Weather Discussion: Very warm high pressure will continue to dominate weather over much of the West today. The best chance for thunderstorms will be across the eastern two-thirds of New Mexico and southeast Colorado, where a backdoor front has entered the region. In Florida, the panhandle will see very low relative humidity today.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Mostly sunny and warm most of AZ. Partly to mostly cloudy and cooler NM and west TX with scattered thunderstorms, some dry across western NM.	50s to 80s mountains, eastern NM and west TX. 80s to near 105 lower elevations AZ & NM.	5 to 20% AZ and western NM, 20 to 40% central NM, 40 to 60%+ eastern NM & west TX.	W to SW 5 to 15 mph with gusts to 20 to 25 mph AZ and western NM, S to E 10 to 25 mph eastern NM and west TX.

HELICOPTER LANDING AREA SAFETY

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter.
- Always get the approval of a flight crewmember or the pilot before approaching a starting or operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember.
- When approaching or departing an operating helicopter, never approach or depart uphill and do not hold equipment overhead.
- Always approach and depart an operating helicopter on the downhill side.
- Remove or secure loose articles when working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
