams, Type 1 crews and miscellaneous overhead personnel.

SOUTHERN AREA INCIDENTS:

HURRICANE FRANCES / IVAN RESPONSE, Federal Emergency Management Agency (FEMA). A Type 1 Incident Management Team (Bennett) is managing a base camp in Pensacola, FL. A Type 1 incident Management Team (Sexton) is managing a staging area at Maxwell Air Force Base, Montgomery, AL. A Type 1 Incident Management Team (Ferguson) is assigned to Eglin Air Force Base, Pensacola, FL and is supporting the receiving and distribution of supplies, and managing a base camp. A Type 1 Incident Management Team (Anderson) has been assigned to Milton, FL and is supporting the receiving and distribution of supplies, and managing a base camp. A Type 1 Incident Management Team (Wilcock) is assigned to the Alabama State Emergency Operations Center in Escambia County, AL. A Type 1 Incident Management Team (Lohrey) is supporting the receiving and distribution of supplies in Baldwin County, AL. A North Carolina State Type 2 Incident Management Team (Houseman) is assigned to the Jacksonville Naval Air Station, Jacksonville, FL and is supporting the receiving and distribution of relief supplies. Four Florida State Type 2 Incident Management Teams (Beauchamp, Hill, Jones and Koehler) are assigned in Pensacola, Eglin Air Force Base and Lakeland, FL. The Teams are running Logistics Staging Areas and handling the receiving and distribution of relief supplies.

NEWTON, Texas Forest Service. This fire is 40 miles northeast of Beaumont, TX in a pine plantation. Fire behavior was very active with crowning due to high winds.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BIG WIND	WY	WRA	200	100	---	41	1	6	0	10	100K

WRA = Bureau of Indian Affairs, Wind River Agency

OUTLOOK:

Red Flag Warning: For strong northeast winds and low relative humidity levels over the mountains and below the canyons and passes of Southern California.

Weather Discussion: Surface high pressure over the Great Basin will continue to produce dangerous Santa Ana winds across southern California through the early afternoon. The winds are expected to diminish this evening as pressure gradients relax. An upper level low pressure system will move toward the Dakotas' today, allowing continued warming and drying across most of the Intermountain West.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA AREA Sunny.	85 to 95 coastal areas. 65 to 80 mountains. 85 to 90 valleys. 70 to 80 upper deserts. 85 to 95 lower deserts.	8 to 15% mountains, valleys and deserts.	Northeast to east 20 to 30 mph with higher gusts over the mountains and below the canyons and passes of Southern California; otherwise southeast to southwest 5 to 15 mph.
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Partly cloudy. Scattered rain or snow showers mainly western Wyoming mountains. Northern Utah: Partly cloudy with scattered rain or snow showers, mainly in the mountains. Southern Utah, Arizona Strip: Partly cloudy.	Idaho, Bridger-Teton: 45 to 65 mountains, 60 to 75 valleys. Northern Utah: 38 to 50 mountains, 50 to 65 valleys. Southern Utah, Arizona Strip: 45 to 60 mountains, 60 to 80 valleys, except 80 to 90 Lake Mead area.	Idaho, Bridger-Teton: 40 to 60% mountains, 20 to 40% valleys. Northern Utah: 40 to 60% mountains, 25 to 40% valleys. Southern Utah, Arizona Strip: 30 to 50% mountains, 15 to 30% valleys.	Idaho, Bridger-Teton: Northwest to west 5 to 10 mph. Northern Utah: Northwest 4 to 8 mph. Southern Utah, Arizona Strip: North 4 to 8 mph.
WESTERN GREAT BASIN AREA Mostly sunny.	North valleys: 62 to 78. South valleys: 78 to 88. Mountains: 52 to 67.	North valleys: 12 to 27%. North mountains: 15 to 30%. South valleys: 8 to 16% South mountains: 10 to 25%.	Southwest to northeast at 5 to 15 mph.

INITIAL ATTACK FIRE SIZEUP/SAFETY

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

- Use the following reporting factors for sizeup. Discuss others that may be used.
 - Fire name and location
 - Terrain (slope, aspect, elevation) and position of fire on the slope
 - Size of fire
 - Fuel type, anticipated control problems, and spread potential
 - Values threatened
 - Weather conditions (wind speed and direction)
 - Fire behavior
 - Resources on the fire and those needed
 - Estimated containment and control times
 - Cause (known, suspected, under investigation)

- After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.
 - Have you sized up the fire and relayed the information to dispatch?
 - Is the observed fire weather consistent with the forecast?
 - Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
 - Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
 - Are lookouts in place or can you see all of the fire area?
 - Can you communicate with everyone on the fire and with dispatch?
 - Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
 - Are safety and the standard fire orders being followed?
 - Do you have a complete list of what resources have been ordered for the fire?
 - Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
