

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JUNE 3, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 58 new fires reported. Two new large fires were reported, one each in the Southern California Area and the Southern Area. Two large fires were contained in the Alaska Area. Very high to extreme fire indices were reported in Alaska, Arizona, New Mexico, and Kansas.

SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

LEHIGH, Kern County Fire Department. This fire is four miles east of Tehachapi, CA in grass and sagebrush. Tomo Kahni State Park, windmills and electrical lines are threatened. Road closures are in effect. Rapid rates of spread with spotting up to 100 yards were reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
LEHIGH	CA	KRN	450	25	6/3	NR	4	13	3	0	NR

SOUTHERN AREA INCIDENTS / LARGE FIRES:

UNIT 4-05-01, Sabine National Wildlife Refuge. This fire is seven miles south of Hackberry, LA in grass. Thunderstorm cells building over the fire are hampering containment efforts.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SWS = Southwest Area Forestry
TAS = Tok Area Forestry

OUTLOOK:

Weather Discussion: A weak ridge of high pressure will move onto the West Coast beginning a short drying trend for much of the West, while an exiting trough of low pressure and unsettled weather will move through the Rockies and into the Plains. In Alaska, the persistent trough of low pressure across the interior will sink southward, bringing unsettled weather to parts of the southern interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>Alaska</p> <p>Partly to mostly cloudy with isolated showers and thunderstorms.</p>	60s to low 70s.	20 to 35% inland and over 40% along the coast.	Variable up to 10 mph.
<p>Southern California</p> <p>Morning, low clouds and fog in coastal basins and lower coastal mountain slopes, otherwise mostly sunny.</p>	65 to 75 mountains. 70 to 80 valleys. 80 to 85 upper deserts. 90 to 100 lower deserts.	25 to 40%.	Southwest to northwest 10 to 20 mph.
<p>Western Great Basin</p> <p>Partly to mostly sunny skies.</p>	North Valleys: 62 to 82 South Valleys: 82 to 94 Mountains: 58 to 70	North Valleys: 12 to 32% South Valleys: 12 to 17% Mountains: 18 to 48%	Upslope in the morning becoming light, north or northwest at 10mph or less.
<p>Southwest</p> <p>Mostly sunny to partly cloudy west to south. Partly to mostly cloudy northern AZ into northern NM with scattered showers and thunderstorms. Isolated to widely scattered thunderstorms mainly in west Texas.</p>	50s to 60s mountains 80s to mid 90s lower elevations.	10 to 15% far western AZ, parts of central and southern NM. 15 to 30%+ remainder of AZ & NM and west TX.	SW 10 to 20 mph southern and central AZ. W to NW 10 to 20 mph northern AZ into far western and northern NM. W to SW 15 to 25 mph central and southern NM into west Texas.
<p>Rocky Mountain</p> <p>Southwest Colorado: Partly cloudy with isolated thunderstorms.</p>	80s, with mid 60s and 70s mountains.	5% Southwest Colorado	West 10 to 20 mph.

Standard Fire Orders

The NWCG approved a revision of the Standard Fire Orders, in accordance with their original arrangements. The orders are arranged according to their importance and grouped in logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, local factor?
- Do you have map of the fire? Is topography, type of fuels, direction of the spread defined?
- Fire behavior group deals with what the firefighter will encounter - weather, fire status, fire behavior.
 1. Keep informed on fire weather conditions and forecasts.
 2. Know what your fire is doing at all times.
 3. Base all actions on current and expected behavior of the fire.
- Are you familiar with direction, distance, location, size of escape routes and safety zones?
- Discuss the need for lookout, such as extreme fire behavior, fire located out of line-of-sight.
- Discuss importance of the situational awareness.
- Fireline safety group emphasizes personal safety.
 4. Identify escape routes and safety zones and make them known.
 5. Post lookouts when there is possible danger.
 6. Be alert. Keep calm. Think clearly. Act decisively.
- Review importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- Organizational Control group is centered around tactical decisions.
 7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
 8. Give clear instructions and insure they are understood.
 9. Maintain control of your forces at all time.
- After you have considered, discussed and acted on the previous nine orders:
 10. Fight fire aggressively, having provided for safety first.
