

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, May 29, 2008 – 0530 MDT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (103 new fires)
 New large fires: 1 (*)
 Large fires contained: 2
 Uncontained large fires: 7
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 1
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern Area (PL 2)

New fires: 42
 New large fires: 1
 Uncontained large fires: 6
 Type 2 IMTs committed: 1

Rincon, Texas Forest Service. IMT 2 (Hannemann). IMT also managing the Childress Ranch and Juno fires. Started on private land twenty-five miles northwest of Fort Davis, TX. Grass and mesquite. Active fire behavior with rapid rates of spread.

Mustang Corner, Everglades NP. Fifteen miles southwest of Kendall, FL. Grass. Active runs in sawgrass.

Tracy, National Forests in Florida. Three miles northeast of Paisley, FL. Pine and brush. Partially burning in a wilderness area. Smoldering with minor flare-ups.

Mud Swamp New River, National Forests in Florida. Five miles northeast of Sumatra, FL. Southern rough. Partially burning in a wilderness area. Creeping and smoldering.

Childress Ranch, Texas Forest Service. Started on private land twenty miles southwest of Ozona, TX. Chaparral, cedar and grass. Isolated hot spots. Fire is unstaffed. Last report unless significant activity occurs.

Juno, Texas Forest Service. Ten miles south of Juno, TX. Cedar, juniper and grass. Isolated hot spots. Fire is unstaffed. Last report unless significant activity occurs.

Predictive Services Discussion: Dry and windy conditions will develop across portions of the Four Corner states today. Dry thunderstorms are possible along the southern extent of the Continental Divide. Moderate wind in combination with low relative humidity is expected in the Northeast. Relative humidity will remain low over Florida.

Initiate All Actions Based on Current and Expected Fire Behavior

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
