NCF – National Forests in North Carolina

Predictive Services Discussion: Thunderstorms, some of them dry, are expected today and Friday in portions of the Four Corner states and western Wyoming. Dry thunderstorms are expected in portions of northern California and western Nevada today, and will spread into portions of Oregon on Friday. Otherwise, hot and dry weather will persist across the West. The northern and central interior of Alaska will see hot weather and very low humidity through Friday with some wet thunderstorms expected in the southern interior. The Southeast will have scattered thundershowers through Friday.

Initiate All Actions Based On Current And Expected Fire Behavior

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
