

**INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, JULY 12, 2006 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was moderate nationally with 221 new fires reported. Eight new large fires (\*) were reported, four in the Eastern Great Basin Area and one each in the Southern California, Western Great Basin, Northern Rockies, and Southern Areas. Seven large fires were contained, two in Eastern Great Basin Area and one each in the Southern California, Western Great Basin, Northern Rockies, Rocky Mountain and Southern Areas. Very high to extreme fire indices were reported in Arizona, Alaska, California, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah and Wyoming.

A Type 1 Incident Management Team (Opliger) is assigned to the 21,651 acre Wutlus Lake fire 60 kilometers west of Quesnel, British Columbia, Canada. Smoldering was reported. Favorable weather conditions are enhancing containment efforts.

**SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:**

SAWTOOTH COMPLEX, San Bernardino Unit, California Department of Forestry and Fire Protection (CDF). This complex, comprised of the Sawtooth, Waters, and Ridge fires, is near Pioneertown, CA, in chaparral. Numerous residences remain threatened. Evacuations of several communities are in effect. Weather and steep, inaccessible terrain are impeding containment efforts. Extreme fire behavior with significant runs was reported.

ARCO, Kern County Fire Department. This fire is five miles north of Lebec, CA in chaparral. Steep terrain and difficult access are impeding containment efforts. Numerous residences and utility infrastructure remain threatened. No further information was received.

BECK, Bakersfield District Office, Bureau of Land Management. This fire is near California Valley City, CA in grass and brush. Several residences and resources are threatened. Elkhorn Road is closed. Weather and rapid rates of spread are hampering containment efforts.

MILLARD COMPLEX, San Bernardino National Forest. A Type 2 Incident Management Team (Walker) is assigned. This complex, comprised of four fires, is seven miles north of Cabazon, CA in chaparral and conifer. Steep terrain is hampering containment. Minimal fire behavior with creeping, smoldering, and rolling debris was observed.

MESQUITE, California Desert District, Bureau of Land Management. This fire is 23 miles northeast of Baker, CA. No new information was reported.

### NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

CANYON, Santa Clara Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Paul) is assigned. This fire is 11 miles west of Patterson, CA in chaparral. Del Puerto Canyon Road is closed to civilian traffic. Difficult access, steep terrain, and weather continues to impede containment. Very active fire behavior with significant runs, spotting, and torching was reported.

YOLLA BOLLY COMPLEX, Mendocino National Forest. A Fire Use Management Team (Perkins) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This incident is 35 miles west of Red Bluff, CA in timber. Continued surface fire and torching were observed.

### NORTHERN ROCKIES AREA INCIDENTS/LARGE FIRES:

SAUNDERS, Southern Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Incident Management Team (Heintz) is assigned. This fire is four miles west of Columbus, MT in grass and timber. Numerous residences and buildings remain threatened. Evacuations remain in effect. Brumfield and Countryman Creek Roads remain closed. Adverse weather conditions are hampering containment efforts. Torching, short runs and very active fire behavior were reported.

MCD – Miles City Field Office, Bureau of Land Management

### EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

LAKE RIDGE, Northwest Area Office Idaho Department of Lands. This fire is eight miles east of Bear Lake, UT in grass, sage, and mountain brush. Strong gusty winds are hampering containment efforts. Creeping and smoldering were reported.

CANAL, South Central Idaho Area Office, Idaho Department of Lands. This fire is five miles north of Wendell, ID in sagebrush and grass. Moderate fire behavior with runs was reported.

CROOK, Boise District, Bureau of Land Management. This fire is eight miles north of Mountain Home, ID in grass and brush. Canyon Creek Road was temporarily closed. Rapid rates of spread and runs were observed.

### NORTHWEST AREA INCIDENTS/LARGE FIRES:

SPUR PEAK, Okanogan/Wenatchee National Forest. A Washington Type 2 Interagency Incident Management Team (Jennings) is assigned. This fire is 13 miles northeast of Winthrop, WA in spruce and lodgepole pine. Forest road and trail closures remain in effect. A campground remains closed. Steep terrain and heavy amounts of dead and down fuel continue to hamper containment efforts.

TIN PAN, Okanogan-Wenatchee National Forest. A Fire Use Management Team (Furlong) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is seven miles west of Lucerne, WA in timber. Group torching and short crown runs were observed

### SOUTHERN AREA INCIDENTS/LARGE FIRES:

LINDSEY BAY, National Forests of Florida. This fire is five miles southeast of Wilma, FL in southern rough. Structure protection is in place, and an evacuation plan for an adjacent community has been prepared. Minimal fire behavior was observed.

NORTHFIELD, Texas Forest Service. This fire is 13 miles northeast of Matador, TX in brush and grass. Rough terrain and strong winds are hampering containment efforts. Active fire behavior with flame lengths up to 20 feet were reported.

## OUTLOOK:

**Red Flag Warnings:** Wednesday afternoon and evening for northeast Montana due to isolated to scattered thunderstorms with gusty and erratic winds. For south-central and southeast Montana, and northwest South Dakota, Big Horn National Forest for very low humidity, gusty winds and isolated thunderstorms.

**Fire Weather Watches:** Wednesday for northeast Wyoming and western and central South Dakota for high temperatures, low relative humidity, and dry lightning. For parts of northern and west-central Nevada due to gusty afternoon winds and low relative humidity. In western Nevada for strong gusty southwest to west winds and low relative humidity. Wednesday afternoon and evening for the eastern plains of central Montana for low humidity, gusty winds and isolated thunderstorms.

**Weather Discussion:** A low pressure trough will move across the Northwest and into the Northern Rockies today with gusty winds extending from the Great Basin into the northern Plains. Elsewhere in the West, thunderstorms will develop over the Four Corners states, Wyoming and Montana.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Southern California</b> Patchy morning low clouds and fog coastal areas, otherwise mostly sunny.	85 to 100 mountains. 95 to 105 valleys. 95 to 105 upper deserts. 105 to 115 lower deserts.	40 to 60% coastal areas. 15 to 30% valleys. 15 to 30% mountains. 10 to 20% deserts.	Southeast to southwest 5 to 15 mph.
<b>Northern Rockies</b> A Pacific system will bring partly cloudy, cooler and more seasonal temperatures to areas west of the divide. Upper ridging will dominate areas east of the divide and North Dakota. These areas will be partly cloudy, windy and hot. It will be excessively hot over far eastern Montana and North Dakota with temperatures topping 100. A frontal boundary will also act as a trigger for thunderstorms across the east half of Montana.	West of divide: 77 to 83. East of divide: 87 to 98. North Dakota: 95 to 105.	West of divide to 25 to 35%. East of divide to 15 to 20%. Western North Dakota: 18 to 22%. Eastern North Dakota: 20 to 30%.	West of divide: West 10 to 15 mph. East of the divide: Southwest 15 to 25 mph. North Dakota: South 15 to 25 mph.
<b>Western Great Basin</b> Partly to mostly sunny with gusty afternoon winds across the north.	Northern valleys: 83 to 97. Southern valleys: 93 to 116. Northern mountains: 69 to 88. Southern mountains: 82 to 92.	Northern valleys: 8 to 18%. Southern valleys: 9 to 15%. Northern mountains: 13 to 26%. Southern mountains: 10 to 15%.	South to southwest at 10 to 20 mph, with some gusts to 30 mph, especially across the northern half of the state.
<b>Northern California</b> Partly cloudy at times in far northern California and along/near the north coast. Otherwise mostly sunny, except areas of fog/ low clouds along/near the coast.	From 65 to 80 higher terrain to 80s to mid 90s low terrain. Coastal areas 60s and 70s.	12 to 20%. Elsewhere 16 to 33% except locally 35 to 45% far northwest.	Southwest to northwest increasing to 7 to 17 mph with local afternoon gusts to 30 mph coast and 25 to 35 mph east of the Cascade-Sierra crest.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>Rocky Mountain Area</b> Thunderstorm coverage is anticipated to be isolated over central/northern Colorado into central Wyoming, with isolated to widely scattered dry lightning over northern Wyoming into the Black Hills.	Lower 90s in the lower elevations, except near 100 in South Dakota, and 70s to lower 80s in the mountains.	12 to 20% across the lower elevations of Wyoming, South Dakota, and Colorado, with 18 to 30% in the mountains and plains.	15 to 30 mph are forecast to be from the southeast across central South Dakota, and 10 to 20 mph from the west over Wyoming and portions of the Colorado mountains, otherwise light except near storms.
<b>Eastern Great Basin Area</b> Idaho/Wyoming: Partly cloudy with isolated to widely scattered thunderstorms in the mountains. Northern Utah: Partly cloudy with isolated dry thunderstorms north of I-80; scattered wet and dry thunderstorms south of I-80. Southern Utah/Arizona Strip: Partly cloudy with scattered thunderstorms over mountains.	Idaho/Wyoming: 66 to 85 mountains, 85 to 95 valleys. Northern Utah: 77 to 85 mountains, 85 to 98 valleys. Southern Utah/Arizona Strip: 78 to 90 mountains, 90 to 104 valleys. 105 to 116 low deserts.	Idaho/Wyoming: 25 to 40% mountains. 15 to 28% valleys. Northern Utah: 12 to 20% mountains, 7 to 15% valleys. Southern Utah/Arizona Strip: 15 to 30% mountains, 6 to 15% valleys and low deserts.	Idaho/Wyoming: West to southwest 10 to 20 mph with gusts to 30 mph on Snake River Plain. Northern Utah: southwest 15 to 25 mph with gusts to 35 mph. Southern Utah/Arizona Strip: southwest 10 to 20 mph and gusty.
<b>Southwest Area</b> Mostly sunny and drier with isolated thunderstorms.	90 to near 110 lower elevations. 70 to 90 in the higher terrain.	10 to 20% lower elevations of Arizona, New Mexico and southwest Texas. 20 to 40% higher elevations and remaining lower elevations.	Southwest to west 10 to 20 mph Arizona and western New Mexico. Southerly 10 to 20 mph remainder.
<b>Eastern Area</b> Showers and thunderstorms likely across southern and eastern parts of Missouri and Indiana, southern Illinois, the southeastern lower peninsula of Michigan, northwestern one-half of the Mid-Atlantic states, and the western two-thirds of the northeast. Fair elsewhere.	78 to 88 over the northern Great Lakes and the northeast. 86 to 96 across western Minnesota and western Iowa. 82 to 92 across elsewhere.	30 to 40% across the far western Great Lakes and western Iowa. 35 to 45% over the northern Great Lakes. Greater than 45% elsewhere.	Light to moderate winds.
<b>Northwest Area</b> No information reported.			
<b>Alaska Area</b> No information reported.			
<b>Southern Area</b> No information reported.

### **Hazard Trees**

Snags (dead, standing trees without leaves or needles in the crowns) and other hazard trees present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning. Live, green trees have been weakened by insects, disease, weather, past fires, and age present equal hazard and can fall without warning.

- The risk of injuries from hazard trees increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags and weakened live trees may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from hazard trees: Strong winds or erratic winds from storm cells. Night operations. Air operations - cargo drops, water or retardant drops, helicopter take off/landing, low-level flights. Steep slopes. Diseased or bug-killed areas.
- Things to consider when assessing the potential dangers of hazard trees: Trees have been burning for an extended period. High-risk tree species (those that are known for rot and shallow root systems) are in the area. Numerous downed trees. Dead or broken tips and limbs overhead. Accumulation of downed limbs. Tree decay, cavities, splits, cracks. Absence of needles, bark or limbs. Leaning or hung-up trees. Roots damaged by equipment or erosion.
- Mitigation measures to take: Identify and flag all high-risk areas until the hazard has been removed. Keep personnel out of the high-risk areas until the hazard has been removed. Use saw teams and falling bosses. Establish lookouts. Plan a quick and safe escape route. Do not turn your back on a falling tree. Maintain situational awareness.
