## COMMUNICATIONS

Effective communication is a critical backbone of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
  - Knowledge of the radio issued to the individuals
  - Net control, frequencies
  - Line-of-sight restrictions
  - Antenna polarization effect (direction of the antenna)
  - Minimizing noise interference
  
- How can you mitigate potential problems?
  - Implement effective communication procedures--be brief, clear, concise, and to-the-point.
  - Give a good comprehensive briefing (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide.).
  - Confirm that relayed information is received, acknowledged, and understood.
  - Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; solicit feedback).
  - Establish emergency check-in procedures.
  - Provide a minimum of 4 radios per 20-person firefighter crew.
  
- The Five Communication Responsibilities for All Firefighters
  - Brief others
  - Debrief your actions
  - Communicate hazards to others
  - Acknowledge messages
  - Ask if you don't know
