

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JUNE 24, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was moderate nationally with 232 new fires reported. Eleven new large fires were reported, four in the Southwest Area, five in the Western Great Basin Area and two in the Eastern Great Basin Area. Six large fires were contained, one in the Western Great Basin Area and five in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Alaska, Arizona, New Mexico, Nevada and Texas.

SOUTHWEST AREA INCIDENTS / LARGE FIRES:

CAVE CREEK COMPLEX, Tonto National Forest. A Type 1 Incident Command Team (Whitney) is assigned. This complex, comprised of the Bronco and Humboldt fires is six miles northeast of Carefree, AZ in chaparral, oak, and grass. Evacuations are in place for the Camp Creek Summer Home Area and the Mistress Mine. Structure protection for private property, FAA facility and power lines is in place. A road closure has been established at Bartlett Lake. Cave Creek, Seven Springs riparian areas, endangered species habitat, and archeological resources remain threatened. Rapid rates of spread with 50 foot flame lengths and extreme fire behavior were observed.

HUMBUG, Arizona State. A Type 1 Incident Management Team (Oltrogge) has been ordered. This fire is eight miles south of Crown King, AZ in grass and brush. The historical mining town of Crown King is threatened. Steep inaccessible terrain and rapid uphill rates of spread are slowing containment efforts.

PERKINS COMPLEX, Phoenix Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Reinarz) is assigned. This complex, comprised of the Salt, Pepper, Union and Chuey fires is 34 miles north of Kingman, AZ in grass and shrubs. Privately owned residences and range resources are threatened. Rapid rates of spread and new fire starts are slowing containment efforts.

THREE FIRE COMPLEX, Tonto National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This complex, comprised of the Three and Four fires, is eight miles northwest of Tonto Basin, AZ in chaparral and grass. Recreation facilities on Roosevelt Lake, Four Peaks Wilderness Area, Game and Fish wildlife enclosure, and wildlife habitat are threatened. Spotting across State Highway 188 and wind driven downhill runs were reported.

AZTEC, Coronado National Forest. A Type 2 Incident Management Team (Raley) is assigned. This fire is four miles south of Patagonia, AZ in grass and brush. A few isolated interior smokes were reported.

BIGHORN, Arizona State. This fire is 24 miles south of Aguila, AZ in brush and grass. Hummingbird Springs, and endangered wildlife habitat are threatened. Plume dominated weather caused extreme fire behavior and prevented suppression efforts.

GOLDWATER, Phoenix Field Office, Bureau of Land Management. This fire is 16 miles north of Ajo, AZ in grass and brush. Native cultural resources and wildlife habitat remain threatened. Active fire behavior was reported.

COTTONWOOD, Coronado National Forest. This fire is five miles east of Catalina, AZ in mesquite and grass. No new information was reported.

JANE, Arizona State. This fire is eight miles east of Aguila, AZ in grass. Three structures and two civilian vehicles have been destroyed. Some residences in the community of Gladden were evacuated. High rates of spread in continuous flashy fuels was reported.

NORTH GILA COMPLEX, Gila National Forest. A Fire Use Management Team (Hall) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Fork and Johnson fires, is 13 miles southeast of Reserve, NM in timber and grass. The complex is being managed to accomplish multiple resource objectives. Minimal new growth with low to moderate fire behavior was reported.

WESTERN GREAT BASIN INCIDENTS / LARGE FIRES:

GOODSPRINGS, Las Vegas Field Office, Bureau of Land Management. A Type 1 Incident Management Team has been ordered. This fire is 11 miles northwest of Jean, NV in juniper, brush and grass. Mandatory evacuations for the residences of the Mt. Potosi area and a boy scout camp are in effect. Voluntary evacuations of Mt. Springs have been implemented. Wildlife habitat is threatened. Extreme fire behavior with running, torching, and spotting was reported.

SOUTHERN NEVADA COMPLEX, Las Vegas Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This complex is 11 miles southwest of Mesquite, NV in grass and brush. Wildlife habitat is threatened. Running, spotting, and extreme fire behavior were observed. Aerial reconnaissance will take place to determine containment strategy.

MEADOW, Ely Field Office, Bureau of Land Management. This fire is 30 miles southeast of Alamo, NV in grass. Endangered species habitat remains threatened. Aerial resources are assisting in the establishment of anchor points. Low relative humidity, high gusty winds and extreme fire behavior are limiting containment efforts.

HALFWAY, Ely Field Office, Bureau of Land Management. This fire is 16 miles east of Mesquite, NV in grass and shrub. Endangered species habitat is threatened. Fine flashy fuels, rugged terrain, and gusty winds are hindering containment efforts. Fire runs with extreme fire behavior were observed.

DODGE POCKET, Ely Field Office, Bureau of Land Management. This fire is 27 miles south of Caliente, NV in grass and shrub. Extreme fire behavior with rapid rates of spread was reported.

TOQUOP, Ely Field Office, Bureau of Land Management. This fire is 22 miles northwest of Mesquite, NV in grass. Wildlife habitat is threatened. Rugged terrain, thunder storm cells, erratic winds, and extreme fire behavior continue to impede containment efforts.

COYOTE, Moapa Valley National Wildlife Refuge. This fire is 19 miles north of North Las Vegas, NV in yucca, pinyon, and juniper. Desert Tortoise habitat is threatened. Running and torching with uphill runs were reported.

TULE, Ely Field Office, Bureau of Land Management. This fire is 25 miles northwest of Mesquite, NV in grass. Endangered species habitat is threatened. Erratic winds, low relative humidity and thunderstorm cells continue to hamper containment efforts.

SOUTHERN CALIFORNIA AREA INCIDENTS / LARGE FIRES:

HACKBERRY, Mojave National Park. A Type 2 Incident Management Team (Walker) is assigned. This fire is 15 miles south of Essex, CA in chaparral and grass. Round Valley was evacuated. The Seven IL Ranch, Mid-Hills campground, historical sites, archeological sites and wildlife habitat are threatened. Steep terrain and extreme fire behavior are hindering containment efforts. Prolonged runs and spotting were observed.

PARADISE, California Department of Forestry and Fire Protection, San Bernardino Unit. A CDF Type 1 Incident Command Team (Paul) is assigned. This fire is one mile southwest of Morongo Valley, CA in chaparral, juniper, and sagebrush. Joshua Tree National Park, Morongo Valley, and Yucca Valley are threatened. Burning of interior island pockets with moderate fire behavior was reported.

SOBOBA, California Department of Forestry and Fire Protection, Riverside Unit. A CDF Type 1 Incident Command Team (Henson) is assigned. This fire is one mile north of San Jacinto, CA in grass. Steep terrain and rain-damaged truck trails have limited road access and containment efforts. One contained spot fire outside the line was reported.

ALASKA AREA INCIDENTS / LARGE FIRES:

SHEENJEK RIVER, Alaska Fire Service, Upper Yukon Zone. A Type 2 Incident Management Team (Kurth) is assigned. This fire started on Fish and Wildlife Service land 12 miles northeast of Ft. Yukon, AK in birch, aspen, black and white spruce. Cabins and outbuildings remain threatened. Low relative humidity, windy and dry conditions are contributing to short runs and individual tree torching.

CHAPMAN CREEK, Alaska Fire Service, Tanana Zone. This fire is eight miles south of Coldfoot, AK in black spruce and tundra. Steep terrain and extreme fire weather are hindering containment efforts. A small run was made to the north. Backing and occasional torching were reported.

BILLY HAWK CREEK 1, Alaska Fire Service, Galena Zone. This fire started on Fish and Wildlife Service land 30 miles northwest of Huslia, AK in black spruce and tundra. Good progress towards containment was achieved. The fire remains calm.

OUTLOOK:

Fire Weather Watch: Isolated to scattered dry thunderstorms over west-central Nevada.

Weather Discussion: An upper low is moving slowly toward the California coast, while high pressure remains in control over the Southwest. The approach of this low will bring some dry thunderstorms to the Sierra Mountains and western Nevada, along with increasing winds to the Southern California mountains and deserts. In Alaska, high pressure will gradually build over the area.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Western Great Basin Partly cloudy with isolated to scattered thunderstorms over west-central and far eastern Nevada.	North Valleys: 85 to 98. South Valleys: 85 to 108. Mountains: 70 to 86.	North Valleys: 8 to 20%. South Valleys: 10 to 20%. Mountains: 18 to 30%.	South 8 to 18 mph across the state with gusts 25 to 30 mph in northeastern Nevada.
Southwest Breezy and drier in western Arizona. Partly to mostly cloudy with scattered thunderstorms in the northeast half of Arizona and northwest half of New Mexico. Mostly sunny and hot in the remainder of Arizona, New Mexico and west Texas.	Mountains: 65 to 90. Lower elevations: 90 to 110.	Lower elevations: 5 to 20%. Higher terrain and west Texas: 20 to 35%.	Southwest 10 to 20 mph with higher gusts western Arizona. Southwest 5 to 15 mph eastern Arizona and western New Mexico. South to southeast 10 to 20 mph eastern New Mexico and west Texas.
Southern California Areas of morning low clouds and fog to the lower coastal mountain slopes, otherwise partly cloudy.	Mountains: 70 to 85. Valleys: 80 to 90 Upper deserts: 90 to 100. Lower deserts: 105 to 115.	10 to 30%.	Southeast to southwest 10 to 20 mph.
Rocky Mountain A cool front enhances thunderstorm activity for eastern sections of the Rocky Mountain Area.	Eastern plains: lower to mid 90s. Higher elevations: 70s to lower 80s. Elsewhere: 80s.	Lower elevations of Wyoming and Colorado: 15 to 20%.	South 10 to 25 mph over the eastern plains.
Alaska Interior: Partly cloudy with scattered afternoon showers and isolated thunderstorms.	60s and mid 70s.	Upper Yukon Valley: 18 to 30%. Otherwise: 30 to 40%.	Winds south to southeast 10 mph except along the Alaska Range, northwest to northeast 15 mph.
Eastern Great Basin Idaho, Bridger-Teton: Partly cloudy. Widely scattered thunderstorms. Northern Utah: Partly cloudy with scattered thunderstorms. Southern Utah, Arizona Strip: Partly cloudy with isolated thunderstorms.	Idaho, Bridger-Teton: 70 to 86 mountains. Valleys: 84 to 94. Northern Utah: Mountains 69 to 81. Valleys 81 to 93. Southern Utah, Arizona Strip: Mountains 70 to 85, valleys: 85 to 100, except 105 to 110 Lake Mead area.	Idaho, Bridger-Teton: 15 to 32% mountains, 10 to 20% valleys. Northern Utah: 22 to 34% mountains, 12 to 20% valleys. Southern Utah, Arizona Strip: 20 to 30%. Mountains, 10 to 20% valleys.	Idaho, Bridger-Teton: West 4 to 8 mph. Northern Utah: South 10 to 20 mph. Southern Utah, Arizona Strip: South 10 to 20 mph west, upslope 4 to 8 mph east.

FIRE NOT SCOUTED AND SIZED UP

Watchout Situation #1 comes up during initial attack and every time resources arrive at a fire.

● Before taking action on the fire, the following considerations must be addressed:

- Can you personally observe the fire or must you use scouts? Describe ways you can scout and size up a fire.
- Do you know the location of the fire perimeter? Discuss situations in which the fire perimeter may not be obvious. (Spotty fires, etc.)
- Do you know the direction of fire spread? When isn't the direction of fire spread obvious? (Wind shifts, spotty fires, etc.)
- Does the direction of fire spread increase risk? Talk about situations where you may have to approach the head of the fire. (Hiking down from a helispot, approaching from an existing road, switching winds, etc.)
- Do you know the fuels and their condition? What kind of information will you assume from what you already know about fuel types? (Spot fires in fir, extreme fire potential in flashy fuels, etc.)

● Continued from above...

- Do topographic hazards exist? What can you assume from what kind of terrain the fire covers? (Slope, chimneys, aspect, etc.)
- Does enough information exist to establish a plan of attack? When do you have enough information to begin fighting fire? What do you need to know?
- Do other dangers exist? Have you talked about factors specific to the area you are working in? (Hunters in the woods, drought, snag patches, etc.)

● To reduce the risks:

- Post lookouts until the fire is sized up and escape routes and safety zones are established.
- Retreat if the situation is too complex. Review fires where you had to wait until the area in which you were assigned to work was scouted and sized up before you were allowed onto the fireline.
