OUTLOOK:

Red Flag Warning: For northwest Utah for strong southwest winds and low relative humidity.

Fire Weather Watch: For portions of South Dakota for increasing southerly flow and low humidity.

Weather Discussion: Thunderstorm activity will increase the next couple of days over portions of the Pacific Northwest, Idaho, Montana, and Wyoming. Many of these storms will tend to bring dry lightning initially and then moisten up with time. The increase in thunderstorm activity will be due to a combination of the cold front moving across these areas and an upper low along the California coast which will move inland on Wednesday.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Northwest Area Partly cloudy. Scattered thundershowers likely in eastern Oregon.	West of Cascades: Mostly 60s and 70s locally to low 80s extreme south. East of Cascades: Mostly 70s and 80s...locally to 90.	West of Cascades: Generally 40% to 60%...locally to 30% in southwest Oregon. East of Cascades: 20% to 30% except 10% to 20% southeast Oregon.	Mostly west to north 5 to 12 mph...8-18 mph in eastern Washington.
