

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, MAY 31, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 79 new fires reported. One new large fire was reported in the Southwest Area. Very high to extreme fire indices were reported in Alaska and Arizona.

ALASKA AREA INCIDENTS / LARGE FIRES:

DOT LAKE, Tok Area Forestry. This fire is 50 miles northwest of Tok, AK in black spruce, mixed hardwoods, and brush. Residences, community buildings, a school, and the Alaska Highway remain threatened. Isolated torching and creeping were reported.

OUTLOOK:

Weather Discussion: High pressure is beginning to build over the Southwest as the trough that was over the Great Basin on Monday is now moving east of the Rockies. In Alaska, a southeast flow aloft is bringing cooler temperatures and higher humidity to the interior and western areas.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Mostly sunny to partly cloudy most areas. Partly to mostly cloudy far eastern areas with isolated to widely scattered thunderstorms mainly in west Texas.	50s to 70s mountains. 80s and 90s lower elevations.	8 to 15% far western and northern AZ, parts of central and southern NM, 20 to 35%+ remainder of AZ & NM and west TX.	SW 10 to 20 mph western AZ, W to NW 10 to 20 mph northern/eastern AZ and western and northern NM, W to SW 10 to 20 mph elsewhere, except east to northeast 10 to 20 mph far northeastern NM into northwest TX.
Alaska Mostly cloudy with scattered showers. Isolated afternoon thunderstorms over the interior.	50s coastal areas and 60s to low 70s inland.	30 to 45% inland and over 50% along the coast.	Southeast to southwest 10 to 20 mph.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - What frequencies are established for aircraft in your area?

- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to.
- Do not use local slang.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Know what you want to say before you key the microphone.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- Give only meaningful information on the radio.
- Give accurate and descriptive ground information when describing a specific place on the ground.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
