

**National Interagency Coordination Center
Incident Management Situation Report
Friday, March 9, 2007 - 1000 MST
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Moderate (2,068 new fires)
 New large fires: 26 (*)
 Large fires contained: 24
 Uncontained large fires: 7
 Area Command Teams:
 Type 1 IMTs committed:
 Type 2 IMTs committed:
 Fire Use Teams:

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires: 2,007
 New large fires: 24
 Uncontained large fires: 7

Woods Cty, Oklahoma DOF. Twenty-six miles northeast of Buffalo, OK. Grass. No new information.

Willy's Gone, Virginia DOF. Three miles east of Blackwater, VA. Woodlands. Structures threatened.

Moffett, Texas FS. Three miles south of Medina, TX. Timber. Structures threatened.

Frog Pond, Everglades NPS. Ten miles west of Homestead, FL. Grass. Rapid rates of spread.

Big Valley, Oklahoma DOF. Three miles north of Buffalo Valley, OK. Logging slash. No further information.

877 Road, Oklahoma DOF. Twelve miles south of Tahlequah, OK. Logging slash. No new information.

Everglade Command, Florida DOF. Six miles southwest of Homestead, FL. Grass. Extreme fire behavior.

Predictive Services Discussion

Warm and dry weather is expected over southern California through much of next week. Offshore winds and low humidity will affect the region beginning on Saturday night and continuing through early Tuesday. Eastern New Mexico and the Southern Plains will see dry and windy conditions by mid-week.

VEHICLE ENTRAPMENT

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Fire out around the vehicle if there is time.
- Park behind a natural barrier or structure.
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles or draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway, remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover himself/herself with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
