

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, FEBRUARY 11, 2005 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 484 new fires reported for the week. No large fires were reported for the week.

OUTLOOK:

Red Flag Warnings: Red flag warnings for much of Florida today and Saturday due to gusty winds and low relative humidity.

Weather Discussion: Gusty winds and low humidity are expected over Florida and other portions of the Southeast today and Saturday. A cold front will bring showers to that region Sunday and Monday before dry weather returns Tuesday through Thursday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Heavy rain Southern California with lighter amounts over Inyo and the Sierra. Cloudy elsewhere. Snow level 8,000 ft.	45 to 60 mountains. 55 to 65 valleys. 55 to 60 upper deserts. 60 to 70 lower deserts.	70 to 80%.	Southeast 10 to 18 mph.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?

- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
