

**National Interagency Coordination Center
Incident Management Situation Report
Friday, December 28, 2007 – 1000 MST
National Preparedness Level 1**

National Fire Activity (Weekly Total)

Initial attack activity: Light (68 new fires)
 New large fires: 4 (*)
 Large fires contained: 1
 Uncontained large fires: 3
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 1)

New fires: 66
 New large fires: 4
 Uncontained large fires: 3

Cottam Complex, Lower Rio Grande Valley NWR. One mile south of Granjeno, TX. Grass and brush. No new information.

Double R, Texas Forest Service. Started on private land fourteen miles southwest of Longview, TX. Grass and timber. No new information.

Willow City, Texas Forest Service. Started on private land thirteen miles northeast of Fredericksburg, TX. Grass, brush and timber. No new information.

Predictive Services Discussion: A progressive weather pattern continues with frequent storm systems moving across the country. Dry and windy conditions will develop in southern Texas today and then again early next week. Southern California will see an increase in temperatures, lowering relative humidity and offshore winds Sunday through Tuesday.

Hypothermia

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days and can get hypothermic even when the temperature stays well above freezing.

● Symptoms of hypothermia include:

- Slurred speech
- Loss of coordination
- Confusion
- Apathy
- Irrational behavior

● Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

● You can avoid hypothermia with the following precautions:

- Guard against dehydration.
- Avoid fatigue.
- Avoid cold winds.
- Take precautions to stay out of wet clothes.
- Be aware of the symptoms and take action upon their onset.

● If you recognize hypothermia, take the following steps:

- Move the victim to shelter.
- Remove wet clothes and replace them with warm, dry garments.
- If the victim is alert, give warm liquids to drink.
