Predictive Services Discussion: A large high pressure system will persist with cold temperatures over the central and eastern U.S. A low pressure system moving across southern Arizona will bring mild temperatures and breezy winds.

Unexploded Ordnance

Recognizing unexploded ordnance (UXO) is the first and most important step in reducing the risk of injury or death. UXO poses risk of injury or death to anyone in the vicinity. Safety measures include:

- If you see UXO, stop. Do not move closer.
- Never remove anything near UXO.
- Clearly mark the UXO area with flagging, etc.
- Keep a minimum of 500 feet away from any UXO that is on fire.
- Report discovery of UXO to your immediate supervisor and/or dispatch.
- The following types of UXO may be encountered on military, former military and non-military sites:
 - Small arms munitions
 - Guided missiles
 - Rifle grenades
 - Rockets
 - Projectiles
 - Mortars
 - Bombs
 - Hand grenades
 - Projected grenades
 - Dynamite
- UXO may be found fully intact or in fragments. All UXO, whether intact or in fragments, presents a potential hazard.
- Deteriorated UXO presents a particular hazard because it may contain chemical agents that become exposed.
