Predictive Services Discussion: Offshore winds in northern California through the weekend. Offshore flow will continue today in northern California with gusty winds and poor overnight relative humidity recovery. Offshore winds will progress north into Oregon by the weekend. Portions of the Southeast will continue to see very warm temperatures and low relative humidity.

Lookouts

Lookouts are often better situated to notice the cumulative changes of fire behavior.

- Fire Order #8 says, "Establish lookouts in potentially hazardous situations." Should you utilize lookouts at all times?
 - Lookouts should be posted at all times.

- What are you looking for when you are selecting a lookout location?
 - Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
 - Utilize aircraft if they are available, but only as a complement to established lookouts on the ground. Never rely exclusively on aircraft as your lookout.

- What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?
 - Experienced firefighter.
 - Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
 - Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
 - Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.

- What is the necessary equipment for a lookout?
 - PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, and water.
