

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 18, 2005 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was moderate nationally with 190 fires reported. Ten new large fires were reported four in the Southwest Area, two each in the Northern Rockies and Rocky Mountain Areas and one each in the Eastern Basin and Western Great Basin Areas. Five large fires were contained, three in the Western Great Basin, and one each in the Rocky Mountain and Southwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Michigan, Montana, Nebraska, New Mexico, Nevada, South Dakota, Utah and Wyoming.

SOUTHWEST AREA INCIDENTS / LARGE FIRES:

FLORIDA, Coronado National Forest. A Type 1 Incident Management Team (Oltrogge) is assigned. This fire is 11 miles southeast of Green Valley, AZ in brush, timber litter and understory. Evacuations are in effect for Madera Canyon. Structure protection is in place for the community of Madera Canyon and the Mt. Hopkins Observatory. Spotted Owl, migratory bird habitat and the Mt. Wrightson Wilderness area remain threatened. Backing fire into Madera Canyon was reported. Fire activity moderated on the east and south sides due to rain.

RIDGE COMPLEX, Kaibab National Forest. A Type 2 Incident Management Team (Truman) is assigned. This complex, comprised of the Ridge, Nail, Warm Springs, Single Tree and Oak fires, is in hardwood litter, 15 miles southeast of Jacob Lake, AZ. A power substation is threatened. Torching and crowning on the Nail fire and minor fire behavior on the other fires were reported.

WAHOO, Gila National Forest. This fire is 21 miles northwest of Winston, NM in timber, brush, hardwood slash and litter. Creeping, flanking and backing surface fire with occasional torching were reported. The fire is actively burning in heavy fuels on the northeast side. This fire is being managed using a confinement strategy.

BULL RUN, Coconino National Forest. This fire is 10 miles southeast of Camp Verde, AZ in grass, chaparral and juniper. No new information was reported.

SH RANCH COMPLEX, Arizona State. This fire is 10 miles east of Bagdad, AZ in short grass. Extreme fire behavior with down drafts causing runs was reported. No further information was received.

HILLSIDE, Arizona State. This fire is three miles northeast of Congress, AZ in grass. Evacuation order of local ranches was lifted. Structure protection is in place. Extreme fire behavior due to down drafts caused rapid rates of spread.

BRUSH, Gila National Forest. This fire is 25 miles northwest of Silver City, NM in hardwood litter and brush. The fire is in monitor status. No further information was received.

DRAGON COMPLEX, Grand Canyon National Park. A Fire Use Management Team (Cones) is assigned. This lightning-caused Wildland Fire Use (WFU) complex, comprised of the Dragon, Spine, Basin and Marble fires is being managed to accomplish resource objectives. This complex

is 10 miles north of Grand Canyon Village, AZ in mixed conifer, ponderosa pine, aspen and dead and down fuel. Widforss Trail remains closed. Some torching and spotting in mixed conifer occurred.

INDIAN HILLS, Arizona State. This fire is near Dudleyville, AZ in timber, grass and brush. Numerous structures, power lines and endangered species habitat are threatened. Running, spotting and isolated crown fire were reported.

WESTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

WILSON COMPLEX, Nevada Division of Forestry, Northern Region. A Type 2 Incident Management Team (Suwyn) is assigned. This complex, comprised of the Wilson, Petan and Rawhide fires, is 100 miles north of Elko, NV in cheatgrass and sagebrush. Structures are threatened. Extreme fire behavior was observed.

ESMERELDA, Elko Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Muir) is assigned. This fire is 46 miles northeast of Battle Mountain, NV in sagebrush and grass. The fire is burning actively on the south flank.

CONTACT, Elko Field Office, Bureau of Land Management. This fire is 20 miles south of Jackpot, NV in cheatgrass and sagebrush. Rapid rates of spread and a highway closure were reported.

ROCKY MOUNTAIN AREA INCIDENTS / LARGE FIRES:

TRAIL EAST, San Juan Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Blume) is assigned. This fire is nine miles southwest of Hesperus, CO in pinyon and juniper. Major runs split the fire into two heads. One new start was contained.

CRAIG DRAW, Uncompahgre Field Office, Bureau of Land Management. This fire is three miles east of Norwood, CO in hardwood slash, timber litter and understory. Some Forest Service roads are closed. Heavy smoke is impacting Highway 145. Long range spotting was reported.

SAGE HEN, Rawlins Field Office (South Zone), Bureau of Land Management. This fire is 25 miles northeast of Jeffrey City, WY in limber pine, juniper, sage and grass. Some torching and spotting occurred outside the line.

PACK TRAIL, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is 10 miles west of Meeker, CO in timber litter and brush. Active ground fire with group torching, crown runs and spotting were reported.

RICCO, Black Hills National Forest. This fire is two miles south of Piedmont, SD in ponderosa pine, logging slash and hardwood litter. No new information was reported.

EASTERN GREAT BASIN AREA INCIDENTS / LARGE FIRES:

DRY FORK, Vernal Field Office, Bureau of Land Management. This fire is 12 miles northwest of Vernal, UT in timber, grass and understory. The community of Dry Fork is threatened. Potential evacuation alert for local residents has been issued. The fire made significant runs.

DAMMERON, Cedar City Field Office, Bureau of Land Management. This fire is north of Diamond Valley, UT in pinyon, juniper and grass. The communities of Dammeron Valley and Diamond Valley, Pine Valley Wilderness and cultural and archeological sites are threatened. The fire reported running and spotting with occasional torching.

CLOVER, Twin Falls District, Bureau of Land Management. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 30 miles south of Hammett, ID in grass and brush. Sage grouse habitat, grazing allotments, range improvements, agricultural and wild horse areas are threatened. Running head fire was reported. The fire continued to move to the south and east, and spotted across Salmon Falls Creek.

FRISCO, Cedar City Field Office, Bureau of Land Management. This fire is 10 miles northwest of Milford, UT in pinyon, juniper and grass. Small runs with crowning in pinyon and juniper was reported. Due to inaccessible terrain, retardant is being used to protect the Frisco Peak telecommunications facility.

WEST GILSON, Richfield Field Office, Bureau of Land Management. This fire is seven miles north of Leamington, UT in cheatgrass. Aerial resources increased control operations. Sensitive species habitat, power lines, and sheep and cow camps are threatened. Increase in acreage is due to more accurate mapping.

SMITH MESA #3, Southwest State, Utah Division of Forestry. This fire is 6 miles north of Virgin, UT in grass. Residences and corrals are threatened. Burning of heavy fuels and smoldering were observed.

ALASKA AREA INCIDENTS / LARGE FIRES:

BOUNDARY CREEK, Alaska Fire Service, Upper Yukon Zone. A Type 2 Incident Management Team (Chrisman) is assigned. This fire started on Alaska Native Claims Settlement Act land six miles southeast of Eagle, AK in black spruce, hardwood litter and understory. Cabins and outbuildings remain threatened. Precipitation moderated fire behavior significantly.

FOX CREEK, Kenai-Kodiak Area Forestry, Alaska Division of Forestry. This incident is being managed to accomplish resource objectives. This fire is 35 miles southeast of Soldotna, AK in beetle-killed spruce, hardwoods, timber litter and understory. Backing fire and isolated torching were observed on the eastern and southern perimeters.

SOUTHERN AREA INCIDENTS / LARGE FIRES:

HURRICANE DENNIS RESPONSE, Federal Emergency Management Agency (FEMA). A Unified Command between a Type 1 Incident Management Team (Custer) and a Florida State All-Risk Incident Management Team (Koehler) is in place at Duke Field, Eglin Air Force Base, FL. A Florida State All-Risk Incident Management Team (Hill) is in place at Saufley Field, Pensacola Naval Air Station, FL. A Type 1 Incident Management Team (Feser) is in place at Maxwell Air Force Base, AL. The Teams are managing receiving and distribution centers, points of distribution and Logistical Staging Areas. The teams are working in cooperation with the National Guard, Florida Division of Forestry, the Florida State Emergency Response Team, Alabama Department of Transportation and Emergency Management Agency, Army Corps of Engineers, American Red Cross, and the military. A National Park Service All-Risk Incident Management Team (Panko) is managing the rehabilitation and recovery work at Gulf Islands National Seashore, FL.

NORTHERN ROCKIES AREA INCIDENTS / LARGE FIRES:

BIG HORN, Crow Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Larsen) has been ordered. This fire is 44 miles southeast of Billings, MT in timber, juniper and sage. The area surrounding the fire has been closed. Winds are pushing the fire south into heavy timber. Steep terrain and heavy fuels are causing control problems.

JOHNNY RIDGE, Beaverhead/Deerlodge National Forest. This fire is 20 miles south of Ennis, MT in mixed conifer. The Johnny Gulch Area is closed. Minimal fire spread due to higher relative humidity and lower temperatures was reported.

BRANDON COULEE, Charles M. Russell National Wildlife Refuge, Fish and Wildlife Service. This fire is 55 miles south of Malta, MT in sage and grass. Creeping and smoldering were reported. The fire will be put into aerial patrol status.

OUTLOOK:

Weather Discussion: High pressure will strengthen today across the Southwestern United States, ushering in a drying trend for the Great Basin and northwestern two-third of the Southwest Area. Some increased moisture will continue the possibility of thunderstorms in southeastern Arizona, southern New Mexico and southern Colorado. Elsewhere in the West, conditions will dry and warm. In the Gulf of Mexico, Emily will emerge off the Yucatan Peninsula and gain strength over warm waters. Emily is due to strike eastern Mexico late Tuesday night into Wednesday morning.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Partly to mostly sunny and hot. Scattered thunderstorms eastern Arizona, New Mexico and southwest Texas, some dry in eastern Arizona and northwest New Mexico.	Mountains: 70 to 95. Lower elevations: 90 to 115.	Arizona and western New Mexico: 5 to 20%. Eastern New Mexico and west Texas: 20 to 35%.	Arizona and western New Mexico: southwest to northwest 5 to 15 mph with gusts to 25 mph. Eastern New Mexico and western Texas: south to southeast 10 to 20 mph.
Rocky Mountain Mainly dry. Isolated dry thunderstorms over southern Colorado and scattered thunderstorms in Kansas.	90's in southwest Colorado with 80's elsewhere and 70's in the mountains.	Western Colorado: 5 to 10%. Wyoming: 12 to 20%. Elsewhere: 25 to 35%.	West 10 to 22 mph in western Colorado into southwest Wyoming, with a southeast flow of 10 to 20 mph across eastern Colorado into western Nebraska.
Eastern Great Basin Mostly sunny and warming region-wide.	Idaho, Bridger-Teton: Mountains: 71 to 80. Valleys: 88 to 99. Northern Utah: Mountains: 71 to 90. Valleys: 85 to 97. Southern Utah, Arizona Strip: Mountains: 80 to 92. Valleys: 91 to 103. Deep southwest Utah and Arizona Strip: 103 to 110.	Idaho, Bridger-Teton: Mountains: 15 to 25%. Valleys: 11 to 20%. Northern Utah: Mountains: 15 to 26%. Valleys: 11 to 20%. Southern Utah, Arizona Strip: Mountains: 20 to 25%. Valleys: 9 to 14%.	Idaho, Bridger-Teton: Western areas: Upslope 8 mph. Eastern areas: west 5 to 10 mph. Northern Utah: Upslope/Upwind: 5 to 10 mph. Southern Utah, Arizona Strip: Upslope/Upwind: 5 to 10 mph.
Northern California Sunny, except patchy fog along the coast.	Inland valleys: 100 to 115. Higher elevations: 80's to 90's. Along the coast: 60' to 70's.	East of the Cascade - Sierra crest: 7to 15%. Elsewhere inland: 8 to 18%. Along the coast: 40 to 60%.	East of the Cascade - Sierra crest: southwest to northwest 6 to 12 gusts to 27 mph. Elsewhere inland: southeast to southwest 4 to 8 gusts to 17 mph. Along the coast: southwest to northwest 5 to 15 mph.
Western Great Basin Mostly sunny and hot.	North valleys: 93 to 110. South valleys: 98 to 116. Mountains: 77 to 97.	North Valleys: 4 to 16%. South Valleys: 5 to 10%. Mountains: 8 to 21%.	Northwest 5 to 10 mph with a few afternoon gusts to the low 20's.

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

FALLING SNAGS

Falling snags (dead, standing trees without leaves or needles in the crowns) present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning.

- The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from falling snags:
 - Strong winds
 - Night operations
 - Steep slopes
 - Diseased or bug-killed areas
- Things to consider when assessing the potential hazards of both snags and green trees:
 - Trees have been burning for an extended period.
 - High-risk tree species (those that are known for rot and shallow root systems) are in the area.
 - Numerous downed trees
 - Dead or broken tips and limbs overhead
 - Accumulation of downed limbs
 - Absence of needles, bark or limbs
 - Leaning or hung-up trees
- Mitigation measures to take:
 - Identify and flag all high-risk snags and green trees.
 - Keep personnel out of the high-risk areas until the hazard has been removed.
 - Establish lookouts.
